

# Contents

<i>Preface</i>	<i>ix</i>
<i>Contributors</i>	<i>xi</i>
<i>Future Contributions</i>	<i>xiii</i>
<b>1. Magnetolithography: From the Bottom-Up Route to High Throughput</b>	<b>1</b>
<i>Amos Bardea and Ron Naaman</i>	
1. Introduction	1
2. The Magnetolithography Method	5
3. Patterning of Non-Flat Surfaces	14
4. Summary and Future Perspective	22
Acknowledgments	25
References	25
<b>2. The Optics of Spatial Coherence Wavelets</b>	<b>29</b>
<i>Román Castañeda</i>	
1. Introduction	30
2. Basic Concepts and Mathematical Formalism	34
3. Interference and Diffraction with Scalar Wavelets	67
4. Tensor Wavelets and Electromagnetic Fields	145
Acknowledgments	250
References	250
<b>3. Common Diffraction Integral Calculation Based on a Fast Fourier Transform Algorithm</b>	<b>257</b>
<i>Junchang Li, Yanmei Wu, and Yan Li</i>	
1. Introduction	258
2. Relation Between Discrete Fourier Transform and Fourier Transform	261
3. Fast Fourier Transform of Fresnel Diffraction	266
4. Numerical Integration of Classic Diffraction	281

5. The Collins Formula and Its Inverse Operation	292
6. Discussion and Conclusion	301
References	301
<b>4. A Generalized Approach to Describe the Interference Contrast and the Phase Contrast Method</b>	<b>303</b>
<i>Marcel Teschke and Stefan Sinzinger</i>	
1. Introduction	303
2. The Interferometric Phase Contrast	309
3. General Perspective of the Phase Contrast Method	316
4. Conclusion	324
5. References	326
<b>5. Nonlinear Partial Differential Equations for Noise Problems</b>	<b>329</b>
<i>Dokkyun Yi and Booyong Choi</i>	
1. Introduction	329
2. Noises and Filters	330
3. Methods Based on Nonlinear Partial Differential Equations	332
4. Relation of Functionals	340
Acknowledgment	342
References	342
<b>6. Harmuth Corrigenda</b>	<b>345</b>
<i>H. F. Harmuth</i>	
1. Introduction	346
Table 1. Dirac's Difference Equation and the Physics of Finite Differences	346
Table 2. Dogma of the Continuum and the Calculus of Finite Differences in Quantum Physics	347
Table 3. Calculus of Finite Differences in Quantum Electrodynamics	348
Table 4. Modified Maxwell Equations in Quantum Electrodynamics	349
Table 5. Interstellar Propagation of Electromagnetic Signals	350
Table 6. Electromagnetic Signals: Reflection, Focusing, Distortion, and Their Practical Applications	351
Table 7. Propagation of Electromagnetic Signals	351
Table 8. Information Theory Applied to Space-Time Physics	352
Table 9. Radiation of Nonsinusoidal Electromagnetic Waves	353
Table 10. Propagation of Nonsinusoidal Electromagnetic Waves	353
Table 11. Antennas and Waveguides for Nonsinusoidal Waves	354
Table 12. Nonsinusoidal Waves for Radar and Radio Communication	355

Table 13. Acoustic Imaging with Electronic Circuits	356
Table 14. Sequency Theory (Foundations and Applications)	357
Table 15. Transmission of Information by Orthogonal Functions (second edition)	358
Table 16. Transmission of Information by Orthogonal Functions (first edition)	359

## Contents of Volumes 151-163 **361**

## Index **367**
