

## Table of Contents

|                               |      |
|-------------------------------|------|
| Preface .....                 | xii  |
| Organizing committee .....    | xiii |
| Conference photograph .....   | xiv  |
| Conference participants ..... | xvi  |

## Presentations

### Session I. Historical Introduction

|  |   |
|--|---|
| Historical Perspective on Computational Star Formation.....<br><i>R. B. Larson</i> | 1   |
| Historical Perspective on Astrophysical MHD Simulations .....                      | 7<br><i>M. L. Norman</i>                                  |
| Modeling the Prestellar Cores in Ophiuchus .....                                   | 19<br><i>A. Whitworth, D. Stamatellos, &amp; S. Walch</i> |

### Session II. Individual Star Formation: Observations

|   |   |
|---|---|
| Low-mass Star Formation: Observations .....   | 25<br><i>N. J. Evans II</i>   |
| Formation of Massive Stars .....  | 33<br><i>M. Beltrán</i>   |
| Pre-Main Sequence Multiple Systems.....<br><i>H. Bouy</i>   | 41  |
| Pre-Main Sequence Disks .....   | 45<br><i>G. Duchêne</i>   |
| Morphological Complexity of Protostellar Envelopes .....  | 49<br><i>J. Tobin, L. Hartmann, E. Bergin, L. W. Looney, H.-F. Chiang,<br/>&amp; F. Heitsch</i> |
| Fragmentation and Dynamics in Massive Dense Cores in Cygnus-X.....<br><i>T. Csengeri, S. Bontemps, N. Schneider, &amp; F. Motte</i> | 53  |

### Session III. Individual Star Formation: Theory

|   |  |
|---|--|
| The Formation of Massive Stars .....                                | 57<br><i>I. A. Bonnell &amp; R. J. Smith</i>   |
| Recent Developments in Simulations of Low-mass Star Formation ..... | 65<br><i>M. N. Machida</i>                     |
| The Luminosity Problem: Testing Theories of Star Formation .....    | 73<br><i>C. F. McKee &amp; S. R. R. Offner</i> |

**Session IV. Formation of Clusters: Observations**

|   |     |
|---|-----|
| Internal Structure of Stellar Clusters: Geometry of Star Formation . . . . .  | 81  |
| <i>E. Alfaro &amp; N. Sánchez</i>   |     |
| Observations of the IMF in clusters . . . . .                                 | 89  |
| <i>J. Ascenso</i>   |     |
| Insights on Molecular Cloud Structure . . . . .                               | 99  |
| <i>J. Alves, M. Lombardi, &amp; C. Lada</i>                                   |     |
| Submillimeter Array Observations of Magnetic Fields in Star Forming Regions . | 103 |
| <i>R. Rao, J. M. Girart, &amp; D. P. Marrone</i>                              |     |

**Session V. Formation of Clusters: Theory I**

|  |     |
|--|-----|
| Modeling High-Mass Star Formation and Ultracompact H <sub>II</sub> Regions . . . . .         | 107 |
| <i>R. Klessen, T. Peters, R. Banerjee, M.-M. Mac Low, R. Galván-Madrid, &amp; E. R. Keto</i> |     |
| Theory of Cluster Formation: Effects of Magnetic Fields . . . . .                            | 115 |
| <i>F. Nakamura &amp; Z.-Y. Li</i>  |     |
| Magnetic Diffusion in Star Formation . . . . .   | 123 |
| <i>S. Basu &amp; W. B. Dapp</i>  |     |
| Analogues of Cores and Stars in Simulated Molecular Clouds . . . . .                         | 129 |
| <i>J. Wadsley, M. Reid, F. Qamar, A. Sills, &amp; N. Petitclerc</i>                          |     |

**Session VI. Formation of Clusters: Theory II**

|   |     |
|---|-----|
| Dependence of Star Formation on Initial Conditions and Molecular Cloud Structure                    | 133 |
| <i>M. R. Bate</i>   |     |
| The Universality Hypothesis: Binary and Stellar Populations in Star Clusters and Galaxies . . . . . | 141 |
| <i>P. Kroupa</i>  |     |
| Simulations of the IMF in Clusters . . . . .  | 151 |
| <i>R. E. Pudritz</i>  |     |
| Theories of the Initial Mass Function . . . . .   | 159 |
| <i>P. Hennebelle &amp; G. Chabrier</i>  |     |

**Session VII. Numerical Methods: MHD**

|  |     |
|--|-----|
| Magnetic Fields and Turbulence in Star Formation using Smoothed Particle Hydrodynamics . . . . . | 169 |
| <i>D. J. Price</i>   |     |
| Interstellar Turbulence and Star Formation . . . . .   | 179 |
| <i>A. G. Krutsuk, S. D. Ustyugov, &amp; M. L. Norman</i>   |     |

**Session VIII. Numerical Methods: Radiative Dynamics**

|  |     |
|--|-----|
| Star Formation with Adaptive Mesh Refinement Radiation Hydrodynamics . . . . . | 187 |
| <i>M. Krumholz</i>   |     |
| SPH Radiative Hydrodynamics Methods . . . . .                                  | 195 |
| <i>H. Susa</i>   |     |
| Moving-mesh Hydrodynamics with the AREPO Code . . . . .                        | 203 |
| <i>V. Springel</i>   |     |
| Ray Casting and Flux Limited Diffusion . . . . .                               | 207 |
| <i>A. Nordlund</i>   |     |

**Session IX. Tuesday Evening: Local Star Formation Processes**

|  |     |
|--|-----|
| The Role of Accretion Disks in the Formation of Massive Stars . . . . .                                  | 215 |
| <i>R. Kuiper, H. Klahr, H. Beuther, &amp; T. Henning</i>   |     |
| Embedded Disks Around Low-Mass Protostars . . . . .  | 219 |
| <i>E. I. Vorobyov &amp; S. Basu</i>  |     |
| The Formation of Brown Dwarfs in Discs: Physics, Numerics, and Observations.                             | 223 |
| <i>D. Stamatellos &amp; A. Whitworth</i>   |     |
| Radiative, Magnetic and Numerical Feedbacks on Small-Scale Fragmentation . . .                           | 227 |
| <i>B. Commerçon, P. Hennebelle, E. Audit, G. Chabrier, &amp; R. Teyssier</i>                             |     |
| The Effects of Radiation Feedback on Early Fragmentation and Stellar Multiplicity                        | 231 |
| <i>S. S. R. Offner</i>   |     |
| Simulations of Massive Star Cluster Formation and Feedback in Turbulent Giant Molecular Clouds . . . . . | 235 |
| <i>E. Harper-Clark &amp; N. Murray</i>   |     |

**Session X. Star Formation Feedback I**

|   |     |
|---|-----|
| Observations of Star Formation Triggered by H <sub>II</sub> Regions . . . . .     | 239 |
| <i>L. Deharveng &amp; A. Zavagno</i>  |     |
| Observations of Winds, Jets, and Turbulence Generation in GMCs . . . . .          | 247 |
| <i>J. Bally</i>   |     |
| Prestellar Cores and the Origin of the IMF: First Results from Herschel . . . . . | 255 |
| <i>P. André, A. Men'shchikov, V. Könyves, &amp; D. Arzoumanian</i>                |     |
| Radiation Driven Implosion and Triggered Star Formation . . . . .                 | 263 |
| <i>T. G. Bisbas, A. P. Whitworth, R. Wünsch, D. A. Hubber, &amp; S. Walch</i>     |     |

**Session XI. Star Formation Feedback II**

|   |     |
|---|-----|
| Action of Winds Inside and Outside of Star Clusters . . . . .   | 267 |
| <i>J. Palouš, J. Dale, R. Wünsch, S. Silich, G. Tenorio-Tagle, &amp; A. Whitworth</i>                 |     |
| Theory of Feedback in Clusters and Molecular Cloud Turbulence . . . . .                               | 275 |
| <i>E. Vázquez-Semadeni</i>  |     |
| The Theory of Young Cluster Disruption . . . . .  | 283 |
| <i>S. P. Goodwin</i>  |     |
| Outflows and Turbulence in Young Stellar Clusters – An Observer’s View . . . . .                      | 287 |
| <i>H. G. Arce</i>   |     |
| Discs, Outflows, and Feedback in Collapsing Magnetized Cores . . . . .                                | 291 |
| <i>D. F. Duffin &amp; R. E. Pudritz</i>   |     |
| Radiation-MHD Simulations of H <sub>II</sub> Region Expansion in Turbulent Molecular Clouds . . . . . | 297 |
| <i>S. J. Arthur, W. J. Henney, G. Mellema, F. de Colle, &amp; E. Vázquez-Semadeni</i>                 |     |

**Session XII. Star Formation Feedback III**

|   |     |
|---|-----|
| Ionisation Feedback in Star and Cluster Formation Simulations . . . . .               | 301 |
| <i>B. Ercolano &amp; M. Gritschneider</i>   |     |
| Supernova Feedback on the Interstellar Medium and Star Formation . . . . .            | 309 |
| <i>G. Hensler</i>   |     |
| Pillars, Jets and Dynamical Features . . . . .  | 319 |
| <i>M. Gritschneider, A. Burkert, T. Naab, &amp; S. Walch</i>                          |     |
| The Interaction of an H <sub>II</sub> Region with a Fractal Molecular Cloud . . . . . | 323 |
| <i>S. Walch, A. Whitworth, T. Bisbas, R. Wünsch, &amp; D. Hubber</i>                  |     |

**Session XIII. Star Formation on Galactic Scales I**

|   |     |
|---|-----|
| Scaling Relations between Gas and Star Formation in Nearby Galaxies . . . . .   | 327 |
| <i>F. Bigiel, A. Leroy, &amp; F. Walter</i>                                     |     |
| Observational Comparison of Star Formation in Different Galaxy Types . . . . .  | 335 |
| <i>E. K. Grebel</i>   |     |
| Theory of the Star Formation Rate . . . . .                                     | 347 |
| <i>P. Padoan &amp; Å. Nordlund</i>  |     |
| Collisions of Supersonic Clouds . . . . .                                       | 355 |
| <i>A. McLeod, J. Palouš, &amp; A. Whitworth</i>                                 |     |
| Star Formation in the Central Molecular Zone of the Milky Way . . . . .         | 359 |
| <i>S. S. Kim, T. R. Saitoh, M. Jeon, D. Merritt, D. F. Figer, &amp; K. Wada</i> |     |

**Session XIV. Star Formation on Galactic Scales II**

|  |     |
|--|-----|
| Galactic Scale Star Formation: Interplay Between Stellar Spirals and the ISM . . . . . | 363 |
| <i>K. Wada, J. Baba, M. Fujii, &amp; T. R. Saitoh</i>                                  |     |

|  |     |
|--|-----|
| Control of Galactic Scale Star Formation by Gravitational Instability or Midplane Pressure?.....<br><i>M.-M. Mac Low</i>                   | 371 |
| Star Formation and the Properties of Giant Molecular Clouds in Global Simulations<br><i>E. J. Tasker &amp; J. C. Tan</i>                   | 377 |
| Modeling Formation of Globular Clusters: Beacons of Galactic Star Formation .<br><i>O. Y. Gnedin</i>                                       | 381 |
| The formation of Super-Star Clusters in Disk and Dwarf Galaxies .....  | 385 |
| <i>C. Weidner, I. A. Bonnell, &amp; H. Zinnecker</i>   |     |
| <b>Session XV. Special Purpose Hardware</b>  |     |
| GRAPE Accelerators.....<br><i>J. Makino</i>  | 389 |
| Numerical Cosmology Powered by GPUs.....<br><i>D. Aubert</i>   | 397 |
| GAMER with Out-of-Core Computation.....<br><i>H.-Y. Schive, Y.-C. Tsai, &amp; T. Chiueh</i>  | 401 |
| Future Trends in Computing.....<br><i>B. G. Elmegreen</i>  | 407 |
| <b>Session XVI. Thursday Evening: Computational Methods</b>  |     |
| A Fast Explicit Scheme for Solving MHD Equations with Ambipolar Diffusion .<br><i>J. Kim</i>   | 415 |
| Ambipolar Diffusion Effects on Weakly Ionized Turbulence Molecular Clouds...<br><i>P. S. Li, C. F. McKee, &amp; R. I. Klein</i>            | 421 |
| Implementing and Comparing Sink Particles in AMR and SPH .....   | 425 |
| <i>C. Federrath, R. Banerjee, D. Seifried, P. C. Clark, &amp; R. S. Klessen</i>  |     |
| Convergence of SPH and AMR Simulations .....   | 429 |
| <i>D. A. Hubber, S. Falle, &amp; S. P. Goodwin</i>   |     |
| <b>Session XVII. Radiation Diagnostics of Star Formation</b>   |     |
| Radiative Transfer Modeling of Simulation and Observational Data.....<br><i>J. Steinacker, T. Henning, &amp; A. Bacmann</i>                | 433 |
| Radiative Transfer in Molecular Clouds.....<br><i>M. Juvela</i>  | 443 |
| Adaptable Radiative Transfer Innovations for Submillimeter Telescopes (ARTIST)<br><i>M. Padovani, J. K. Jørgensen, and the ARTIST team</i> | 451 |
| Radiative Transfer Simulations of Infrared Dark Clouds .....   | 455 |
| <i>Y. Pavlyuchenkov, D. Wiebe, A. Fateeva, &amp; T. Vasyunina</i>  |     |

|   |     |
|---|-----|
| <b>Session XVIII. Large Scale Star Formation</b>  |     |
| Gas Dynamics in whole Galaxies: SPH . . . . .   | 459 |
| <i>C. Dobbs</i>   |     |
| Star Formation and Gas Dynamics in Galactic Disks: Physical Processes and Numerical models . . . . .      | 467 |
| <i>E. C. Ostriker</i>   |     |
| Star Formation in Interacting Galaxies . . . . .  | 475 |
| <i>C. Struck</i>  |     |
| Shock-Induced Star Cluster Formation in Colliding Galaxies . . . . .                                      | 483 |
| <i>T. R. Saitoh, H. Daisaka, E. Kokubo, J. Makino, T. Okamoto, K. Tomisaka, K. Wada, &amp; N. Yoshida</i> |     |
| Galactic Star Formation in Parsec-Scale Resolution Simulations . . . . .                                  | 487 |
| <i>L. C. Powell, F. Bournaud, D. Chapon, J. Devriendt, A. Slyz, &amp; R. Teyssier</i>                     |     |
| <b>Session XIX. Cosmological Star Formation</b>   |     |
| Galaxy Formation Hydrodynamics: From Cosmic Flows to Star-Forming Clouds . . . . .                        | 491 |
| <i>F. Bournaud</i>  |     |
| Fragmentation in Turbulent Primordial Gas . . . . .   | 499 |
| <i>S. C. O. Glover, P. C. Clark, R. S. Klessen, &amp; V. Bromm</i>  |     |
| Cosmological Simulations of Low-Mass Galaxies: Some Potential Issues . . . . .                            | 503 |
| <i>P. Colin, V. Avila-Reese, &amp; O. Valenzuela</i>  |     |
| <b>Session XX. Computational Star Formation</b>   |     |
| The Impact of Metallicity and X-rays on Star Formation . . . . .  | 507 |
| <i>M. Spaans, A. Aykutalp, &amp; S. Hocuk</i>   |     |
| A Guide to Comparisons of Star Formation Simulations with Observations . . . . .                          | 511 |
| <i>A. A. Goodman</i>  |     |
| Comparison Between Simulations and Theory: Where We Stand . . . . .                                       | 521 |
| <i>J. J. Monaghan</i>   |     |
| Concluding Remarks: Playing by the Numbers . . . . .  | 527 |
| <i>V. Trimble</i>   |     |
| Conference photos . . . . .   | 539 |
| Author index . . . . .  | 549 |
| Object index . . . . .  | 551 |
| Subject Index . . . . .   | 553 |
