Contents

	Preface	*page* xi
	Acknowledgment	xiii
1	**Introduction**	1
2	**Characterization of the SOC State**	7
2.1	Response Distributions	7
2.2	Temporal Fluctuations	8
2.3	Power Spectrum and Distribution of Lifetimes	9
2.4	Spatial Correlation Functions	10
3	**Systems Exhibiting SOC**	12
3.1	Introduction	12
3.2	Sandpiles	14
3.3	Ricepiles	16
3.4	Superconducting Avalanches	18
3.5	Droplet Formation	23
3.6	Earthquakes	25
3.7	Evolution	27
4	**Computer Models**	29
4.1	Introduction	29
4.2	Sandpiles: Conservative Model	29
	4.2.1 One-Dimensional Sandpile	30
	4.2.2 Dimensions Larger than 1	33
	4.2.3 Critical Response	36
	4.2.4 Numerical Results: Distribution Functions	37
	4.2.5 Power Spectrum	39
4.3	Earthquake Models: Nonconservative Models	42
	4.3.1 Criticality of the OFC Model	44
	4.3.2 Nearest Neighbor OFC Model	44
	4.3.3 Random Neighbor OFC Model	46

4.3.4 *Distributions and Fluctuations in the Nearest Neighbor OFC Model* 47
4.3.5 *The Effect of Disorder on the OFC Model* 51
4.3.6 *Physical Relevance of the OFC Model* 54
4.4 Lattice Gas 58
4.4.1 *Definition of the Lattice Gas Model* 58
4.4.2 *Properties of Lattice Gas* 60
4.4.3 *The Lesson of Lattice Gas* 62
4.4.4 *Physical Relevance of the Lattice Gas Model* 64
4.5 Forest Fires 65
4.5.1 *Definition of a Critical Forest Fire Model* 66
4.5.2 *Simulation Results for the Forest Fire Model* 67
4.5.3 *Physical Relevance of the Forest Fire Model* 68
4.6 Extremum Dynamics 68
4.6.1 *The Model of Interface Growth in a Random Medium* 69
4.6.2 *The Evolution Model* 73

5 The Search for a Formalism 76
5.1 Introduction 76
5.2 Mean Field Theory 77
5.2.1 *Sandpile Models* 78
5.2.2 *Earthquake Models* 81
5.2.3 *Diffusive Description of Lattice Gas* 85
5.2.4 *Forest Fire Model* 86
5.2.5 *Model of Biological Evolution* 89
5.3 Exact Solution of the Abelian Sandpile 92
5.3.1 *The Δ Matrix and the Probability Measure on the Configuration Space* 93
5.3.2 *Correlation Functions* 97
5.4 Langevin Equations 100
5.4.1 *Conservative Models* 100
5.4.2 *Nonconservative Models* 103
5.5 Dynamically Driven Renormalization Group Calculations 107
5.5.1 *Renormalization Transformation* 108
5.5.2 *Exponents* 116
5.5.3 *Nonconservative Models* 119
5.5.4 *Forest Fire Models* 124

6 Is It SOC or Not? 125
6.1 Where Is SOC to be Found? 126
6.2 What Is Tuning? 127

Appendices
A Code for the BTW Sandpile 131
B Code for the Lattice Gas 134
C Code for the Bak–Sneppen Evolution Model 138
D Power Spectra and the Correlation Function 141
E Statistical Weights in the DDRG 146
