Introduction: The Road to High Economic Growth, <i>Shigeru Nakayama</i>	1
Part I: End of Prohibitions on Research into Nuclear, Aviation and Military Technology	
1 Lifting the Bans on Weapons Production and Rebuilding the Aircraft Industry, <i>Hitoshi Yoshioka</i>	47
2 Re-establishing Civil Aviation, <i>Hitoshi Yoshioka</i>	61
3 Forming a Nuclear Regime and Introducing Commercial Reactors, <i>Hitoshi Yoshioka</i>	80
4 Nuclear Power Research and the Scientists' Role, <i>Hitoshi Yoshioka</i>	104
5 The Bikini Incident and Radiation Surveys, <i>Yukuo Sasamoto</i>	125
6 Advances in Space Research, <i>Hitoshi Yoshioka</i>	144
7 The Beginning of Organized Science Reporting, <i>Yukio Wakamatsu</i>	161
Part II: Establishment of a Government and Business- Centered R&D System	
8 Establishing a Science and Technology Administrative System, <i>Hiroaki Tanaka</i>	177
9 Strengthening Government Research Institutes, <i>Shūichi Tsukahara</i>	198
10 Importing Technology, <i>Katsuhiko Arai</i>	215
11 Foreign Technology Transfers and Corporate R&D, <i>Tetsurō Nakaoka</i>	235
12 Developments in Corporate Engineering and Technical Training, <i>Katsuhiko Arai</i>	252
Part III: New Attitudes among Scientists and Engineers	
13 Overseas Study Leave and Participation in International Conferences, <i>Shigeru Nakayama</i>	271
14 The First Japanese Antarctic Research Expedition, <i>Toshifumi Yatsumimi</i>	281
15 Postwar Reforms to Higher Education: The New Graduate School Standard, <i>Takashi Hata</i>	294
16 The Development of Molecular Biology in Japan, <i>Masayuki Ōbayashi</i>	321
17 The Scientist Led Peace Movement, <i>Shigeru Nakayama</i>	334
18 Technology Studies, Technological Innovation and State Monopoly Capitalism, <i>Kunio Gotō</i>	345

**Part IV: Development of Key Industries and the
Modernization of Manufacturing**

19 Heavy and Chemical Industries and Coastal Industrial Zones, <i>Toru Takamatsu</i>	361
20 The Energy Revolution and Changing Energy Policies, <i>Kunio Gotō</i>	374
21 The Energy Revolution, <i>Munehiro Miwa</i>	391
22 The Reconstruction of the Electric Power Industry, <i>Takuji Okamoto</i>	414
23 The ‘Spin-off’ from the Navy: The Case of Shipbuilding and Marine Engineering in the Postwar Period, <i>Miwao Matsumoto</i>	454
24 Rationalization and Technical Innovation in the Steel Industry, <i>Mitsuru Tate</i>	468
25 Railway Electrification, <i>Tōru Koyama</i>	487
26 Agriculture Develops a Pesticide-Dependency, <i>Takako Ieda</i>	503
27 The Mechanization of Rice Cultivation, <i>Hisashi Horio</i>	525
28 Penicillin Production and the Reconstruction of the Pharmaceutical Industry, <i>Hazime Mizoguchi</i>	541

**Part V: Changing Lifestyles through Science and
Technology**

29 A New Start for the Automotive Industry, <i>Tsutomu Demizu</i>	555
30 The Rise of the Motorcycle Industry, <i>Tsutomu Demizu</i>	574
31 Evolution in the Precision Machinery Industries: From Domestic Use to Export, <i>Shūichi Tsukahara</i>	585
32 The Diffusion of Household Electrical Appliances, <i>Yayoi Yoshioka</i>	599
33 The Advent of the Television Age, <i>Hitoshi Yoshioka</i>	612
34 The Development of Transistor Technology, <i>Hitoshi Yoshioka</i>	630
35 The Introduction of American Style Food Culture, <i>Yayoi Yoshioka</i>	647
36 The First Innovations in Medical Technology after WWII, <i>Shigenobu Kambayashi</i>	664
Consolidated Bibliography	686
Index	729
