

## Table of Contents

Preface .....	xiii
Conference photograph .....	xv
List of Participants .....	xviii

### INTRODUCTION: SESSION for Einar Tandberg-Hanssen

Portrait of Einar Tandberg-Hanssen.....	3
Einar Tandberg-Hanssen .....	4
<i>B. Schmieder, J.-C. Pecker, A. Gary, S. T. Wu, R. Moore &amp; E. Biesmann</i>	

### SESSION I-1.1 Prominence fine structure, dynamics and seismology

Solar Prominence Fine Structure and Dynamics.....	15
<i>T. Berger</i>	
Prominence Seismology .....	30
<i>J. L. Ballester</i>	
Formation and evolution of an active region filament.....	40
<i>C. Kuckein, R. Centeno &amp; V. M. Pilet</i>	
The formation and disappearance of filament barbs observed by SDO.....	44
<i>L. Li &amp; J. Zhang</i>	
The damping of transverse oscillations of prominence threads: a comparative study	48
<i>R. Soler, R. Oliver &amp; J. L. Ballester</i>	
Non-LTE Modeling and Observations of Oscillating Prominences.....	52
<i>M. Zapiór, P. Heinzel, R. Oliver, J. L. Ballester &amp; P. Kotrč</i>	

### SESSION I -1.2 Prominence Plasma

Modelling of quiescent prominence fine structures .....	59
<i>S. Gunár</i>	
On the nature of the prominence - corona transition region .....	69
<i>S. Parenti &amp; J.-C. Vial</i>	
Plasma properties in eruptive prominences .....	79
<i>N. Labrosse</i>	
Determination of Temperature in Solar Prominences/Filaments Using FISS Observations.....	85
<i>J. Chae, H. Park &amp; D. Song</i>	
Rayleigh–Taylor instability in partially ionized prominence plasma .....	90
<i>E. Khomenko, A. Díaz, A. de Vicente, M. Collados &amp; M. Luna</i>	

Determination of Prominence Plasma $\beta$ from the Dynamics of Rising Plumes . . . . .	94
<i>A. Hillier, R. Hillier &amp; D. Tripathi</i>	
<b>SESSION I -1.3 Magnetic Field: Measurements and Models</b>	
The inference of the magnetic field vector in prominences . . . . .	101
<i>B. W. Lites</i>	
A first look into the magnetic field configuration of prominence threads using spectropolarimetric data . . . . .	112
<i>D. Orozco Suárez, A. Asensio Ramos &amp; J. Trujillo Bueno</i>	
Primary observations of solar filaments using the multi-channel imaging system of the New Vacuum Solar Telescope . . . . .	117
<i>Z. Xu, Z. Y. Jin, F. Y. Xu &amp; Z. Liu &amp; the NVST team</i>	
Modeling Magnetic Flux Ropes . . . . .	121
<i>C. Xia &amp; R. Keppens</i>	
<b>SESSION I -1.4 Filament Environment</b>	
Structure and Topology of Magnetic Fields in Solar Prominences . . . . .	127
<i>A. A. van Ballegoijen &amp; Y. Su</i>	
Hemispheric Patterns in Filament Chirality and Sigmoid Shape over the Solar Cycle	135
<i>P. C. Martens, A. R. Yeates &amp; K. G. Pillai</i>	
Magnetism and the Invisible Man: The mysteries of coronal cavities . . . . .	139
<i>S. Gibson</i>	
The Formation of a Cavity in a 3D Flux Rope . . . . .	147
<i>D. Schmit &amp; S. Gibson</i>	
Observation of the prominence cavity region using slitless eclipse flash spectra and space borne EUV filtergrams . . . . .	151
<i>C. Bazin, S. Koutchmy, P. Lamy &amp; E. Tavabi</i>	
Large-amplitude longitudinal oscillations in solar prominences . . . . .	155
<i>M. Luna, J. Karpen, A. Díaz, K. Knizhnik, K. Muglach, H. Gilbert &amp; T. Kucera</i>	
<b>SESSION I -1.5 Solar Cycle Evolution of Prominences and Eruptions</b>	
Unusual migration of the prominence activities in recent solar cycles . . . . .	161
<i>M. Shimojo</i>	
Global magnetic field cycle evolution and prominence eruptions . . . . .	168
<i>I. A. Bilenko</i>	
Explaining the Hemispheric Pattern of Filament Chirality . . . . .	172
<i>D. H. Mackay &amp; A. R. Yeates</i>	

## SESSION II -2.1 Prominence destabilization, CMEs, 3D reconstructions

On the dynamics of eruptive prominences . . . . .	179
<i>L. A. Balmaceda, H. Cremades, G. Stenborg, C. Francile, L. Di Lorenzo &amp; F. López</i>	
The physical mechanisms that initiate and drive solar eruptions . . . . .	184
<i>G. Aulanier</i>	
Magnetohydrodynamic study on the effect of the gravity stratification on flux rope ejections . . . . .	197
<i>P. Pagano, D. H. Mackay &amp; S. Poedts</i>	
Initiation of Coronal Mass Ejections by Sunspot Rotation . . . . .	201
<i>G. Valori, T. Török, M. Temmer, A. M. Veronig, L. van Driel-Gesztelyi &amp; B. Vršnak</i>	
Observations of flux rope formation prior to coronal mass ejections . . . . .	209
<i>L. M. Green &amp; B. Kliem</i>	
3D reconstruction of erupting filaments with STEREO data . . . . .	215
<i>T. Li &amp; J. Zhang</i>	
FIP Bias in a sigmoidal active region . . . . .	222
<i>D. Baker, D. H. Brooks, P. Démoulin, L. van Driel-Gesztelyi, L. M. Green, K. Steed &amp; J. Carlyle</i>	
A confined flare above filaments . . . . .	227
<i>K. Dalmasse, R. Chandra, B. Schmieder &amp; G. Aulanier</i>	
Successive filament eruptions within one solar breakout event . . . . .	231
<i>Y. Shen</i>	
A solar tornado caused by flares . . . . .	235
<i>N. K. Panesar, D. E. Innes, S. K. Tiwari &amp; B. C. Low</i>	
The contribution of X-ray polar blowout jets to the solar wind mass and energy	239
<i>G. Poletto, A. C. Sterling, S. Pucci &amp; M. Romoli</i>	
<b>SESSION II -2.2 CMEs and Magnetic clouds in the Heliosphere and their impacts on Earth's Environment</b>	
Evolution of interplanetary coronal mass ejections and magnetic clouds in the heliosphere . . . . .	245
<i>P. Démoulin</i>	
Complex Evolution of Coronal Mass Ejections in the Inner Heliosphere as Revealed by Numerical Simulations and STEREO Observations: A Review . . . . .	255
<i>N. Lugaz, C. J. Farrugia &amp; N. Al-Haddad</i>	
Flux rope axis geometry of magnetic clouds deduced from in situ data . . . . .	265
<i>M. Janvier, P. Démoulin &amp; S. Dasso</i>	
Reconstruction of magnetic clouds from in-situ spacecraft measurements and intercomparison with their solar sources . . . . .	269
<i>Q. Hu &amp; J. Qiu</i>	

Properties and processes that influence CME geo-effectiveness . . . . .	273
<i>B. Lavraud &amp; A. Rouillard</i>	
Clarifying some issues on the geoeffectiveness of limb halo CMEs. . . . .	285
<i>C. Cid, H. Cremades, A. Aran, C. Mandrini, B. Sanahuja, B. Schmieder, M. Menvielle, L. Rodriguez, E. Saiz, Y. Cerrato, S. Dasso, C. Jacobs, C. Lathuillere &amp; A. Zhukov</i>	
The in-situ manifestation of solar prominence material . . . . .	289
<i>S. T. Lepri, T. H. Zurbuchen, J. R. Gruesbeck &amp; J. A. Gilbert</i>	
Interplanetary Disturbances Affecting Space Weather . . . . .	297
<i>R. F. Wimmer-Schweingruber</i>	
<b>SESSION III Stellar Ejecta and Impact on Exoplanets</b>	
Observations of stellar coronae and prominences . . . . .	309
<i>G. A. J. Hussain</i>	
Coronal Mass Ejections and Angular Momentum Loss in Young Stars. . . . .	318
<i>A. N. Aarnio, K. G. Stassun &amp; S. P. Matt</i>	
Magnetised winds of low-mass stars and their impact on exoplanets . . . . .	322
<i>A. A. Vidotto</i>	
Modeling magnetized star-planet interactions: boundary conditions effects . . . . .	330
<i>A. Strugarek, A. S. Brun, S. P. Matt &amp; V. Reville</i>	
Stellar CME activity and its possible influence on exoplanets' environments: Importance of magnetospheric protection. . . . .	335
<i>M. L. Khodachenko, Y. Sasunov, O. V. Arkhypov, I. I. Alexeev, E. S. Belenkaya, H. Lammer, K. G. Kislyakova, P. Odert, M. Leitzinger &amp; M. Güdel</i>	
<b>SESSION IV Instrumentation, Missions and Techniques</b>	
The Chinese Giant Solar Telescope . . . . .	349
<i>Z. Liu, Y. Deng &amp; H. Ji</i>	
Scientific Programmes with India's National Large Solar Telescope and their contribution to Prominence Research. . . . .	355
<i>S. S. Hasan</i>	
Prominence Science with ATST Instrumentation . . . . .	362
<i>T. Rimmele, T. Berger, R. Casini, D. Elmore, J. Kuhn, H. Lin, W. Schmidt &amp; F. Wöger</i>	
Instrument concepts for the observation of prominences with future ground-based telescopes . . . . .	370
<i>A. López Ariste</i>	
<b>CONCLUSION</b>	
Prominences: Conference Summary and Suggestions for the Future . . . . .	379
<i>E. R. Priest</i>	

**POSTERS SESSION I**

On Critical Heights and Longitudinal Magnetic Field Strength in Prominences . . . . .	391
<i>I. V. Alexeeva &amp; I. S. Kim</i>	
The promise of Bayesian analysis for prominence seismology . . . . .	393
<i>I. Arregui, A. A. Ramos &amp; A. J. Díaz</i>	
The spatial relation between EUV cavities and linear polarization signatures . . . . .	395
<i>U. Bgk-Stęślicka, S. E. Gibson, Y. Fan, C. Bethge, B. Forland &amp; L. A. Rachmeler</i>	
24 synoptic maps 1974-1982 (ascending phase of cycle XXI) of 323 prominence average magnetic fields measured by the Hanle effect. . . . .	397
<i>V. Bommier</i>	
Density evolution of in-falling prominence material from the 7th June 2011 CME . . . . .	401
<i>J. Carlyle, D. Williams, L. van Driel-Gesztelyi &amp; D. Innes</i>	
Observations of Overlying Extreme-ultraviolet Arches confining the eruption of a Filament . . . . .	403
<i>H. Chen, S. Ma &amp; J. Zhang</i>	
Estimation of Plasma Properties and Magnetic Field in a Prominence-like Structure as Observed by SDO/AIA . . . . .	405
<i>B. N. Dwivedi, A. K. Srivastava &amp; A. Mohan</i>	
Kappa-distributions and Temperature Structure of the Prominence-Corona Transition Region. . . . .	408
<i>E. Dziřčáková, Š. Mackovjak &amp; P. Heinzel</i>	
Modeling Prominence Formation in 2.5D. . . . .	410
<i>X. Fang, C. Xia &amp; R. Keppens</i>	
Filament Connectivity and "Reconnection" . . . . .	412
<i>B. Filippov</i>	
The solar physics FORWARD codes: Now with widgets! . . . . .	414
<i>B. Forland, S. Gibson, J. Dove &amp; T. Kucera</i>	
Coronal Loop Mapping to Infer the Best Magnetic Field Models for Active Region Prominences . . . . .	416
<i>G. A. Gary, Q. Hu &amp; J. K. Lee</i>	
Evolution of a Group of Coronal Holes Associated with Eruption of Nearby Prominences and CMEs. . . . .	418
<i>H. Gutiérrez, L. Taliashvili &amp; Z. Mouradian</i>	
Mapping prominence plasma parameters from eclipse observations. . . . .	420
<i>S. Jeřičiř, P. Heinzel, M. Zapiřr, M. Druckmüller, S. Gunár &amp; P. Kotrř</i>	
A Statistical Study on Characteristics of Disappearing Prominences . . . . .	422
<i>A. D. Joshi, S.-C. Bong &amp; N. Srivastava</i>	
Signatures of magnetic reconnection during the evolutionary phases of a prominence eruption and associated X1.8 flare . . . . .	424
<i>B. Joshi, U. Kushwaha, K. Cho &amp; A. Veronig</i>	

On magnetic measurements in prominences. . . . .	426
<i>I. S. Kim &amp; O. I. Bugaenko</i>	
Observational Study of Large Amplitude Longitudinal Oscillations in a Solar Filament . . . . .	428
<i>K. Knizhnik, M. Luna, K. Muglach H. Gilbert, T. Kucera &amp; J. Karpen</i>	
3D dynamical structuring of a high latitude erupting prominence: I- Analysis of the cool plasma flows before the eruption . . . . .	430
<i>S. Koutchmy, B. Filippov, E. Tavabi, C. Bazin &amp; S. Weiller</i>	
3D dynamical structuring of a high latitude erupting prominence: II- Analysis of the coronal context and eruption . . . . .	433
<i>S. Koutchmy, B. Filippov, E. Tavabi, C. Bazin &amp; S. Weiller</i>	
Propagating waves transverse to the magnetic field in a solar prominence. . . . .	435
<i>T. Kucera, B. Schmieder, K. Knizhnik, A. Lopez-Ariste, M. Luna &amp; D. Toot</i>	
High-resolution spectroscopy of a giant solar filament . . . . .	437
<i>C. Kuckein, C. Denker &amp; M. Verma</i>	
Prominences in SDO/EVE spectra: contributions from large solar structures . . .	439
<i>N. Labrosse, H. Hudson &amp; M. Kazachenko</i>	
Coronal Condensation in Funnel Prominences as Return Flows of the Chromosphere-Corona Mass Cycle. . . . .	441
<i>W. Liu, T. E. Berger &amp; B. C. Low</i>	
Two distinct peculiar “dimming channels” observed by SDO/AIA. . . . .	443
<i>S. Ma &amp; H. Chen</i>	
Where Do Solar Filaments Form? . . . . .	445
<i>D. H. Mackay, V. Gaizauskas &amp; A. R. Yeates</i>	
Spectral Observations of Filament Activation . . . . .	447
<i>G. Mashnich</i>	
Column Density Measurements of a Prominence Observed by AIA . . . . .	449
<i>P. I. McCauley, Y. Su, E. DeLuca &amp; A. van Ballegoijen</i>	
Dynamics in the filament of september 17 2010 and in its channel . . . . .	451
<i>N. Mein, P. Mein, B. Schmieder, J.-M. Malherbe &amp; T. Roudier</i>	
Multidimensional and inhomogeneity effects on scattering polarization in solar prominences . . . . .	453
<i>I. Milić &amp; M. Faurobert</i>	
The polar belts of prominence occurrence as an indicator of the solar magnetic field reversal . . . . .	456
<i>T. Pintér, M. Rybanský &amp; I. Dorotovič</i>	
Total mass loading of prominences estimated from their multi-spectral observations . . . . .	458
<i>P. Schwartz, P. Heinzel, P. Kotrč, F. Fárnik, Y. A. Kupryakov, E. E. DeLuca &amp; L. Golub</i>	
Structure and Dynamics of an Eruptive Prominence on the Quiet Sun . . . . .	460
<i>Y. Su, K. K. Reeves, P. McCauley, A. A. van Ballegoijen &amp; E. E. DeLuca</i>	

On 2D Linear Polarimetry in Prominences . . . . .	462
<i>V. V. Popov, I. S. Kim &amp; E. Z. Suyunova</i>	
Spectroscopic measurements of EUV ejecta in a CME: a high-blueshift trailing thread . . . . .	464
<i>D. Williams, D. Baker, L. van Driel-Gesztelyi &amp; Lucie Green</i>	
Simulation of sigmoid structure and filament eruption of AR11283 using a three-dimensional data-driven magnetohydrodynamic model. . . . .	466
<i>S. T. Wu, C. Jiang, X. Feng, Q. Hu &amp; Y. Liu</i>	
Prominence Formation and Destruction. . . . .	468
<i>C. Xia, P. Antolin &amp; R. Keppens</i>	
HMI observations of two types of ephemeral regions . . . . .	470
<i>S. Yang, J. Zhang &amp; Y. Liu</i>	
Solar wind fluctuations and solar activity long-term swing: 1963-2012. . . . .	473
<i>J. L. Zerbo, C. Amory-Mazaudier &amp; F. Ouattara</i>	
Shearing motions and torus instability in the 2010 April 3 filament eruption . . .	475
<i>F. P. Zuccarello, P. Romano, F. Zuccarello &amp; S. Poedts</i>	
<b>POSTERS SESSION II</b>	
Topological study of active region 11158 . . . . .	479
<i>J. Zhao, H. Li, E. Pariat, B. Schmieder, Y. Guo &amp; T. Wiegmann</i>	
Constraints on the Release History of Solar Energetic Particles by Flux-tube Variations. . . . .	481
<i>N. Ageda &amp; K.-L. Klein</i>	
Galactic cosmic ray decreases associated with non-interacting magnetic clouds in the 23 <sup>rd</sup> solar cycle. . . . .	483
<i>J. J. Masías-Meza &amp; S. Dasso</i>	
Characterization of intermittent structures in the solar wind . . . . .	485
<i>M. S. Nakwacki, M. E. Ruiz &amp; S. Dasso</i>	
Statistical relationship between CME speed and soft X-ray peak flux of the associated flare during solar cycle 23. . . . .	487
<i>C. Salas-Matamoros, K.-L. Klein &amp; L. Taliashvili</i>	
Recurrent filament eruptions and associated CMEs . . . . .	489
<i>B. Schmieder, H. Cremades, C. Mandrini, P. Démoulin &amp; Y. Guo</i>	
Evolution of the 5 January 2005 CMEs associated with eruptive filaments in inner heliosphere . . . . .	491
<i>R. Sharma, N. Srivastava, B. V. Jackson, D. Chakrabarty, N. Lockett, H.-S. Yu, Q. Hu &amp; C. Möstl</i>	
Role of filament plasma remnants in ICMEs leading to geomagnetic storms . . . .	493
<i>R. Sharma, N. Srivastava &amp; D. Chakrabarty</i>	
On the onset of recurrent eruptions of a filament observed during August 2012 .	495
<i>N. Srivastava, A. D. Joshi &amp; S. K. Mathew</i>	

Different Stages of Evolution of Prominence and the Associated CMEs . . . . .	497
<i>L. Taliashvili, Z. Mouradianand &amp; H. Gutiérrez</i>	
From solar eruption to transformer saturation: the space weather chain . . . . .	500
<i>L. Trichtchenko</i>	
Magnetic reconnection driven by filament eruption in the 7 June 2011 event . . .	502
<i>L. van Driel-Gesztelyi, D. Baker, T. Török, E. Pariat, L. M. Green, D. R. Williams, J. Carlyle, G. Valori, P. Démoulin, S. A. Matthews, B. Kliem &amp; J.-M. Malherbe</i>	
Observation and simulation of a filament eruption associated with the contraction of the overlying coronal loops and the filament rotation . . . . .	504
<i>X. L. Yan, Z. K. Xue &amp; Z. X. Mei</i>	
<b>POSTERS SESSION III</b>	
Stellar ejecta from falling comet-like bodies: young stars . . . . .	509
<i>F. S. Ibadov &amp; S. Ibadov</i>	
<b>POSTERS SESSION IV</b>	
The Heliophysics Feature Catalogue, a tool for the study of solar features . . . . .	512
<i>X. Bonnin, N. Fuller, C. Renié, J. Abouadarham, B. Cecconi, R. D. Bentley &amp; A. Csillaghy</i>	
Infrared Stokes Polarimeter at NAOJ/Mitaka . . . . .	515
<i>Y. Hanaoka, T. Sakurai &amp; IRMag Group</i>	
Featuring dark coronal structures: physical signatures of filaments and coronal holes for automated recognition . . . . .	517
<i>J. Palacios, C. Cid, E. Saiz, Y. Cerrato &amp; A. Guerrero</i>	
A system for near real-time detection of filament eruptions at Kanzelhöhe Observatory . . . . .	519
<i>W. Pötzi, G. Riegler, A. Veronig, T. Pock &amp; U. Möstl</i>	
Coronal Multi-channel Polarimeter at the Lomnický Peak Observatory . . . . .	521
<i>P. Schwartz, J. Ambroz, P. Gömöry, M. Kozák, A. Kučera, J. Rybák, S. Tomczyk, S. Sewell, P. Aumiller, R. Summers, L. Sutherland &amp; A. Watt</i>	
Solar Activity Monitoring of Flares and CMEs Precursors through Lyman-Alpha Imaging and Tracking of Filaments and Prominences . . . . .	523
<i>L. Damé &amp; S. A. Khaled</i>	
The Space Weather & Ultraviolet Solar Variability Microsatellite Mission (SWUSV)	525
<i>L. Damé &amp; The SWUSV Team (Mustapha Meftah, Alain Hauchecorne, Philippe Keckhut, Alain Sarkissian, Marion Marchand, Abdenour Irbah, Éric Quémerais, Slimane Bekki, Thomas Foujols, Matthieu Kretzschmar, Gaël Cessateur, Alexander Shapiro, Werner Schmutz, Sergey Kuzin, Vladimir Slemzin, Sergey Bogachev, José Merayo, Peter Brauer, Kanaris Tsinganos, Antonis Paschalis, Ayman Mahrous, Safnaz A. Khaled, Ahmed Ghitas, Besheir Marzouk, Amal Zaki, Ahmed A. Hady, Rangaiyah Kariyappa)</i>	
List of unpublished oral contributions and posters . . . . .	527
Author index . . . . .	530
