

Cells and Heredity

eEdition

Standards and Benchmarks	x
Introducing Life Science	xii
Unifying Principles of Life Science	xiii
The Nature of Science	xxii
The Nature of Technology	xxvi
Using McDougal Littell Science	xxviii

Unit Features

FRONTIERS IN SCIENCE <i>Genes That Map the Body</i>	2
TIMELINES IN SCIENCE <i>The Story of Genetics</i>	128

1 The Cell 6

the BIG idea

All living things are made up of cells.

11 The cell is the basic unit of living things.	9
CHAPTER INVESTIGATION <i>Using a Microscope</i>	16
12 Microscopes allow us to see inside the cell.	18
MATH IN SCIENCE <i>Using Scientific Notation</i>	25
13 Different cells perform various functions.	26
THINK SCIENCE <i>Cells and Spacesuits</i>	33

2 How Cells Function 38

the BIG idea

All cells need energy and materials for life processes.

21 Chemical reactions take place inside cells.	41
SCIENCE ON THE JOB <i>Natural Dyes and Cells</i>	46
22 Cells capture and release energy.	47
MATH IN SCIENCE <i>Interpreting Graphs</i>	55
23 Materials move across the cell's membranes.	56
CHAPTER INVESTIGATION <i>Diffusion</i>	64

3 Cell Division 70

the BIG idea

Organisms grow, reproduce, and maintain themselves through cell division.

- 3.1 Cell division occurs in all organisms. 73
CONNECTING SCIENCES *Chemical Dyes Show Nerve Growth* 79
- 3.2 Cell division is part of the cell cycle. 80
CHAPTER INVESTIGATION *Stages of the Cell Cycle* 86
- 3.3 Both sexual and asexual reproduction involve cell division. 88
MATH IN SCIENCE *Using Exponents* 93

4 Patterns of Heredity 98

the BIG idea

In sexual reproduction, genes are passed from parents to offspring in predictable patterns.

- 4.1 Living things inherit traits in patterns. 101
CHAPTER INVESTIGATION *Offspring Models* 108
- 4.2 Patterns of heredity can be predicted. 110
MATH IN SCIENCE *Using Punnett Squares* 116
- 4.3 Meiosis is a special form of cell division. 117
THINK SCIENCE *Are Traits Linked?* 123

5 DNA and Modern Genetics 132

the BIG idea

DNA is a set of instructions for making cell parts.

- 5.1 DNA and RNA are required to make proteins. 135
CHAPTER INVESTIGATION *Extract and Observe DNA* 142
- 5.2 Changes in DNA can produce variation. 144
MATH IN SCIENCE *Finding Percent of a Whole* 149
- 5.3 Modern genetics uses DNA technology. 150
EXTREME SCIENCE *Modern Genetics Meets the Dodo and the Solitaire* 155

Handbooks and Resources R1

Scientific Thinking Handbook	R2	Appendix	R52
Lab Handbook	R10	Glossary	R59
Math Handbook	R36	Index	R67
Note-Taking Handbook	R45	Acknowledgments	R74

Features

MATH IN SCIENCE	
<i>Using Scientific Notation</i>	25
<i>Interpreting Graphs</i>	55
<i>Using Exponents</i>	93
<i>Using Punnett Squares</i>	116
<i>Finding Percent of a Whole</i>	149
THINK SCIENCE	
<i>Cells and Spacesuits</i>	33
<i>Are Traits Linked?</i>	123
CONNECTING SCIENCES	
<i>Chemical Dyes Show Nerve Growth</i>	79
SCIENCE ON THE JOB	
<i>Natural Dyes and Cells</i>	46
EXTREME SCIENCE	
<i>Modern Genetics Meets the Dodo and the Solitaire</i>	155
FRONTIERS IN SCIENCE	
<i>Genes That Map the Body</i>	2
TIMELINES IN SCIENCE	
<i>The Story of Genetics</i>	128

Visual Highlights

Parts of a Eukaryotic Cell	22
Levels of Organization	30
Photosynthesis	49
Cellular Respiration	51
Cell Division	83
Punnett Square and Probability	113
Meiosis	121
Translation	140

Internet Resources @ ClassZone.com

SIMULATIONS		
<i>Virtual Cell Tour</i>	7	<i>DNA</i> 136
<i>Cells through Different Microscopes</i>	19	<i>Mutations</i> 145
<i>Stages of Cell Division</i>	71	<i>DNA Technology</i> 153
<i>Mendel's Experiment</i>	99	
<i>Punnett Squares</i>	111	NSTA SCILINKS
VISUALIZATIONS		<i>Cell Theory</i> 7
<i>Photosynthesis</i>	39	<i>Photosynthesis</i> 39
<i>Active Transport</i>	60	<i>Cellular Mitosis</i> 71
<i>Mitosis</i>	82	<i>Heredity</i> 99
<i>Protein Synthesis</i>	141	<i>Genetics</i> 133
RESOURCE CENTERS		CAREER CENTER
<i>Cell Structures</i>	21	<i>Molecular Biology</i> 5
<i>Unicellular Organisms</i>	27	MATH TUTORIALS
<i>Macromolecules</i>	42	<i>Scientific Notation</i> 25
<i>Diffusion</i>	57	<i>Interpreting Line Graphs</i> 55
<i>Nerve Regeneration</i>	79	<i>Exponents</i> 93
<i>Cell Cycle</i>	80	<i>Probability</i> 116
<i>Asexual Reproduction</i>	90	<i>The Percent Equation</i> 149
<i>Sexual Reproduction</i>	102	CONTENT REVIEW
<i>Meiosis</i>	120	8, 34, 40, 66, 72, 94, 100, 124, 134, 156
<i>Genetics Research</i>	131	TEST PRACTICE
<i>Human Genome Project</i>	133	37, 69, 97, 127, 159

INVESTIGATIONS AND ACTIVITIES

EXPLORE THE BIG IDEA

Chapter Opening Inquiries

- | | |
|--|-----|
| 1. Seeing and Understanding. Bits and Pieces.
Internet Activity: Cells | 7 |
| 2. Leaves Underwater. Just a Spoonful of Sugar.
Internet Activity: Photosynthesis | 39 |
| 3. Dividing to Multiply. Division Math. Internet Activity: Cell Division | 71 |
| 4. How Are Traits Distributed? Combinations.
Internet Activity: Mendel's Experiment | 99 |
| 5. What Is the Pattern? What Vegetable Is That?
Internet Activity: Human Genome | 133 |

CHAPTER INVESTIGATION

Full-Period Labs

- | | |
|-----------------------------|-----|
| 1. Using a Microscope | 16 |
| 2. Diffusion | 64 |
| 3. Stages of the Cell Cycle | 86 |
| 4. Offspring Models | 108 |
| 5. Extract and Observe DNA | 142 |

EXPLORE

Introductory Inquiry Activities

Activity and Life	9
Specialization	26
Food Molecules	41
Diffusion	56
Cell Division	73
Probability	110
Meiosis	117
Templates	135
Codes	144

INVESTIGATE

Skill Labs

Plant and Animal Cells	<i>Observing</i>	21
Cell Models	<i>Making models</i>	31
Oil and Water	<i>Observing</i>	44
Fermentation	<i>Observing</i>	53
Cells	<i>Making models</i>	62
Chromosomes	<i>Making models</i>	76
Cell Division	<i>Making models</i>	84
Asexual Reproduction	<i>Drawing conclusions</i>	91
Multiple Probabilities	<i>Analyzing data</i>	114
Fertilization	Design Your Own	119
Neutral Mutations	<i>Making models</i>	146
