Introduction and Summary	1
Deuterium depth profiles in tungsten materials irradiated with low-energy D ions	3
<i>V.Kh. Alimov, J. Roth, S. Lindig</i>	
Results of the NERD installation upgrading.	11
<i>S.V. Artemov, Ya.S. Abdullaeva, A.A. Karakhodzhaev, G.A. Radyuk, V.P. Yakushev</i>	
Studies of hydrogen retention and release in fusion materials	17
<i>R.A. Causey</i>	
Hydrogen retention in mixed materials.	27
<i>R.P. Doerner and the PISCES Team</i>	
Carbon for use in fusion reactors	33
<i>A.A. Haasz, J.W. Davis</i>	
Tungsten for use in fusion reactors.....	43
<i>A.A. Haasz, J.W. Davis</i>	
Deuterium trapping and release in carbon materials.	55
<i>A. Pisarev, A. Rusinov, N. Trifonov, Yu. Gasparian</i>	
Review of erosion/deposition and retention of hydrogen isotopes (H, D, T) at divertor area of JT-60U	73
<i>T. Tanabe, K. Masaki, Y. Gotoh, K. Sugiyama, Y. Hirohata, T. Shibahara, Y. Oya, T. Hayashi, T. Arai, N. Miya</i>
