Volumes in Series	xvii
Preface	xxi

**1. Introduction** 1

*Thomas A. Germer, Joanne C. Zwinkels,  
and Benjamin K. Tsai*

1.1 Opening Remarks	1
1.2 Uncertainties	4
1.3 Overview	8
References	9

**2. Theoretical Concepts in Spectrophotometric Measurements** 11

*Thomas A. Germer, Joanne C. Zwinkels,  
and Benjamin K. Tsai*

2.1 Introduction	12
2.2 Radiometric Quantities	13
2.2.1 Nonspectral Quantities	13
2.2.2 Spectral Quantities	18
2.2.3 Spectrally Weighted Quantities	19
2.3 Relationship Between Radiometric and Electromagnetic Quantities	20
2.3.1 Plane Waves and Irradiance	23
2.3.2 Spherical Waves and Intensity	24
2.3.3 Fourier Expansion and Radiance	25
2.4 The Spectrophotometric Quantities	26
2.4.1 Generalized Scattering Functions	27
2.4.2 Bidirectional Reflectance Distribution Function	28
2.4.3 Reflectance and Transmittance	30
2.4.4 Two Ideal Bidirectional Reflectance Distribution Functions	32
2.4.5 Absorptance	34
2.4.6 Fluorescence: Bispectral Luminescent Radiance Factor	36
2.4.7 Emittance and the Kirchhoff Relationship	38
2.5 Polarization	39
2.6 Reflection and Transmission from Flat Surfaces	43
2.6.1 Snell's Law of Refraction	43
2.6.2 Fresnel Reflection	44

2.6.3 Thin Films	48
2.6.4 Thick Films	49
<b>2.7 Diffuse Scattering</b>	52
2.7.1 Volume Scattering: Theory of Kubelka and Munk	52
2.7.2 Roughness: Facet Scattering Model	54
2.7.3 Roughness: First-Order Vector Perturbation Theory	59
References	65
<b>3. Dispersive Methods</b>	67
<i>Arnold A. Gaertner, Howard W. Yoon, and Thomas A. Germer</i>	
<b>3.1 Introduction</b>	67
<b>3.2 General Description</b>	69
3.2.1 Bandpass Function	70
3.2.2 Gratings	74
3.2.3 Prisms	78
3.2.4 Resolving Power	81
<b>3.3 Spectral Analyzer Design</b>	82
3.3.1 Monochromator Design	82
3.3.2 Polychromator Design	84
<b>3.4 Wavelength Calibration</b>	84
<b>3.5 Stray Light</b>	87
<b>3.6 Optical Radiation Sources</b>	88
<b>3.7 Optical Radiation Detectors</b>	90
References	94
<b>4. Fourier Transform Methods</b>	97
<i>Simon G. Kaplan and Manuel A. Quijada</i>	
<b>4.1 Introduction: Ideal Michelson Interferometer</b>	98
<b>4.2 Real Fourier Transform Spectrometers</b>	101
4.2.1 Finite Scan Length and Source Size: Spectral Resolution	101
4.2.2 Sampling the Interferogram: Spectral Bandwidth	106
4.2.3 Phase Error and Phase Correction	107
4.2.4 FTS Versus Dispersive Instruments	110
4.2.5 FTS Design Considerations	114
4.2.6 Instrument Design Examples	121
<b>4.3 Sources of Uncertainty and Their Reduction</b>	123
4.3.1 Noise	124
4.3.2 Interferometer Alignment Drift	124
4.3.3 Phase Error	125
4.3.4 Detector Nonlinearity	126
4.3.5 Interreflections	129

4.3.6 Nonsource Emission	130
4.3.7 Beam Geometry Errors	132
4.3.8 Polarization Effects	133
4.3.9 Stray Light	134
4.3.10 Atmospheric Absorption	134
4.3.11 Wavenumber Uncertainty	135
<b>4.4 Measurement Applications</b>	136
4.4.1 Measurement of Transmittance and Reflectance	136
4.4.2 Measurement of Refractive Index	137
4.4.3 Assessment of the Accuracy of FTS Measurements	137
<b>4.5 Recommendations for Accurate FTS Measurements</b>	138
4.5.1 Matching Instrument to Measurement Requirements	138
4.5.2 Instrument Software and Data Handling	139
4.5.3 Maintenance of Measurement Traceability	139
References	140
<b>5. Regular Reflectance and Transmittance</b>	143
<i>Peter A. van Nijnatten</i>	
<b>5.1 Introduction</b>	144
<b>5.2 Relevant Background Information</b>	144
5.2.1 Measurement Geometry	144
5.2.2 Measurement Equation	145
5.2.3 Evaluation of Measurement Uncertainty	146
5.2.4 The Role of Integrating Spheres	147
5.2.5 Avoiding Spectral Artifacts	148
<b>5.3 Measurements Near-Normal Incidence</b>	150
5.3.1 Typical Configurations for Near-Normal Reflection Measurements	151
5.3.2 Measuring the Transmittance and Reflectance of Coated Substrates	153
5.3.3 Measuring Very Low Reflectance Materials	153
5.3.4 Measuring Specular Reflectance with an FTIR	154
5.3.5 Tools for Absolute Reflectance and Transmittance Measurements	156
<b>5.4 Measurements at Oblique Incidence</b>	158
5.4.1 Relevant Issues	159
5.4.2 Directional Transmittance Measurements	163
5.4.3 Relative Directional Reflection Measurements	166
5.4.4 Absolute Directional Reflection Measurements	169
<b>5.5 Measuring the Reflectance of Highly Reflecting Materials</b>	171
5.5.1 VW Method	172
5.5.2 IV Method	175
References	177

<b>6. Diffuse Reflectance and Transmittance</b>	<b>179</b>
<i>Andreas Höpe</i>	
<b>6.1 Introduction</b>	180
<b>6.2 Measurands</b>	182
6.2.1 Reflectance	182
6.2.2 Reflectance Factor	182
6.2.3 Radiance Factor	183
6.2.4 Transmittance	183
6.2.5 Relationship Between Reflectance, Transmittance, and Absorbance	184
<b>6.3 Notation of Diffuse Reflection Geometries</b>	184
6.3.1 Recommended Integrating Sphere Geometries	186
<b>6.4 Integrating Spheres</b>	187
6.4.1 Historic Information	189
6.4.2 Setup	190
6.4.3 Construction Principles	190
6.4.4 Internal Coating Materials	191
6.4.5 Homogeneity	192
<b>6.5 Absolute Sphere Methods for Measuring Diffuse Reflection</b>	193
6.5.1 Basic Considerations	193
6.5.2 Method of Taylor (First Taylor) and Benford	195
6.5.3 Method of Taylor (Third Taylor)	197
6.5.4 Method of Sharp-Little	198
6.5.5 Method of van den Akker	199
6.5.6 Method of Korte-Schmidt	200
6.5.7 Coblenz Sphere	202
6.5.8 Goniometric Method	203
<b>6.6 Diffuse Reflection Standards</b>	203
6.6.1 Requirements	204
6.6.2 Common Diffuse Reflection Standards	205
6.6.3 Fluorescence of Diffuse Reflection Standards	210
6.6.4 Handling Recommendations	211
<b>6.7 Relative Sphere Methods for Measuring Diffuse Reflection</b>	212
<b>6.8 Diffuse Transmittance Measurements</b>	214
References	216
<b>7. Spectral Fluorescence Measurements</b>	<b>221</b>
<i>Joanne C. Zwinkels, Paul C. DeRose, and James E. Leland</i>	
<b>7.1 Introduction</b>	222
7.1.1 Fluorescence Measurement Applications	223
<b>7.2 Fundamental Concepts and Terminology</b>	224
7.2.1 Quantities Common to Analytical and Colorimetric Applications	225
7.2.2 Specific to Analytical Applications	230

7.2.3 Specific to Colorimetric Applications	232
<b>7.3 Measurement of Fluorescence Characteristics</b>	<b>238</b>
7.3.1 Bispectral Measurements	238
7.3.2 Abridged Measurements	239
<b>7.4 General Instrument Design and Measurement Considerations</b>	<b>240</b>
7.4.1 Instrument Components	240
7.4.2 Spectral Measurement Methods	241
7.4.3 General Considerations and Good Laboratory Practices	243
<b>7.5 Specialized Instrument Designs and Measurement Methods</b>	<b>244</b>
7.5.1 Analytical Applications	244
7.5.2 Colorimetric Applications	247
7.5.3 Quantum Yield Measurements	256
<b>7.6 Instrument Characteristics That Impact Spectral Fluorescence Measurements</b>	<b>260</b>
7.6.1 Spectral Characteristics	260
7.6.2 Detector Nonlinearity	264
7.6.3 Polarization Effects	266
7.6.4 Stray Light	269
7.6.5 Instrument Lineshape	270
7.6.6 Sampling Effects	271
<b>7.7 Sample Characteristics That Impact Fluorescence Measurements</b>	<b>274</b>
7.7.1 Optical Density	274
7.7.2 Solvent/Matrix Properties	275
7.7.3 Refractive Index	275
7.7.4 Impurities	276
7.7.5 Luminescence Lifetime	277
7.7.6 Scattering	277
<b>7.8 Standards for Spectral Fluorescence Measurements</b>	<b>278</b>
7.8.1 Correcting Relative Excitation and Emission Spectra	278
7.8.2 Intensity Verification Standards	283
7.8.3 Fluorescent Color Standards	284
7.8.4 Quantum Yield Standards	286
References	287
<b>8. Angle-Resolved Diffuse Reflectance and Transmittance</b>	<b>291</b>
<i>Thomas A. Germer, John C. Stover, and Sven Schröder</i>	
<b>8.1 Introduction</b>	292
<b>8.2 Reference-Free Measurement Methods</b>	<b>294</b>
8.2.1 The Over-Illumination Method	295
8.2.2 The Under-Illumination Method	297
<b>8.3 Instrument Characterization</b>	<b>301</b>
8.3.1 The Instrument Signature	301
8.3.2 Noise-Equivalent BRDF	303

8.3.3 Profile of Illumination Spot	303
8.3.4 The Field of View	304
8.3.5 Detector Location Sensitivity	304
8.3.6 Linearity	304
<b>8.4 Goniometer Designs</b>	304
8.4.1 In-Plane Scatterometer Designs	304
8.4.2 Out-of-Plane Scatterometer Designs	305
8.4.3 Multichannel Systems	309
<b>8.5 Uncertainty Analysis</b>	311
<b>8.6 Normalization Schemes</b>	315
8.6.1 Relative Normalization	315
8.6.2 Specular Normalization	316
<b>8.7 Special Conditions or Considerations</b>	316
8.7.1 Ultraviolet	316
8.7.2 Infrared	316
8.7.3 Polarization	316
8.7.4 Transmission Measurements	317
<b>8.8 Applications</b>	317
8.8.1 Pressed PTFE	318
8.8.2 Integration of BRDF	318
8.8.3 Diffuse Black Paint	321
8.8.4 Characterization of Surface Roughness	322
8.8.5 Scattering Characterization of Anisotropic Surface Structures	325
8.8.6 Predicting Out-of-Plane BRDF from In-Plane BRDF	326
<b>References</b>	328
<b>9. Spectral Emissivity Measurements</b>	333
<i>Hiroichi Watanabe, Juntaro Ishii, Hidenobu Wakabayashi, Tomoyuki Kumano, and Leonard Hanssen</i>	
<b>9.1 Introduction</b>	334
<b>9.2 Measurement Methods</b>	336
<b>9.3 Spectral Emissivity Measurements Near-Ambient Temperature</b>	338
9.3.1 Measurement Apparatus Based on the Blackbody Comparison Method	338
9.3.2 Calibration of the System Response	340
9.3.3 Correction for Reflected Radiance of the Surroundings	342
9.3.4 Traceability and Uncertainty of Spectral Emissivity Measurements	342
<b>9.4 Spectral Emissivity and Reflectance Measurements of Oxidized Metals</b>	345
9.4.1 A Broad-Spectral-Range High-Speed Spectrophotometer System	345

<b>9.5 Spectral Emissivity Measurements of Molten Metals at High Temperatures</b>	349
9.5.1 Importance of Molten Metal Emissivity Data	349
9.5.2 Spectral Emissivity Measurements Based on Containerless Techniques	351
<b>9.6 Spectral Emissivity Measurements of Ceramics</b>	357
<b>References</b>	362
<b>10. Color and Appearance</b>	367
<i>Maria E. Nadal, Dave Wyble, and Clarence J. Zarobila</i>	
<b>10.1 Introduction</b>	367
<b>10.2 Spectral Attributes—Color</b>	368
10.2.1 Definition	368
10.2.2 CIE System	370
10.2.3 Metamerism	376
10.2.4 Chromaticity Coordinates and Color Spaces	377
10.2.5 Color Difference Metrics	380
<b>10.3 Color-Measuring Instruments</b>	383
10.3.1 Geometric Considerations	385
10.3.2 Source Considerations	389
10.3.3 Detection and Signal Processing Considerations	390
10.3.4 Uncertainties	392
<b>10.4 Gonioapparent Materials</b>	394
<b>10.5 Geometrical Attributes</b>	396
10.5.1 Specular Gloss	397
10.5.2 Haze	400
10.5.3 Distinctness of Image	403

<b>11. The Use of Spectrophotometry in the Pharmaceutical Industry</b>	409
<i>John P. Hammond</i>	
<b>11.1 Introduction</b>	410
<b>11.2 Introduction to the Pharmaceutical Industry</b>	410
11.2.1 Process Analytical Technology	411
11.2.2 Quality by Design	411
11.2.3 Product Development Cycle	412
11.2.4 Discovery Research	412
<b>11.3 Quality System for the Analytical Laboratory</b>	414
11.3.1 Consideration for Quality Systems in Data Quality Assurance/Control	414
<b>11.4 UV and Visible Spectrophotometry</b>	419
11.4.1 Qualification of UV and Visible Spectrophotometers	421
11.4.2 Validation and Verification	430
11.4.3 Pharmaceutical Applications (UV–vis)	430

<b>11.5 NIR Spectrometry</b>	433
11.5.1 Factors That Affect NIR Spectra	434
11.5.2 Instrumentation	435
11.5.3 Qualification of NIR Instruments	435
11.5.4 Method Validation	438
11.5.5 Pharmaceutical Applications (NIR)	439
<b>11.6 Mid-IR Spectrometry</b>	440
11.6.1 Qualification of IR Spectrophotometers	441
11.6.2 Validation and Verification	445
11.6.3 Pharmaceutical Applications (Mid-IR)	445
<b>11.7 Fluorescence Spectrometry</b>	446
11.7.1 Qualification of Fluorescence Instruments	447
11.7.2 Validation and Verification	453
11.7.3 Pharmaceutical Applications (Fluorescence)	454
