Introduction: High Economic Growth and the Road to Becoming a Power in the Fields of Science and Technology	1
Part I: Construction of R & D Infrastructure	
1 The Central Laboratory Boom and the Rise of Corporate R&D <i>Shigeru Nakayama</i>	67
2 The Expansion of Government Research <i>Shūichi Tsukahara</i>	78
3 MITI's National Programme of Large Scale R&D Projects <i>Shūichi Tsukahara and Chikayoshi Kamatani</i>	94
4 The Creation of Tsukuba Science City <i>Shūichi Tsukahara</i>	108
5 The Expansion of Science and Engineering Education at Universities and the Role of Manpower Planning <i>Katsuhiro Arai</i>	124
Part II: Enrichment and Reorganization of the Academic Research System	
6 The Restructuring of Academic Research Administration <i>Shigeru Nakayama</i>	145
7 US–Japan Scientific Cooperation: Japan's Changing Role in the International Scientific Community <i>Shigeru Nakayama</i>	157
8 Future Plans for Nuclear Physics Research <i>Hitoshi Yoshioka</i>	167
9 The Rise of Nuclear Fusion Research <i>Hitoshi Yoshioka</i>	191
10 Establishment of Computer Centers and Computer Engineering Departments in Universities <i>Shūichi Tsukahara</i>	208
Part III: The Emergence of New Industries	
11 The Development and Utilization of Nuclear Reactors <i>Hitoshi Yoshioka</i>	223
12 The Establishment of Space Development Organizations <i>Hitoshi Yoshioka</i>	243
13 Development of the Petrochemical Industry <i>Shūichi Tsukahara</i>	257
14 The Birth of Japan's Computer Industry <i>Kiyoshi Nakamura</i>	271
15 The Motorization of Japan <i>Tsutomu Demizu</i>	298
16 The Industrialization of the Food Processing System <i>Koyu Furusawa</i>	311

Part IV: Changes in Transportation and the Urban Environment

17 The National Land Comprehensive Development Act <i>Kunio Gotō</i>	333
18 Construction of a Nationwide Network of Expressways <i>Tōru Koyama</i>	347
19 Construction of the Rapid Transit Railway Network <i>Tōru Koyama</i>	362
20 The Shinkansen (Bullet Train): A New Era in Railway Technology <i>Tōru Koyama</i>	379
21 The Rapid Growth of Civil Aviation <i>Hitoshi Yoshioka</i>	390
22 The Growth of a Nationwide Telecommunications Network <i>Minoru Terasaki</i>	410
23 Evolution of the Housing Industry <i>Shōichi Honda</i>	419
24 Transformation of Cities <i>Takaji Mizushima</i>	430
25 Anti-pollution Measures <i>Zenji Suzuki</i>	441

Part V: Cultural Change and the Growth in Technology

26 Military-Academic Cooperation during the Vietnam War <i>Hitoshi Yoshioka</i>	455
27 Dr. Takemi: President of the Japan Medical Association <i>Shirō Sakaguchi</i>	471
28 Drug Induced Sufferings <i>Shirō Sakaguchi</i>	485
29 Science in Popular Culture <i>Kenji Kōsaka</i> and <i>Ryōichirō Motohama</i>	504
30 The Effects of Television on People's Consciousness <i>Ryōichirō Motohama</i> and <i>Kenji Kōsaka</i>	516
31 The 'Buy Japanese' Campaign and Progress in Japanese Technology <i>Ryōichirō Motohama</i> and <i>Kenji Kōsaka</i>	529
32 The Growth of Science Journalism <i>Yukio Wakamatsu</i>	544
Consolidated Bibliography	559
