<b>1. An Introduction to Neutron Scattering</b>	<b>1</b>
<i>David L. Price and Felix Fernandez-Alonso</i>	
<b>1.1 Fundamentals</b>	<b>2</b>
1.1.1 Why Are Neutrons so Unique?	2
1.1.2 Thermal Neutrons for Condensed Matter Research	5
1.1.3 Conservation Laws	11
1.1.4 The Structure of Materials	11
1.1.5 Adding Motion: Dynamics and Spectroscopy	16
<b>1.2 Scattering Foundations</b>	<b>22</b>
1.2.1 The Master Formula and Fermi's Golden Rule	22
1.2.2 Nuclear Scattering	25
1.2.3 The Double Differential Cross Section in the Time Domain	26
1.2.4 Farewell to Nuclear Physics	27
1.2.5 Coherent and Incoherent Scattering	28
1.2.6 Scattering Functions	30
<b>1.3 Canonical Solids</b>	<b>31</b>
1.3.1 Normal Modes of Vibration	31
1.3.2 Scattering Under the Harmonic Approximation	32
1.3.3 Purely Elastic Events	33
1.3.4 Inelastic (One-Phonon) Scattering	35
1.3.5 Multiphonon Scattering	39
1.3.6 Beyond Harmonic Vibrations	41
<b>1.4 Beyond Canonical Solids</b>	<b>42</b>
1.4.1 Space-Time (Van Hove) Correlation Functions	42
1.4.2 Pair Distribution Functions	43
1.4.3 Properties of the Dynamic Structure Factor	47
1.4.4 From Order to Disorder: Diffuse Scattering	58
1.4.5 Stochastic Diffusion	61
1.4.6 Beyond Atoms and Molecules: Large-Scale Structures	75
<b>1.5 Magnetic Structure and Polarized Neutrons</b>	<b>82</b>
1.5.1 Basic Principles	82
1.5.2 Polarized Neutrons	88
1.5.3 Magnetic Bragg Scattering	95
1.5.4 Diffuse Scattering from Magnetic Disorder	97
1.5.5 Large-Scale Magnetic Structures	101

<b>1.6 Spin Dynamics</b>	106
1.6.1 Generalized Susceptibility	106
1.6.2 Spin Waves	108
1.6.3 Crystal Fields and Magnetic Clusters	111
1.6.4 Spin Fluctuations	114
1.6.5 Interband Transitions	115
1.6.6 Critical Scattering	117
<b>1.7 Nuclear Spin: Order and Disorder</b>	120
1.7.1 A Closer Look at Nuclear Spins	121
1.7.2 Scattering Cross Sections	121
1.7.3 Uncorrelated and Correlated Spin Ensembles	123
<b>1.8 Outlook</b>	125
<b>References</b>	127
<b>2. Neutron Sources</b>	137
<i>Francisco J. Bermejo and Fernando Sordo</i>	
<b>2.1 Scope</b>	138
<b>2.2 Useful Neutron Production Reactions</b>	140
2.2.1 Fission	141
2.2.2 Direct and Stripping Reactions	142
2.2.3 Bremsstrahlung	144
2.2.4 Spallation Reactions	146
<b>2.3 Neutron Slowing Down and Moderators</b>	153
2.3.1 Moderators	158
<b>2.4 Basic Building Blocks of Accelerators to Drive Neutron Sources</b>	166
2.4.1 Beam Injectors	167
2.4.2 Targets	178
<b>2.5 Accelerator-Driven Sources: Some Predecessors</b>	197
<b>2.6 State-of-the-Art Accelerator Drivers for Neutron Sources</b>	199
2.6.1 Last-Generation Megawatt-Range Sources	199
2.6.2 Medium-Power (100 kW) Sources	205
2.6.3 Compact, Accelerator-Driven Sources	209
<b>2.7 Research Reactors</b>	212
2.7.1 Core Designs	213
2.7.2 Reactor Vessel	217
<b>2.8 Future Prospects</b>	219
2.8.1 Accelerators	219
2.8.2 Hybrid Systems	225
2.8.3 Reactors	226
<b>2.9 Nonneutron-Scattering Uses of Neutron Sources</b>	227
2.9.1 Isotope Production, In-Vessel Irradiation, $\gamma$ -Radiation, and Neutron Activation Analysis	228
2.9.2 Nuclear Physics and Engineering: Astroparticle Physics, Nuclear Structure and Reactions, and Transmutation of Nuclear Waste	228
2.9.3 Hadron Physics: Neutrino-Related Phenomena	229

2.9.4 Fundamental Physics: Foundations of Quantum Mechanics, Effects of Gravity on Isolated Particles, Search for Dark Matter Using Ultracold Neutrons, Tests, and Validations of the Standard Model of Particle Physics	230
2.9.5 Use of Muon Beams for Condensed Matter and Fusion Research	231
<b>Acknowledgments</b>	231
<b>Appendix A Some Basic Relationships</b>	232
<b>Appendix B The Transport Equation for Neutrons</b>	234
<b>References</b>	237
<b>3. Experimental Techniques</b>	245
<i>Masatoshi Arai</i>	
<b>3.1 Introduction</b>	246
<b>3.2 Scattering Measurements</b>	247
3.2.1 Cross Section	247
3.2.2 Integrated Intensity and the Lorentz Factor	249
<b>3.3 Useful Neutrons for Condensed Matter Science</b>	254
3.3.1 Neutron Flux from Moderators	254
3.3.2 Pulse Peak Structure	255
3.3.3 Pulse Peak Width	257
3.3.4 Choice of Parameters in Spallation Sources	257
3.3.5 High-Energy Neutron Background	259
<b>3.4 Diffraction Techniques</b>	261
3.4.1 Powder Diffraction	262
3.4.2 Single-Crystal Diffractometers	271
<b>3.5 Inelastic Scattering Techniques</b>	275
3.5.1 Triple-Axis Spectrometer	275
3.5.2 Chopper Instruments	277
3.5.3 Inverted-Geometry Instrument	288
<b>3.6 Instruments for Semi-Macroscopic Structures</b>	293
3.6.1 Small-Angle Neutron Scattering Instruments	293
3.6.2 Neutron Spin-Echo Spectrometers	296
<b>3.7 Neutron Detectors</b>	300
3.7.1 $^3\text{He}$ -Gas Detectors	301
3.7.2 Scintillation Detectors	301
<b>3.8 Beam Transport and Tailoring</b>	305
3.8.1 Neutron Optics	305
3.8.2 Choppers	313
<b>References</b>	318
<b>4. Structure of Complex Materials</b>	321
<i>Silvia C. Capelli</i>	
<b>4.1 Introduction</b>	321
<b>4.2 Useful Properties of Neutrons</b>	324

4.2.1 Neutron Scattering Length	324
4.2.2 A Particle with a Mass	324
<b>4.3 What can be Learnt from Neutron Diffraction Experiments?</b>	326
4.3.1 Hydrogen Bonding	326
4.3.2 Proton Migration	329
4.3.3 Transition Metal Hydrides	332
4.3.4 Porous Materials	333
4.3.5 Diffuse Scattering	335
<b>4.4 Outlook</b>	339
4.4.1 Neutron Sources	339
4.4.2 Neutron Optics	340
4.4.3 Detectors	341
4.4.4 Samples and Sample Environment	342
4.4.5 Software	347
<b>4.5 Conclusions</b>	348
<b>References</b>	349
<b>5. Large-Scale Structures</b>	353
<i>Jeffrey Penfold and Ian M. Tucker</i>	
<b>5.1 Introduction</b>	353
<b>5.2 Experimental Details</b>	356
5.2.1 Fundamentals of Neutron Reflectivity	356
5.2.2 Fundamentals of Small-Angle Neutron Scattering	358
5.2.3 Experimental Details for Neutron Reflection	361
5.2.4 Experimental Details for SANS	363
<b>5.3 Thin Films, Interfaces, and Solutions</b>	365
5.3.1 Adsorption at the Air–Solution Interface	365
5.3.2 Adsorption at the Liquid–Solid Interface	374
5.3.3 Structure of Biological Membranes	378
5.3.4 Micelles	382
5.3.5 Lamellar Phases and Vesicles	385
5.3.6 Colloidal Particles	392
5.3.7 Polymers in Solution, Melt, and Thin Films	394
5.3.8 Proteins and Biomacromolecules in Solution and at Interfaces	404
<b>5.4 Summary and Future Prospects</b>	409
<b>References</b>	409
<b>6. Dynamics of Atoms and Molecules</b>	415
<i>Mark R. Johnson and Gordon J. Kearley</i>	
<b>6.1 Introduction</b>	416
<b>6.2 Brief Review of Theoretical Concepts</b>	418
<b>6.3 Modeling</b>	419
6.3.1 Mapping Potential Energy Surfaces	419
6.3.2 Molecular Dynamics Simulation	420
6.3.3 Empirical and <i>Ab Initio</i> Energy Calculation	420

<b>6.4 Instrumentation</b>	422
6.4.1 Three-Axis Spectrometers	422
6.4.2 Time of Flight	422
6.4.3 Neutron Compton Scattering Spectrometers	423
6.4.4 Molecular Spectrometers	424
6.4.5 Backscattering Spectrometers	425
6.4.6 Neutron Spin-echo Instruments	426
6.4.7 The Measured Neutron-Scattering Signal	427
<b>6.5 Oscillatory Motion, Incoherent Scattering</b>	427
6.5.1 Molecular Vibrations of Benzene	429
6.5.2 Hydrogen-Bonded Systems	430
6.5.3 Complex Hydrides	431
6.5.4 Polymers	433
<b>6.6 Oscillatory Motion, Coherent Scattering</b>	434
6.6.1 Classic Phonons and Soft Modes in SrTiO <sub>3</sub>	435
6.6.2 Negative Thermal Expansion	435
6.6.3 Nanostructured Materials	438
6.6.4 Oxygen-Ion Conductors—Brownmillerites	439
6.6.5 Thermoelectrics—Skutterudites	441
6.6.6 Pnictides	442
6.6.7 Strontium Gallium Oxides	443
6.6.8 Deoxyribonucleic acid	445
<b>6.7 Tunneling</b>	446
6.7.1 Rotational Tunneling	446
6.7.2 Translational Tunneling	453
<b>6.8 Stochastic Relaxation/Dynamics</b>	453
6.8.1 Complex Diffusion	455
6.8.2 Ligand Water Rotation	456
6.8.3 Coherent QENS, Rotation	456
6.8.4 Dynamical Transitions from Elastic Scans	457
6.8.5 Diffusion of Coherent Scatterer CO <sub>2</sub>	459
6.8.6 Water and Complex Diffusion	460
6.8.7 Ionic Liquids	463
<b>6.9 Conclusion and Perspectives</b>	464
<b>References</b>	466
<b>Appendix: Neutron Scattering Lengths and Cross Sections</b>	471
<i>Javier Dawidowski, José R. Granada, Javier R. Santisteban, Florencia Cantarsi, and Luis A. Rodríguez Palomino</i>	
<b>A.1 Introduction</b>	471
<b>A.2 Theoretical Background</b>	472
A.2.1 Scattering Length	472
A.2.2 Spin-Dependent Scattering Lengths	476
A.2.3 Neutron–Atom Interactions	477
<b>A.3 Methods of Measurement of Scattering Lengths</b>	482
A.3.1 Transmission	482
A.3.2 Bragg Diffraction	484

A.3.3	Dynamical Diffraction	486
A.3.4	Prism Refraction	488
A.3.5	Christiansen Filter	489
A.3.6	Neutron Gravity Refractometer	490
A.3.7	Neutron Interferometry	491
A.3.8	Small-Angle Scattering	492
A.3.9	Total Reflection	493
A.3.10	Pseudomagnetic Method	493
A.3.11	High-Energy Experiments	494
A.4	Tables of Neutron Scattering Lengths and Cross Sections	495
	References	527
	Index	529
