

## CONTENTS

<i>Preface</i>	xi
<i>About the Author</i>	xiii
<b>1 Controlled Thermonuclear Fusion</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Ignition Conditions . . . . .	3
1.3 Tokamaks . . . . .	5
1.4 Tokamak Operating Limits . . . . .	10
Bibliography . . . . .	15
<b>2 Electron Waves</b>	<b>17</b>
2.1 Maxwell Equations . . . . .	17
2.2 Homogeneous Plasmas . . . . .	18
2.3 Plane Waves in Cold Homogeneous Plasmas . . . . .	22
2.4 Wave Polarization . . . . .	26
2.5 Wave Packets in Homogeneous Plasmas . . . . .	31
References . . . . .	33
<b>3 Inhomogeneous Plasmas</b>	<b>35</b>
3.1 Wave Packets in Weakly Inhomogeneous Plasmas . . . . .	35
3.2 Ray Equations in Absorbing Plasmas . . . . .	39
3.3 Ray Tracing . . . . .	40
3.4 The Complex Eikonal Approximation . . . . .	42
3.5 Propagation of a Gaussian Beam . . . . .	45
Bibliography . . . . .	49

<b>4 Refractive Index Measurements</b>	<b>51</b>	<b>8 Electron Cyclotron Waves in Hot Plasmas</b>	<b>163</b>
4.1 Interferometry . . . . .	51	8.1 Relativistic Theory of Electron Cyclotron Waves . . . . .	163
4.2 Polarization of Waves . . . . .	60	8.2 Dispersion Relation . . . . .	170
4.3 Polarization Evolution Equation . . . . .	66	8.3 Wave Cutoff in Hot Plasmas . . . . .	174
4.4 Plasma Polarimetry . . . . .	69	Bibliography . . . . .	176
4.5 Conclusion . . . . .	73		
Bibliography . . . . .	74		
<b>5 Wave Propagation in Turbulent Plasmas</b>	<b>75</b>	<b>9 Electron Cyclotron Emission</b>	<b>179</b>
5.1 Scattering of Waves by Plasma Fluctuations . . . . .	76	9.1 Radiation Transport . . . . .	179
5.2 Intensity of Scattered Waves . . . . .	79	9.2 Solution of Radiative Transfer Equation . . . . .	182
5.3 Turbulence Measurements . . . . .	82	9.3 Plasma Emission . . . . .	185
5.4 Short-Scale Anisotropic Turbulence . . . . .	87	9.4 Temperature Measurements . . . . .	190
5.5 CO <sub>2</sub> Laser Scattering . . . . .	91	9.5 Temperature Fluctuations Measurements . . . . .	192
5.6 Wave Number Resolution . . . . .	95	Bibliography . . . . .	198
Bibliography . . . . .	98		
<b>6 Non-collective Scattering</b>	<b>101</b>	<b>Index</b>	<b>201</b>
6.1 Radiation by a Moving Electron . . . . .	102		
6.2 Scattered Power . . . . .	105		
6.3 Spectral Density to Second Order in $\beta$ . . . . .	108		
6.4 Non-Collective Scattering in Magnetized Plasmas . . . . .	112		
6.5 Scattering Measurements . . . . .	117		
Bibliography . . . . .	120		
<b>7 Plasma Reflectometry</b>	<b>123</b>		
7.1 Introduction . . . . .	124		
7.2 Density Measurements . . . . .	128		
7.3 WKBJ Approximation . . . . .	132		
7.4 Calculation of Electron Density . . . . .	134		
7.5 Fluctuations Measurements . . . . .	138		
7.6 Multidimensional Turbulent Fluctuations . . . . .	143		
7.7 Numerical Simulation . . . . .	150		
Bibliography . . . . .	160
