

CONTENTS

1. FUNDAMENTALS	1
A. Fusion Reactions, 1	
B. Plasma Properties, 6	
C. Coulomb Collisions, 10	
D. Electromagnetic Theory, 16	
2. MOTION OF CHARGED PARTICLES IN ELECTRIC AND MAGNETIC FIELDS	22
A. Gyromotion and Drifts, 22	
1. <i>Gyromotion and Magnetic Moment, 22</i>	
2. <i>$\vec{E} \times \vec{B}$ Drift, 25</i>	
3. <i>Grad-B Drift, 27</i>	
4. <i>Polarization Drift, 28</i>	
5. <i>Curvature Drift, 29</i>	
B. Constants of the Motion, 32	
1. <i>Magnetic Moment, 33</i>	
2. <i>Second Adiabatic Invariant, 34</i>	
3. <i>Canonical Angular Momentum, 36</i>	
C. Confinement in Mirror Fields, 39	
D. Confinement in Axisymmetric Toroidal Fields, 43	
E. Confinement in Nonaxisymmetric Toroidal Fields, 56	
F. Magnetization Current, 58	

3. PLASMA DISTRIBUTION FUNCTIONS AND COLLISIONS	60
A. Boltzmann and Vlasov Equations, 61	
B. Drift Approximations, 62	
C. Fokker-Planck Theory of Collisions, 65	
D. Coulomb Collisional Energy Transfer, 72	
E. Krook Collision Operators, 75	
4. MACROSCOPIC PLASMA DESCRIPTION	77
A. Moments Equations, 78	
B. One-Fluid Model, 82	
C. Magnetohydrodynamic Model, 86	
D. Anisotropic Pressure Tensor Model, 87	
E. Strong-Field, Transport-Time-Scale Ordering, 90	
5. PLASMA EQUILIBRIA	94
A. General Properties of Equilibria, 94	
B. Axisymmetric Toroidal Equilibria, 96	
C. Large-Aspect-Ratio Toroidal Equilibria, 103	
D. Magnetic Field Diffusion and Flux Surface Evolution, 110	
E. Anisotropic Pressure Equilibria, 113	
6. TRANSPORT	116
A. Classical Collisional Transport, 116	
B. Neoclassical Transport in a Large-Aspect-Ratio Torus—Multifluid Formulation, 119	
C. General Multifluid Transport Formalism, 130	
D. Neoclassical Transport in a Large-Aspect-Ratio Torus—Drift-Kinetic Formulation, 133	
E. Anomalous Transport, 140	
F. Global Confinement Estimates, 143	

7. WAVES	146
A. Waves in a Cold, Unmagnetized Plasma, 146	
B. Waves in a Cold, Uniformly Magnetized Plasma, 148	
C. Langmuir Waves and Landau Damping, 152	
D. Vlasov Theory of Plasma Waves, 154	
E. Electrostatic Waves, 161	
8. STABILITY	168
A. Hydromagnetic Instabilities, 172	
B. Energy Principle, 179	
C. Pinch and Kink Instabilities, 184	
D. Interchange (Flute) Instabilities, 188	
E. Resistive Instabilities, 195	
F. Drift Wave Instabilities, 197	
G. Loss-Cone and Drift-Cone Instabilities, 199	
9. HEATING AND FUELING	203
A. Resistive Heating, 204	
B. Adiabatic Compression, 206	
C. Neutral Beam Injection, 209	
D. Radio-Frequency and Microwave Heating, 217	
E. Alpha Particle Heating, 221	
F. Fueling, 224	
10. RADIATION	225
A. Radiation Fields, 225	
B. Bremsstrahlung, 228	
C. Cyclotron Emission, 229	
D. Impurity Radiation, 231
