

CONTENTS

Foreword .....	v
Research in Elementary Particle Theory .....	vii
[6]* A Note on the Eigenvalue Problem in Crystal Statistics .....	1
[7] The Use of the Proper Time in Quantum Electrodynamics I .....	14
[10] Force Potentials in Quantum Field Theory .....	27
[12] On the Nature of V-Particles I and II (with K. Nishijima and Y. Yamaguchi) .....	47
[23] Possible Existence of a Heavy Neutral Meson .....	55
[25] Parametric Representations of General Green's Functions .....	57
[26] Dispersion Relations for Form Factors .....	77
[28] Quasi-Particles and Gauge Invariance in the Theory of Superconductivity .....	91
[29] Axial Vector Current Conservation in Weak Interactions .....	107
[33] A 'Superconductor' Model of Elementary Particles and Its Consequences .....	110

\*Numbers in brackets refer to the list of publications on pp. 455-467.

[34] Dynamical Model of Elementary Particles based on an Analogy with Superconductivity I (with <i>G. Jona-Lasinio</i> ) .....	127
[35] Dynamical Model of Elementary Particles based on an Analogy with Superconductivity II (with <i>G. Jona-Lasinio</i> ) .....	141
[37] Chirality Conservation with Soft Pion Production (with <i>D. Lurié</i> ) .....	150
[38] Soft Pion Emission Induced by Electromagnetic and Weak Interactions (with <i>E. Shrauner</i> ) .....	158
[39] Magnetic Field Dependence of the Energy Gap in Superconductors (with <i>San Fu Tuan</i> ) .....	165
[47] Considerations on the Magnetic Field Problem in Superconducting Thin Films (with <i>San Fu Tuan</i> ) .....	173
[54] Three-Triplet Model with Double SU(3) Symmetry (with <i>M.-Y. Han</i> ) .....	187
[61] A Systematics of Hadrons in Subnuclear Physics .....	192
[64] Nonleptonic Decays of Hyperons (with <i>Y. Hara and J. Schechter</i> ) .....	202
[65] Relativistic Wave Equations for Particles with Internal Structure and Mass Spectrum .....	206
[66] Infinite Multiplets .....	221
[69] Quantum Electrodynamics in Nonlinear Gauge .....	248
[71] <i>S</i> -Matrix in Semiclassical Approximation .....	254
[74] Quark Model and the Factorization of the Veneziano Amplitude .....	258
[77] Symmetry Breakdown and Small Mass Bosons .....	268
[78] Duality and Hadrodynamics .....	280
[83] Generalized Hamiltonian Dynamics .....	302
[88] Strings, Monopoles and Gauge Fields .....	310
[92] Strings, Vortices and Gauge Fields .....	317

[96] String-Like Configurations in the Weinberg–Salam Theory .....	329
[103] Hamilton–Jacobi Formalism for Strings .....	340
[113] Concluding Remarks .....	344
[119] Fermion–Boson Relations in BCS-Type Theories .....	366
[124] Field Theory of Galois Fields .....	371
[121] Directions of Particle Physics .....	383
[123] Supersymmetry and Superconductivity .....	390
[125] Thermodynamic Analogy in Quantum Field Theory .....	399
[130] BCS Mechanism, Quasi-Supersymmetry and the Fermion Masses .....	406
[132] BCS and IBM (with <i>M. Mukherjee</i> ) .....	416
[141] Dynamical Symmetry Breaking .....	436
Bio data .....	453
List of Publications .....	455
