<i>Preface</i>	XIII
<i>About the Authors</i>	XV
<i>Acronyms</i>	XVII
ASTRONOMY & ASTROPHYSICS: AN INTERNATIONAL JOURNAL	1
1 Introduction	1
2 The scope and ethical requirements of A&A	2
3 The A&A community	4
4 The A&A peer-review process	5
4.1 First step: Editor's initial reading	5
4.1.1 Regular articles	6
4.1.2 Letters to the Editor	8
4.1.3 Articles on special subjects	8
4.1.4 Some style issues	9
4.2 Scientific evaluation by the referee	10
4.3 Complications in the peer-review process	13
4.3.1 Delay in finding a referee	14
4.3.2 Delay in getting the referee report	14
4.3.3 Offensive attitude of referee or author	15
4.4 The production of A&A	15
5 The A&A economic model	17
5.1 Comparison with other journals	18
5.2 Full open access for A&A?	19
6 Conclusions	21
THE HISTORY OF THE CREATION OF ASTRONOMY & ASTROPHYSICS	23

THE EDITOR-REFEREE SYSTEM AND PUBLICATION: AN EDITOR'S VIEW OF THE PROCESS	33
1 Introduction	33
2 Evolution of the editorial-referee system	33
2.1 The origin of scientific journals	33
2.2 Enter the referees	35
2.3 The vintage astronomical journals	37
3 The scientific editorial process now	41
3.1 The editor	41
3.2 The referee	42
3.3 The referee report	46
3.4 The review process as a queue	47
3.5 Second referee	49
4 Particular issues	50
4.1 The availability of information: from <i>Jahrsberichte</i> to the (ADS)	50
4.2 On anonymity	50
4.3 Referee ethics: the norm and the breach	52
4.4 Citation: the editorial side of the issue	52
4.5 Series	54
4.6 Multiple submissions	55
4.7 Plagiarism: intellectual property and authorship	55
4.8 Ghost and "honorary" authorship	57
4.9 The role of acknowledgements	58
5 Concluding remarks	58
THE ROLE OF THE PUBLISHER	63
1 Introduction	63
2 Management tools: from submission to acceptance	64
3 Production: from acceptance to publication	64
3.1 The first step: copy editing	64
3.2 The second step: prepress	65
3.3 The third step: publication of the online version	67
3.4 The fourth step: the paper version – printing and dispatching	67
4 Web platform	67
5 Communication and marketing	69
6 Conclusion	70

LANGUAGE EDITING AT ASTRONOMY & ASTROPHYSICS	71
1 Background	71
2 Why move to only English at A&A	72
2.1 English as a <i>lingua franca</i>	73
2.2 Editing for clear and correct English expression	73
3 What is edited: seeking quality	74
3.1 Why simple, as well as correct, English	75
3.2 Why formal English?	77
4 The role of language editing in the editorial process	78
4.1 How to react to suggestions	79
5 Other aspects to look at	79
5.1 Recommended resources when writing for A&A	80
6 Concluding statement	82
 GUIDE TO THE ENGLISH EDITING AT ASTRONOMY & ASTROPHYSICS	 85
1 Aims of this guide	85
2 Consistency of style: UK/US spelling conventions	85
3 Punctuation, abbreviation, and capitalization	86
3.1 Punctuation	87
3.2 Capitalization and abbreviation	91
4 Verb tenses, plural/singular nouns	92
4.1 Verb tenses	92
4.2 Nouns: plural or singular	93
5 Structure: Sentences and word order	94
5.1 Paragraphing	94
5.2 The English default structure	94
5.3 Inverting word order	95
5.4 The direct object	95
5.5 Parallel structure	95
5.6 Unambiguous reference	96
5.6.1 Subordinate clause: <i>THAT vs. WHICH</i>	96
5.6.2 Subject of a subordinate clause: Dangling modifiers	96

6	Clarity and precision	97
6.1	Indirect introductory phrasing	98
6.2	Avoiding ambiguity	98
6.3	Avoiding redundancies	100
6.4	Avoiding vague qualitative descriptions	100
6.5	Avoiding wordy constructions that mean the same as the direct one	101
6.6	Transitional phrases	102
7	Some frequent corrections	102
ASTRONOMY LIBRARIES – YOUR GATEWAY TO INFORMATION		107
1	Introduction	107
2	What librarians can do for you	108
3	Two astronomy gorillas	109
3.1	NASA Astrophysics Data System (ADS)	109
3.1.1	Some search tips	110
3.1.2	Result lists: bibcodes, citation counts, and letter links . . .	111
3.2	arXiv.org e-print archive	112
3.2.1	Manuscripts uploaded by authors	113
3.2.2	Finding your way through arXiv/astro-ph	113
4	Databases beyond ADS and astro-ph	114
4.1	SPIRES-HEP	114
4.2	Google Scholar	115
4.3	Scirus	115
4.4	ISI Web of Knowledge and Web of Science (WoS)	115
4.5	Scopus	116
5	Core astronomy journals	116
6	Open access	118
6.1	The OA concept	118
6.2	OA finding aids	119
6.2.1	Directory of Open Access Journals (DOAJ)	119
6.2.2	OAIster	120
6.2.3	ScientificCommons	120
6.2.4	Directory of Open Access Repositories (OpenDOAR)	120
7	Problems with online documents	120
7.1	Long-term access	121
7.2	Completeness of digitized material	121
7.3	Deleted items	121
7.4	Broken links	122

8	Everything is on the internet ... really?	123
9	Organizing a personal library	123
10	Bibliometric studies	127
10.1	Caveats of citation analysis	128
10.2	Alternative measures	129
10.3	Telescope bibliographies	130
11	Cooperations of librarians and astronomers	131
11.1	IAU Commission 5: Working Group Libraries (WG Lib)	131
11.2	Library and Information Services in Astronomy (LISA)	131
12	Conclusions	132
	FROM YOUR PAPER TO VIZIER AND SIMBAD	135
1	Introduction	135
2	The VizieR database	137
2.1	Content	137
2.2	The ReadMe file	137
2.3	VizieR	138
2.4	Usage of VizieR	140
3	How your data are integrated in SIMBAD	140
3.1	Acronym creation in SIMBAD	140
3.2	Integration of objects cited in the text of papers into SIMBAD . .	141
3.2.1	Tagging astronomical objects	141
3.2.2	Designations of astronomical objects	143
3.2.3	Cross-identifications proposed in papers	144
3.3	Integration of catalogs and tables in SIMBAD	145
3.4	Hierarchical links	146
4	The SIMBAD database	147
4.1	Content	147
4.1.1	Identifiers	148
4.1.2	Basic data	148
4.1.3	Bibliographical data	149
4.1.4	Some statistics on the data contents	150
4.2	SIMBAD access	151

5 Aladin	151
5.1 Accessing data from Aladin	153
5.2 Visualizing and comparing data with Aladin	153
6 Conclusion	154
Appendix	154
A SIMBAD query modes	154
A.1 Basic query	154
A.2 Simple query	155
A.2.1 Query by identifier	155
A.2.2 Query by coordinates	155
A.2.3 Query of bibliographic references	155
A.3 Advanced query	155
A.3.1 Query by criteria	155
A.3.2 Query by scripts	156
A.4 Output options	156
Subject Index	159
Name Index	163
Author Index	165
