Preface

Y. Uchida, T. Watanabe, K. Shibata, and H. S. Hudson v

Welcoming Address

Y. Uchida vii

I Performance of the Satellite *Yohkoh* and Its Instruments

Performance of the Spacecraft

Y. Ogawara 3

The Initial Fifteen Months of Flare Observation with the *Yohkoh* Hard X-Ray Telescope (HXT)

T. Kosugi, T. Sakao, K. Makishima, T. Murakami, S. Masuda, M. Inada-Koide, K. Yaji, M. Sawa, and Y. Ogawara 5

The Performance of the *Yohkoh* Bragg Crystal Spectrometer

J. Lang 9

Solar Abundances Derived from Gamma-Ray Line Spectroscopy of the 1991 October 27 Flare

M. Yoshimori, J. Sato, K. Suga, T. Hiraoka, K. Morimoto, K. Kawabata, and K. Ohki 15

II X-Ray Bright Points, Emerging Flux Regions, and Active Regions

The Relationship of X-Ray Bright Points to the Photospheric Magnetic Fields

K. L. Harvey, N. Nitta, K. T. Strong, and S. Tsuneta 21

Diagnostics of Twisted Flux Emergence (NOAA AR7260)

K. D. Leka, L. van Driel-Gesztelyi, B. Anwar, R. C. Canfield, H. S. Hudson, T. R. Metcalf, D. L. Mickey, N. Nitta, and H. Kurokawa 25

Two Types of Interaction between Emerging Flux and Coronal Magnetic Field

K. Shibata, N. Nitta, R. Matsumoto, T. Tajima, T. Yokoyama, T. Hirayama, and H. Hudson 29

Active-Region Transient Brightenings

T. Shimizu 33

X-Ray Activity in Coronal Loops and Its Photospheric/Chromospheric Signatures

T. Sakurai, K. Shibata, K. Ichimoto, and M. Takata 37

Small-Scale Brightening Events Found with Mitaka H α Patrol System and Their Soft X-Ray Signatures from *Yohkoh* SXT

Y. Suematsu, T. Shimizu, and N. Tanaka 39

Microbursts Observed by the Nobeyama Radioheliograph

I. Pogodin and K. Shibasaki 43

Small Scale Activity Just before the Onset of Radio Burst Detected by the Nobeyama Radioheliograph	
<i>K. Shibasaki, S. Enome, H. Nakajima, M. Nishio, T. Takano, Y. Hanaoka, C. Torii, H. Sekiguchi, S. Kawashima, T. Bushimata, N. Shinohara, Y. Irimajiri, H. Koshiishi, and Y. Shiomi</i>	47
Yohkoh Observations of Weak Events within AR 7218	
<i>G. A. Linford, H. Hudson, and A. Sterling</i>	49
Electric Currents and Coronal Structures in NOAA Active Region 6952	
<i>T. R. Metcalf, R. C. Canfield, H. S. Hudson, D. L. Mickey, J.-P. Wülser, and S. Tsuneta</i>	51
Temperature Structure of Active Regions Deduced from the Helium-Like Sulphur Lines	
<i>T. Watanabe, H. Hara, T. Shimizu, E. Hiei, J. T. Mariska, R. D. Bentley, A. Fludra, J. Lang, K. J. H. Phillips, C. D. Pike, and B. J. I. Bromage</i>	55

III Flares

Transient Brightenings of Soft X-Ray Loops in Emerging Flux Regions	
<i>H. Kurokawa, G. Kawai, S. Tsuneta, and Y. Ogawara</i>	59
Time Development of the 1992 June 28 X-Class Flare	
<i>H. Nakajima, S. Enome, K. Shibasaki, M. Nishio, T. Takano, Y. Hanaoka, C. Torii, Y. Shiomi, H. Sekiguchi, T. Bushimata, S. Kawashima, N. Shinohara, Y. Irimajiri, and H. Koshiishi</i>	63
Evidence for Impulsive Soft-X-Ray Bursts during Flares	
<i>K. Strong, H. Hudson, and B. Dennis</i>	65
Time Variation of Hard X-Ray Image in the Early Phase of Solar Impulsive Bursts	
<i>T. Takakura, M. Inada, K. Makishima, S. Masuda, T. Kosugi, T. Sakao, T. Sakurai, and Y. Ogawara</i>	71
H α and X-Ray Signatures of Chromospheric Evaporation Observed during the Early Phase of the 15 November 1991 Flare	
<i>J.-P. Wülser, R. C. Canfield, L. W. Acton, J. L. Culhane, A. Phillips, A. Fludra, T. Sakao, S. Masuda, and T. Kosugi</i>	75
Some Compact Flares Take Place in the Intersection of Magnetic Loops	
<i>G. Ai, W. Li, T. Hirayama, and K. Ichimoto</i>	79
Compact Radiation Sources within Extended Flare Sites	
— A Study of Flares Imaged by the SXT in Full Frame Mode —	
<i>G. Slater</i>	81
Energy Release Topology in Solar Active Regions: Soft X-Ray Observation from Yohkoh	
<i>C.-C. Cheng and L. Acton</i>	83
The Relationship between the Soft X-Ray Blue Wing and the Hard X-Ray Burst	
<i>R. D. Bentley</i>	87
Particle Acceleration in the 15 November, 1991 Solar Flare Observed with HXT	
<i>T. Sakao, T. Kosugi, S. Masuda, K. Yaji, M. Inada-Koide, and K. Makishima</i>	91
The Flare of 16 December 1991	
<i>J. L. Culhane, A. Phillips, D. Pike, M. Inada, T. Kosugi, and T. Sakao</i>	95
Yohkoh HXT Observations of a Solar Flare on 16 December, 1991	
<i>M. Inada-Koide, K. Makishima, T. Kosugi, and T. Sakao</i>	99

Ionization Balance in an M-Class Solar Flare <i>T. Kato, K. Masai, K. Sakimoto, Y. Itikawa, and T. Watanabe</i>	105
An X9 Flare of Nov. 2, 1992 <i>S. Enome and Radioheliograph Group</i>	109
Flares in Active Region NOAA 7260 <i>N. Nitta, L. van Driel-Gesztelyi, K. D. Leka, T. Sakurai, K. Shibata, K. Ichimoto, R. C. Canfield, J.-P. Wülser, T. R. Metcalf, and D. L. Mickey</i>	111
Solar Flares as Ongoing Magnetic Reconnection <i>S. Tsuneta</i>	115
Morphological Evolution of the Post-Flare Loops of June 25-26, 1992 <i>B. Anwar, E. Hiei, H. S. Hudson, L. W. Acton, T. Metcalf, J. Lemen, and P. Martens</i>	121
HXT Observations of the 24 October, 1991, M9.8 Flare <i>S. Masuda, T. Kosugi, and T. Sakao</i>	123
A Resonance Line Ratios Method for Determining Flare Temperatures Using <i>Yohkoh</i> BCS Spectra <i>A. C. Sterling, G. A. Doschek, J. T. Mariska, E. Hiei, and T. Watanabe</i>	127
Iron K-Beta Line Emission in Solar Flares <i>K. J. H. Phillips, C. D. Pike, J. Lang, and T. Watanabe</i>	131
Theoretical Spectra of S XV <i>J. Dubau, M. Cornille, S. Jacquemot, and F. Bely-Dubau</i>	135
What Have We Learned from <i>Yohkoh</i> about Flares and What Should Be Done from Solar B <i>U. Feldman</i>	139
Non-Thermal Effects in Slow Solar Flares <i>H. S. Hudson, L. W. Acton, A. C. Sterling, S. Tsuneta, J. Fishman, C. Meegan, W. Paciesas, and R. Wilson</i>	143
Entropy and the Thermal/Nonthermal Flare Debate <i>J. C. Brown</i>	147
Nonthermal Electron Trapping in a Magnetic Loop in a Simple Impulsive Flare on Aug. 12, 1992 <i>T. Takano</i>	151
The X Flare of 15 November, 1991: Preflare Flux Emergence, Heating and Filament Eruption <i>R. C. Canfield, K. A. Blais, A. N. McClymont, T. R. Metcalf, K. P. Reardon, J.-P. Wülser, L. W. Acton, H. Kurokawa, and T. Hirayama</i>	153
Flare Energy Release in the Diffusion Region <i>T. Hirayama</i>	157
Quadrupole Magnetic Field in Arcade-Type Flares — A Model of “Dark Filament in Neutral Sheet” and “Interchange Collapse–Reconnection” Model for Arcade-Type Flares — <i>Y. Uchida, A. McAllister, J. Khan, T. Sakurai, and K. Jockers</i>	161
Computer Studies on the Basic Physics of the Fast Reconnection Mechanism <i>M. Ugai</i>	165
Formation of Fast Magnetosonic Shock Waves during Collision of Two Current Loops in Solar Flares <i>S. Koide and J. Sakai</i>	171

IV Coronal Structure and Solar Wind

Coronal Eruptions Observed by <i>Yohkoh</i>	
<i>J. A. Klimchuk, L. W. Acton, K. L. Harvey, H. S. Hudson, K. L. Kluge,</i> <i>D. G. Sime, K. T. Strong, and Ta. Watanabe</i>	181
Coalignment of the Radioheliograph and the <i>Yohkoh</i> Images	
<i>M. Nishio, H. Nakajima, N. Nitta, S. Enome, K. Shibasaki, T. Takano,</i> <i>and Y. Hanaoka</i>	187
Coronal Magnetic Fields Parallel to Magnetic Polarity Inversion Lines	
<i>A. H. McAllister, Y. Uchida, J. I. Khan, and K. Shibata</i>	189
A Prominence Eruption Followed by a Coronal Arcade Formation on July 30-31, 1992	
<i>Y. Hanaoka, H. Kurokawa, S. Enome, H. Nakajima, K. Shibasaki, M. Nishio,</i> <i>T. Takano, C. Torii, H. Sekiguchi, S. Kawashima, T. Bushimata, N. Shinohara,</i> <i>Y. Irimajiri, H. Koshiishi, Y. Shiomi, Y. Nakai, Y. Funakoshi, R. Kitai,</i> <i>K. Ishiura, and G. Kimura</i>	193
Coronal Eruptive Events on April 4, and May 4, 1992	
<i>D. G. Sime, E. Hiei, and A. J. Hundhausen</i>	197
<i>Yohkoh</i> Soft X-Ray Observations Related to a Prominence Eruption and Arcade Flare on 7 May 1992	
<i>J. I. Khan, Y. Uchida, A. H. McAllister, and Ta. Watanabe</i>	201
Reformation of a Coronal Helmet Streamer by Magnetic Reconnection after a Coronal Mass Ejection	
<i>E. Hiei, A. J. Hundhausen, and D. G. Sime</i>	205
Interplanetary Consequences of Transient Coronal Events	
<i>Ta. Watanabe, M. Kojima, Y. Kozuka, S. Tsuneta, J. R. Lemen, H. Hudson,</i> <i>J. A. Joselyn, and J. A. Klimchuk</i>	207
Rotational Reversing Model and Triple Dipole Model as Substantiated by <i>Yohkoh</i> SXT Data	
<i>T. Saito, Y. Kozuka, S. Tsuneta, and S. Minami</i>	211
Temperature of Coronal Holes Measured by <i>Yohkoh</i> SXT	
<i>H. Hara, S. Tsuneta, L. W. Acton, J. R. Lemen, and Y. Ogawara</i>	217

V Overview and Future Prospect

Overview and Future Prospects	
<i>R. Rosner</i>	225
The Achievements of <i>Yohkoh</i> and The Next Solar Mission	
<i>T. Sakurai</i>	231

Poster Papers

Non-Uniform Spatial Distribution of X-Ray Bright Points <i>M. Takami, S. Tsuneta, Te. Takahashi, K. T. Strong, G. L. Slater, and K. L. Harvey</i>	237
A Loop-Loop Interaction Observed with <i>Yohkoh</i> SXT <i>M. Akioka, L. W. Acton, and H. S. Hudson</i>	241
A Flare-Productive Active Region NOAA 7270 <i>K. Yaji</i>	247
Positron Annihilation Line from the 15 November 1991 Flare <i>K. Kawabata, M. Yoshimori, K. Suga, K. Morimoto, T. Hiraoka, J. Sato, and K. Ohki</i>	251
Temperature and Density Structure of a Solar Flare Observed by the <i>Yohkoh</i> SXT and HXT <i>J. Mctiernan, S. Kane, J. Loran, J. Lemen, L. Acton, H. Hara, S. Tsuneta, and T. Kosugi</i>	255
Optical and SXT Observations of the X9 Flare of Nov. 2, 1992 <i>K. Ichimoto, T. Sakurai, Y. Nishino, M. Noguchi, K. Shinoda, A. Yamaguchi, K. Kumagai, T. Hirayama, S. Tsuneta, and L. Acton</i>	259
Transient Coronal Phenomena Revealed in Soft X-Rays <i>Y. Ishidoh and Ta. Watanabe</i>	261
Soft X-Ray Line Profiles Predicted by the Jet Model of Chromospheric Evaporation <i>P. L. Bornmann and J. R. Lemen</i>	265
Very Impulsive Flares Observed with <i>Yohkoh</i> <i>U. Feldman, E. Hiei, K. J. H. Phillips, J. Lang, and C. M. Brown</i>	269
<i>Yohkoh</i> X-Ray Image Interpretation with Overlays of H α Neutral Lines <i>P. S. McIntosh</i>	271
The Time Evolution of X-Ray Structure during Filament Eruption <i>R. Kano</i>	273
Observation of a Large Eruptive H α Prominence with Soft X-Rays on 30-31 July 1992 <i>H. Miyazaki, M. Miyasita, A. Yamaguchi, K. Ichimoto, K. Kumagai, T. Hirayama, and S. Tsuneta</i>	277
Characteristics of Plasma Temperature Variation during the Collision of Two Current Loops <i>J. Zhao, B. Chargeishvili, and J. Sakai</i>	283
Prominence Eruption in NOAA7125 on April 6, 1992 <i>R. Kitai, G. Kawai, B. Anwar, H. Kurokawa, Y. Funakoshi, Y. Nakai, and S. Tsuneta</i>	287
X-Ray Active Nests <i>Te. Takahashi, S. Tsuneta, K. Hayashi, and H. Yoshimura</i>	293
Coronal Disturbances Observed by <i>Yohkoh</i> and Their Effects on the Solar Terrestrial Environment <i>S. Watari and T. Isobe</i>	297
Large-Scale Coronal and Solar-Wind Structures <i>Y. Kozuka, Ta. Watanabe, M. Kojima, M. Ohyama, S. Tsuneta, T. Saito, and S. Watari</i>	301

Structure of The Soft X-Ray Corona and Its Effect to the Earth Quadrupole Type and Sea Anemone Type <i>Ta. Takahashi, T. Saito, K. Shibata, Y. Kozuka, S. Minami, and Y. Mori</i>	305
The Electrostatic Wave Instability as a Heating Mechanism in the Hot Phase of Solar Flares and Coronal Transients <i>S. J. Li</i>	313
A Model of X-Ray Jets and Loop Brightenings Associated with Emerging Flux <i>T. Yokoyama and K. Shibata</i>	317
Solar Prominence Formation due to Current Loop Coalescence <i>J. Sakai and B. Chargeishvili</i>	321
A Simple Circuit Model for the December 2 1991 Flare <i>P. C. H. Martens and S. Tsuneta</i>	327
Solar Image Processing and Feature Recognition <i>P. L. Bornmann, C. Kohl, T. Kohl, and F. Glazer</i>	329
Non-Thermal Line Broadenings as Signature of Magnetic Reconnection in Solar Flares <i>E. Antonucci, M. A. Doderò, and B. V. Somov</i>	333
List of Participants	337
Author Index	339
