<i>Preface</i>	<i>ix</i>
<i>Contributors</i>	<i>xi</i>
<i>Future Contributions</i>	<i>xiii</i>
1. Derivation of the Reflection Equations for Higher-Order Aberrations of Local Wave Fronts by Oblique Incidence	1
<i>Gregor Esser, Wolfgang Becken, Werner Müller, Peter Baumbach, Josep Arasa, and Dietmar Uttenweiler</i>	
1. Introduction	2
2. Definitions and Notation	4
3. Mathematical Approach in the 2D Case	12
4. Mathematical Approach in the 3D Case	23
5. Results and Discussion	30
6. Examples and Applications	31
7. Summary	36
References	38
2. Thermal Imaging in Medicine	41
<i>Lila Iznita Izhar and Maria Petrou</i>	
1. Introduction	41
2. The Physics Behind Thermal Imaging	43
3. Medical Thermal Imaging	45
4. Physiological Modeling of Heat Flow in Thermal Image Analysis	51
5. Infrared Thermal Imaging in the Detection and Diagnosis of Various Medical Problems	57
6. Data-Processing Methods Used in the Analysis of Medical Thermograms	70
7. Conclusions	105
Acknowledgments	106
References	106

3. Derivation of the Radiative Transfer Equation in a Medium with a Spatially Varying Refractive Index: A Review	115
<i>Jean-Michel Tualle</i>	
1. The Radiative Transfer Equation	115
2. Energy Conservation	126
3. Hamiltonian Formulation of Radiative Transfer	132
4. The Diffusion Approximation	136
5. Conclusion	141
References	141
4. Imaging Mass Spectrometry: Sample Preparation, Instrumentation, and Applications	145
<i>Kamlesh Shrivastava and Mitsutoshi Setou</i>	
1. Introduction	146
2. Ionization Methods for Imaging Mass Spectrometry	147
3. Maldi Imaging	150
4. Instrumentation	161
5. IMS Measurements	165
6. Data Analysis	165
7. Applications of IMS for Direct Analysis of Tissue	166
8. Summary	182
Acknowledgments	183
References	184
5. Transformation Optics	195
<i>Robert T. Thompson and Steven A. Cummer</i>	
1. Introduction	196
2. The Basics of Transformation Optics	206
3. Geometric Considerations	209
4. Classical Electrodynamics	220
5. Transformation Optics of Linear Dielectrics	238
6. The Conformal Method	259
7. The Quasiconformal Method	263
8. Extensions of the Transformation Concept to Other Wave Systems	268
9. Electromagnetic Metamaterial Realization of Transformation Optics Devices	273
10. Conclusions	279
Acknowledgments	281
Appendices	281
References	285

6. TSEM: A Review of Scanning Electron Microscopy in Transmission Mode and Its Applications	297
<i>Tobias Klein, Egbert Buhr, and Carl Georg Frase</i>	
1. Introduction	298
I. Technique	299
2. Common Electron Microscopy Techniques	299
3. TSEM Signal Generation	303
4. TSEM Compared with Common Electron Microscopy Techniques	320
II. Applications	326
5. Traceable Dimensional Measurements of Nanostructures	326
6. Characterization of Different Material Classes	340
7. Special Imaging Modes	344
8. Conclusion	346
List of Abbreviations	347
References	348
7. Logarithmic Image Processing: Additive Contrast, Multiplicative Contrast, and Associated Metrics	357
<i>Michel Jourlin, Maxime Carré, Josselin Breugnot, and Mohamed Bouabdellah</i>	
1. Introduction, Notations, and Recalls	358
2. Logarithmic Additive Contrast and Associated Metrics in the LIP Framework	362
3. Logarithmic Multiplicative Contrast and Associated Metrics in the LIP Framework	385
4. Conclusion and Perspectives	401
Acknowledgments	402
Main Notations	403
References	404
Contents of Volumes 151–170	407
Index	415
