Units and symbols	xiii		2.19 Fluid equations	73
			2.20 Magnetohydrodynamics	75
<b>1 Fusion</b>	<b>1</b>		2.21 Physics of plasma fluid	77
1.1 Fusion and tokamaks	2		2.22 Plasma diamagnetism	80
1.2 Fusion reactions	3		2.23 Braginskii equations	84
1.3 Thermonuclear fusion	5		2.24 Plasma waves	90
1.4 Power balance	8		2.25 Landau damping	96
1.5 Ignition	10			
1.6 Tokamaks	13	<b>3 Equilibrium</b>		<b>101</b>
1.7 Tokamak reactor	15	3.1 Tokamak equilibrium		102
1.8 Fuel resources	21	3.2 Flux functions		104
1.9 Tokamak economics	23	3.3 Grad–Shafranov equation		105
1.10 Tokamak research	24	3.4 Safety factor, $q$		107
		3.5 Beta		111
<b>2 Plasma physics</b>	<b>29</b>	3.6 Large aspect-ratio		113
2.1 Tokamak plasma	30	3.7 Shafranov shift		115
2.2 Debye shielding	31	3.8 Vacuum magnetic field		117
2.3 Plasma frequency	34	3.9 Electric fields		119
2.4 Larmor orbits	36	3.10 Particle orbits		120
2.5 Particle motion along $B$	38	3.11 Particle trapping		123
2.6 Particle drifts	40	3.12 Trapped particle orbits		125
2.7 Adiabatic invariants	45	3.13 Plasma rotation		128
2.8 Collisions	47	3.14 Current drive		131
2.9 Kinetic equations	51			
2.10 Fokker–Planck equation	53	<b>4 Confinement</b>		<b>143</b>
2.11 Gyro-averaged kinetic equations	54	4.1 Tokamak confinement		144
2.12 Fokker–Planck equation for a plasma	56	4.2 Resistive plasma diffusion		146
2.13 Fokker–Planck coefficients for Maxwellian distributions	58	4.3 Diffusion in a cylinder		148
2.14 Relaxation processes	61	4.4 Pfirsch–Schlüter current		149
2.15 Collision times	65	4.5 Pfirsch–Schlüter diffusion		152
2.16 Resistivity	66	4.6 Banana regime transport		153
2.17 Runaway electrons	68	4.7 Plateau transport		161
2.18 Electromagnetism	71	4.8 Ware pinch effect		163
		4.9 Bootstrap current		166
		4.10 Neoclassical resistivity		168

13.4	Reactor power balance	767	14.7	Lengths	795
13.5	ITER	772	14.8	Frequencies	797
13.6	ITER—Performance assessment	777	14.9	Velocities	798
13.7	Prospects	782	14.10	Resistivity	799
<b>14</b>	<b>Appendix</b>	<b>785</b>	14.11	Chang–Hinton formula for $\chi_i$	801
14.1	Vector relations	786	14.12	Bootstrap current	802
14.2	Differential operators	786	14.13	Confinement scaling relations	803
14.3	Units—conversions	788	14.14	Plasma shape	805
14.4	Physical constants	789	14.15	Formulae	805
14.5	Coulomb logarithm	789	14.16	Symbols	806
14.6	Collision times	793	<b>Index</b>	<b>809</b>
