

# Table of Contents

<b>1</b>	<b>Some single-phase boundary layer theory basics.....</b>	<b>1</b>
1.1	Flow over plates, velocity profiles, shear forces, heat transfer.....	1
1.1.1	Laminar flow over one side of a plane .....	1
1.1.2	Turbulent flow parallel to plane .....	3
1.2	Steady state flow in pipes with circular cross sections.....	4
1.2.1	Hydraulically smooth wall surface .....	7
1.2.2	Transition region .....	16
1.2.3	Completely rough region.....	17
1.2.4	Heat transfer to fluid in a pipe.....	18
1.3	Transient flow in pipes with circular cross sections.....	30
	Nomenclature .....	32
	References.....	34
<b>2</b>	<b>Introduction to turbulence of multi-phase flows.....</b>	<b>39</b>
2.1	Basic ideas.....	39
2.2	Isotropy .....	50
2.3	Scales, eddy viscosity.....	51
2.3.1	Small scale turbulent motion .....	51
2.3.2	Large scale turbulent motion, <i>Kolmogorov-Pandtl</i> expression.....	52
2.4	k-eps framework.....	54
	Nomenclature .....	59
	References.....	63
<b>3</b>	<b>Sources for fine resolution outside the boundary layer.....</b>	<b>67</b>
3.1	Bulk sources .....	67
3.1.1	Deformation of the velocity field.....	67
3.1.2	Blowing and suction .....	67
3.1.3	Buoyancy driven turbulence generation .....	68
3.1.4	Turbulence generated in particle traces .....	69
3.2	Turbulence generation due to nucleate boiling.....	73
3.3	Treatment of the boundary layer for non-boiling flows .....	74
3.4	Initial conditions.....	79
	Nomenclature .....	80
	References.....	87

<b>4</b>	<b>Source terms for <i>k-eps</i> models in porous structures.....</b>	<b>89</b>
4.1	Single-phase flow .....	89
4.1.1	Steady developed generation due to wall friction .....	89
4.1.2	Heat transfer at the wall for steady developed flow .....	92
4.1.3	Heat transfer at the wall for non-developed or transient flow ...	94
4.1.4	Singularities.....	94
4.2	Multiphase flow .....	96
4.2.1	Steady developed generation due to wall friction.....	96
4.2.2	Heat transfer at the wall for forced convection without boiling.....	98
4.2.3	Continuum-continuum interaction.....	103
4.2.4	Singularities.....	104
4.2.5	Droplets deposition at walls for steady developed flow .....	106
4.2.6	Droplets deposition at walls for transient flow .....	106
	Nomenclature .....	107
	References.....	110
<b>5</b>	<b>Influence of the interfacial forces on the turbulence structure.....</b>	<b>113</b>
5.1	Drag forces .....	113
5.2	The role of the lift force in turbulent flows .....	113
5.3	Lubrication force in the wall boundary layer .....	118
5.4	The role of the dispersion force in turbulent flows .....	119
5.4.1	Dispersed phase in laminar continuum.....	119
5.4.2	Dispersed phase in turbulent continuum .....	120
	Nomenclature .....	125
	References.....	126
<b>6</b>	<b>Particle-eddy interactions.....</b>	<b>129</b>
6.1	Three popular modelling techniques .....	129
6.2	Particle-eddy interaction without collisions .....	130
6.2.1	Response coefficient for single particle.....	130
6.2.2	Response coefficient for clouds of particles.....	132
6.2.3	Particle-eddy interaction time without collisions .....	133
6.3	Particle-eddy interaction with collisions .....	134
	Nomenclature .....	135
	References.....	137
<b>7</b>	<b>Two group <i>k-eps</i> models.....</b>	<b>139</b>
7.1	Single phase flow .....	139
7.2	Two-phase flow.....	140
	Nomenclature .....	141
	References.....	143
<b>8</b>	<b>Set of benchmarks for verification of <i>k-eps</i> models in system computer codes.....</b>	<b>145</b>
8.1	Introduction.....	145

8.2	Single phase cases .....	146
8.3	Two-phase cases.....	157
	Conclusions .....	160
	Nomenclature .....	160
	References.....	162
<b>9</b>	<b>Simple algebraic models for eddy viscosity in bubbly flow.....</b>	<b>165</b>
9.1	Single-phase flow in rod bundles .....	165
9.1.1	Pulsations normal to the wall .....	166
9.1.2	Pulsation through the gap .....	167
9.1.3	Pulsation parallel to the wall .....	170
9.2	Two-phase flow.....	170
9.2.1	Simple algebraic models.....	170
9.2.2	Local algebraic models in the framework of the <i>Boussinesq's</i> hypothesis .....	174
9.2.3	Modification of the boundary layer shear due to modification of the bulk turbulence.....	181
9.2.4	Modification of the boundary layer shear due boiling at the wall .....	183
	Nomenclature .....	184
	References.....	190
<b>10</b>	<b>Large eddy simulation.....</b>	<b>195</b>
10.1	Phenomenology.....	195
10.2	Filtering – brief introduction .....	195
10.3	The extension of the <i>Amsden</i> et al. LES model to porous structures .....	199
	Nomenclature .....	204
	References.....	206
<b>11</b>	<b>Solubility of O<sub>2</sub>, N<sub>2</sub>, H<sub>2</sub> and CO<sub>2</sub> in water.....</b>	<b>209</b>
11.1	Introduction .....	209
11.2	Oxygen in water .....	217
11.3	Nitrogen water.....	223
11.4	Hydrogen water.....	228
11.5	Carbon dioxide–water .....	231
11.6	Diffusion coefficients.....	233
11.7	Equilibrium solution and dissolution.....	235
	Nomenclature .....	236
	References.....	238
<b>12</b>	<b>Transient solution and dissolution of gasses in liquid flows.....</b>	<b>241</b>
12.1	Bubbles.....	242
12.1.1	Existence of micro-bubbles in water .....	245
12.1.2	Heterogeneous nucleation at walls .....	247

---

12.1.3	Steady diffusion mass transfer of the solvent across bubble interface .....	250
12.1.4	Initial bubble growth in wall boundary layer .....	253
12.1.5	Transient diffusion mass transfer of the solvent across the bubble interface .....	255
12.2	Droplets .....	265
12.2.1	Steady state gas site diffusion .....	265
12.2.2	Transient diffusion inside the droplet .....	269
12.3	Films .....	271
12.3.1	Geometrical film-gas characteristics .....	272
12.3.2	Liquid side mass transfer due to molecular diffusion .....	274
12.3.3	Liquid side mass transfer due to turbulence diffusion .....	275
	Nomenclature .....	283
	References .....	288
<b>13</b>	<b>Thermodynamic and transport properties of diesel fuel .....</b>	<b>293</b>
13.1	Introduction .....	293
13.2	Constituents of diesel fuel .....	295
13.3	Averaged boiling point at atmospheric pressure .....	297
13.4	Reference liquid density point .....	298
13.5	Critical temperature, critical pressure .....	299
13.6	Molar weight, gas constant .....	299
13.7	Saturation line .....	300
13.8	Latent heat of evaporation .....	303
13.9	The liquid density .....	304
13.9.1	The volumetric thermal expansion coefficient .....	305
13.9.2	Isothermal coefficient of compressibility .....	307
13.10	Liquid velocity of sound .....	308
13.11	The liquid specific heat at constant pressure .....	309
13.12	Specific liquid enthalpy .....	312
13.13	Specific liquid entropy .....	314
13.14	Liquid surface tension .....	316
13.15	Thermal conductivity of liquid diesel fuel .....	316
13.16	Cinematic viscosity of liquid diesel fuel .....	318
13.17	Density as a function of temperature and pressure for diesel fuel vapor .....	319
13.18	Specific capacity at constant pressure for diesel vapor .....	320
13.19	Specific enthalpy for diesel fuel vapor .....	322
13.20	Specific entropy for diesel fuel vapor .....	323
13.21	Thermal conductivity of diesel fuel vapor .....	324
13.22	Cinematic viscosity of diesel fuel vapor .....	325
	References .....	325
	Appendix 13.1 Dynamic viscosity and density for saturated n-octane vapor ...	326
