Address by the Local Organizing Committee	xix
Address by the Scientific Organizing Committee	xx
Review: Observations	
Multi-frequency Observations of Highly Variable Relativistic Jets	
Observational aspects of AGN jets at high energy	1
<i>J. Kataoka</i>	
Gamma-ray blazars and active galactic nuclei seen by the Fermi-LAT	12
<i>B. Lott, E. Cavazzuti, S. Ciprini, S. Cutini, D. Gasparrini, on behalf of the Fermi-LAT collaboration</i>	
The connection between the 15 GHz radio and gamma-ray emission in blazars..	17
<i>W. Max-Moerbeck, J. L. Richards, T. Hovatta, V. Pavlidou, T. J. Pearson, A. C. S. Readhead, O. G. King & R. Reeves</i>	
Stochastic approach to modeling the γ -ray variability of Fermi/LAT blazars ..	21
<i>M. Sobolewska, A. Siemiginowska, B. Kelly & K. Nalewajko</i>	
Very high energy gamma-rays from flat spectrum radio quasars	27
<i>E. Lindfors, on behalf of the MAGIC Collaboration</i>	
The jet of the quasar 4C+21.35 from parsec to kiloparces scales and its role in high energy photon production	33
<i>S. G. Jorstad, A. P. Marscher, D. A. Morozova, V. Bala, I. Agudo, J. L. Gómez, A. Lähteenmäki, V. M. Larionov, P. S. Smith & M. Tornikoski</i>	
Multifrequency VLBI follow up study of strong γ -ray flares in the blazars 3C273 and 3C279	39
<i>M. M. Lisakov & Y. Y. Kovalev</i>	
The link between broad emission line fluctuations and non-thermal emission from the inner AGN jet	43
<i>J. León Tavares, V. Chavushyan, A. Lobanov, E. Valtaoja & T. G. Arshakian</i>	
The jet-disc connection in AGN	48
<i>T. Sbarlato, P. Padovani & G. Ghisellini</i>	

Beaming effect for Fermi/LAT blazars	53
<i>J. H. Fan, H. B. Xiao, D. Bastieri, Y. Liu, J. M. Hao, Z. Y. Pei, D. X. Wu, Y. H. Yuan, W. Cai & C. Lin</i>	
Multi-wavelength selection and identification of gamma-ray blazar candidates ..	58
<i>A. Paggi, R. D'Abrusco, F. Massaro, M. Landoni, D. Milisavljevic, N. Masetti, F. Ricci, E. Jiménez-Bailón, V. Chavushyan, M. Giroletti, H. A. Smith, R. Margutti, G. Tosti, J. R. Martínez-Galarza, H. Otí-Floranes, J. E. Grindlay, S. Funk, C. C. Cheung, L. Chomiuk & J. Strader</i>	
VHE BL Lacs through the MAGIC glasses	64
<i>J. Becerra González, on behalf of the MAGIC Collaboration</i>	
First results from HAWC: monitoring the TeV gamma-ray sky	70
<i>R. J. Lauer, for the HAWC Collaboration</i>	
Using the methods of wavelet analysis and singular spectrum analysis in the study of the variability of flux of radio sources 3C120 and BL Lac in the radio range ..	76
<i>G. Donskykh, M. Ryabov, A. Sukharev & M. Aller</i>	
Optical variability of PHL 1811 and 3C 273	79
<i>J. H. Fan, O. Kurtanidze, Y. Liu, Y. H. Yuan, J. M. Hao, W. Cai, H. B. Xiao & Z. Y. Pei</i>	
The variability and periods in the BL Lac AO 0235+164	81
<i>J. H. Fan, O. Kurtanidze, X. Liu, Y. Liu, H. T. Wang, Y. H. Yuan, J. M. Hao, D. X. Wu, W. Cai, H. B. Xiao & Z. Y. Pei</i>	
The core dominance parameter for gamma-ray loud blazars	83
<i>Z. Y. Pei, J. H. Fan, Y. Liu, H. J. Xie, Y. Gao & C. Lin</i>	
Magnetization of AGN jets as imposed by leptonic models of luminous blazars ..	85
<i>M. Janiak, M. Sikora & R. Moderski</i>	
Variability of the counterpart to the gamma-ray blazar GT0106+613	87
<i>P. L. Luque-Escamilla, J. Martí, E. Ramírez-Valenzuela, A. J. Muñoz-Arjonilla & J. M. Paredes</i>	
Multiwavelength variability analysis of the FSRQ 3C 279	89
<i>V. Patiño-Álvarez, V. Chavushyan, J. León-Tavares, A. Carramiñana, L. Carrasco, S. Fernandes, E. M. Schlegel & E. López-Rodríguez</i>	
The nature of the unassociated 2FGL sources.....	91
<i>T. Pursimo, R. Ojha, E. Ferrara, F. Acero, H. Johnston & O. Titov</i>	
The mid-infrared spectral characteristics of blazars	93
<i>H. A. Smith, F. Massaro, R. D'Abrusco, A. Paggi, P. Cowperthwaite, N. Masetti, M. Giroletti, G. Tosti & M. Landoni</i>	
Blazar monitoring with LOFAR	95
<i>S. Turriziani, M. Hardcastle, J. Miller-Jones, J. Broderick & S. Markoff (on behalf of the Transients Key Science Project)</i>	
Symmetric and triangle-shaped variability of blazars	97
<i>K. Yoshida</i>	

Review: Theory and Simulations	
Jet Structure, Collimation, and the role of the Magnetic Field	
AGN feedback by relativistic jets	101
<i>G. V. Bicknell, B. R. McNamara, M. A. Nawaz, R. S. Sutherland, M. Umemura & A. Y. Wagner</i>	
Kinematics of kiloparsec-scale jets	108
<i>R. A. Laing & A. H. Bridle</i>	
Multi-wavelength polarimetry and variability study of the M87 jet	116
<i>S. S. Avachat, E. S. Perlman, W. B Sparks, M. Cara & F. N. Owen</i>	
Time-variable linear polarization as a probe of the physical conditions in the com- pact jets of blazars	122
<i>A. P. Marscher</i>	
Rotation measures in AGN jets seen by VLA at 21 cm to 6 mm	128
<i>E. V. Kravchenko, W. D. Cotton & Y. Y. Kovalev</i>	
Polarimetric tomography of blazar jets	133
<i>U. Barres de Almeida, F. Tavecchio & N. Mankuzhiyil</i>	
The parsec-scale structure, kinematics, and polarization of radio-loud narrow-line Seyfert 1 galaxies	139
<i>J. L. Richards, M. L. Lister, T. Savolainen, D. C. Homan, M. Kadler, T. Hovatta, A. C. S. Readhead, T. G. Arshakian & V. Chavushyan</i>	
Microarcsecond structure of an AGN Jet via Interstellar Scintillation	143
<i>H. Bignall, J.-P. Macquart, L. Godfrey, J. Hodgson & D. Jauncey</i>	
Particle Acceleration Mechanisms, Cosmic rays, and High-energy Radiative Processes	
Relativistic Alfvén Waves on the jet of BL Lacertae	147
<i>M. H. Cohen & D. L. Meier</i>	
Diagnosing particle acceleration in relativistic jets	153
<i>M. Böttcher, M. G. Baring, E. P. Liang, E. J. Summerlin, W. Fu, I. A. Smith & P. Roustazadeh</i>	
Spectra and fast multi-wavelength variability of compact jets powered by internal shocks	159
<i>J. Malzac & S. Drappéau</i>	
Systematics of jets using multi-wavelength data	164
<i>P. Shastri, E. J. Gomez, M. Gupta & G. Madejski</i>	
Very high energy neutrino expectation from Fanaroff-Riley I sources	169
<i>A. Marinelli & N. Fraija</i>	
Lepton-hadronic processes and high-energy neutrinos in NGC 1275	175
<i>N. Fraija, A. Marinelli, U. Luviano-Valenzuela, A. Galván-Gaméz, & C. Peterson-Bórquez</i>	

Hadronic flares and associated neutrinos for Markarian 421	177
<i>A. Marinelli, B. Patricelli & N. Fraija</i>	
Influence of an AGN complex photon field on the jet bulk Lorentz factor through Compton rocket effect	179
<i>T. Vuillaume, G. Henri & P.-O. Petrucci</i>	
The Discovery of 3C 273 and the Road to Quasars	
The sequence of events that led to the 1963 publications in <i>Nature</i> of 3C273, the first quasar and the first extragalactic radio jet	183
<i>C. Hazard, D. Jauncey, W. M. Goss & D. Herald</i>	
The road to quasars.....	190
<i>K. I. Kellermann</i>	
Review: Observations meet theory	
Slugs and Snails and Puppy Dog Tails: jets from an unconventional angle.....	199
<i>D. E. Harris</i>	
Black hole - Extragalactic Jet Connections: statistics, intermittency, unification	
Understanding jets from sources straddling the Fanaroff-Riley divide.....	211
<i>P. Kharb, E. Stanley, M. Lister, H. Marshall, C. O'Dea & S. Baum</i>	
A survey of X-ray emission from 100 kpc radio jets	219
<i>D. A. Schwartz, H. L. Marshall, D. M. Worrall, M. Birkinshaw, E. Perlman, J. E. J. Lovell, D. Jauncey, D. Murphy, J. Gelbord, L. Godfrey & G. Bicknell</i>	
Tracing the high energy emission of γ -ray detected radio loud quasars.....	225
<i>G. Migliori</i>	
Spatially resolved studies of extragalactic jets in high redshift radio galaxies	231
<i>L. K. Morabito, A. Deller, J. B. R. Oonk, H. Röttgering & G. Miley</i>	
Interaction of Cygnus A with its environment.....	236
<i>P. E. J. Nulsen, A. J. Young, R. P. Kraft, B. R. McNamara & M. W. Wise</i>	
Early evolution stage of AGN	242
<i>M. Kunert-Bajraszewska, A. Labiano, A. Siemiginowska, M. Guainazzi & M. Gawroński</i>	
Extragalactic jets of broad absorption line (BAL) quasars.....	244
<i>M. Kunert-Bajraszewska, M. Cegłowski, C. Roskowiński & M. Gawroński</i>	
The North Middle Lobe of Centaurus A	246
<i>S. G. Neff, J. A. Eilek & F. N. Owen</i>	
Jet Interactions and their Role in the Structural Evolution and Feedback	
An overview of jet-mode AGN feedback and the prospects for studying its cosmic evolution with LOFAR	251
<i>L. Bîrzan, D. A. Rafferty, M. Brüggen & the LOFAR Team</i>	

Jet-gas interactions at crucial jet power for feedback	260
<i>D. M. Worrall & M. Birkinshaw</i>	
X-ray jets and nuclear emission in low redshift early-type galaxies.....	266
<i>C. Jones, W. Forman, E. Churazov & P. Nulsen</i>	
Radio source evolution from galaxy core to intracluster medium	271
<i>T. Maciel & P. Alexander</i>	
Unraveling AGN feedback and ICM physics with deep <i>Chandra</i> X-ray observations of the galaxy group NGC 5813	277
<i>S. W. Randall, P. E. J. Nulsen, C. Jones, W. R. Forman, T. E. Clarke & E. L. Blanton</i>	
Radio jets clearing the way through galaxies: the view from HI and molecular gas	283
<i>R. Morganti</i>	
Evidence for jet driven outflows: the case of 3C293	289
<i>E. K. Mahony, J. B. R. Oonk, R. Morganti, T. A. Oosterloo, B. H. C. Ements & C. N. Tadhunter</i>	
Dust heating in the cores of 3CRR radio galaxies.....	294
<i>M. Birkinshaw, D. M. Worrall & A. Bliss</i>	
The cluster environments of radio-loud AGN	299
<i>J. Ineson, J. Croston, M. Hardcastle, R. Kraft, D. Evans & M. Jarvis</i>	
Using radio jets of PKS J0334-3900 to probe the intra-cluster medium in A3135	301
<i>L. Pratley, M. Johnston-Hollitt, S. Dehghan & M. Sun</i>	
The implications of bent jets in galaxy groups	303
<i>D. M. Nielsen & E. M. Wilcots</i>	
The 3C Chandra snapshot survey.....	305
<i>A. Paggi, F. Massaro & D. E. Harris</i>	
Cosmological Evolution of Jet Progenitors	
Supermassive black holes (SMBH) at work: M87, a case study of the effects of SMBH outbursts	309
<i>W. Forman, E. Churazov, C. Jones & A. Vikhlinin</i>	
Extragalactic jets as probes of distant clusters of galaxies and the clusters occupied by bent radio AGN (COBRA) survey	315
<i>E. L. Blanton, R. Paterno-Mahler, J. D. Wing, M. L. N. Ashby, E. Golden-Marx, M. Brodwin, E. M. Douglass, S. W. Randall & T. E. Clarke</i>	
Using the morphology and magnetic fields of tailed radio galaxies as environmental probes	321
<i>M. Johnston-Hollitt, S. Dehghan & L. Pratley</i>	
Jets in AGN at extremely high redshifts	327
<i>L. I. Gurvits, S. Frey & Z. Paragi</i>	
Linking the central engine to the jet properties in radio loud AGN	329
<i>A. Olguín-Iglesias, J. León-Tavares, V. Chavushyan, E. Valtaoja, C. Añorve, K. Nilsson, J. Kotilainen & M. Tornikoski</i>	

Close to the Black Hole: Launching Jets

On the relation between the AGN jet and accretion disk emissions	333
<i>V. Petrosian & J. Singal</i>	
A strong radio brightening at the jet base of M87 during the elevated very-high-energy γ -ray state in 2012	340
<i>K. Hada, M. Giroletti, M. Kino, G. Giovannini, F. D' Ammando, C. C. Cheung, M. Beilicke, H. Nagai, A. Doi, K. Akiyama, M. Honma, K. Niinuma, C. Casadio, M. Orienti, H. Krawczynski, J. L. Gómez, S. Sawada-Satoh, S. Koyama, A. Cesarini, S. Nakahara & M. A. Gurwell</i>	
Pinpointing the base of the AGN jets through general relativistic X-ray reverberation studies	346
<i>D. Emmanoulopoulos</i>	
AGN dusty plasma polarization features	352
<i>E. D. Lopez & S. Deustua</i>	

Extragalactic and Galactic Jet Synergies

Synergies in extragalactic and Galactic jet research	361
<i>G. E. Romero</i>	
Jet-induced star formation by a microquasar	370
<i>I. F. Mirabel, S. Chaty, L.F. Rodríguez & M. Sauvage</i>	
Explaining the flat-spectrum radio core Sgr A* with GRMHD simulations of jets	374
<i>M. A. Mościbrodzka</i>	
Simulations of flux variability of oscillating accretion fluid tori around Kerr black holes	380
<i>P. Bakala, K. Goluchová, E. Šrámková, A. Kotrllová, G. Török, F. H. Vincent & M. A. Abramowicz</i>	
Inhomogeneous SSC model for the γ -ray production in jets of microquasars	382
<i>P. Banasinski & W. Bednarek</i>	
Are jet ubiquitous in ULXs?	384
<i>A. Wolter, G. Ghisellini, L. Costamante & F. Pintore</i>	
Gas outflow in Seyfert galaxies: 3D radiative cooling hydrodynamical simulations	386
<i>C. Melioli & E. M. de Gouveia Dal Pino</i>	
Fourier plane modeling of the jet in the galaxy M81	388
<i>A. Ramessur, M. F. Bietenholz, L. L. Leeuw & N. Bartel</i>	
The story of one Seyfert: from intriguingly ultrasoft to unremarkably average . .	390
<i>R. L. C. Starling, C. Done & C. Jin</i>	
To BEam or not to BEam	392
<i>L. Izzo, M. Della Valle & L. Amati</i>	
Study of pulse structure and radiative mechanisms associations of long GRBs at $z \sim 1$	394
<i>J. Quiroga & N. Vásquez</i>	

The “Christmas burst” GRB 101225A revisited	396
<i>C. C. Thöne, A. de Ugarte Postigo, C. L. Fryer & D. A. Kann</i>	
First spectroscopy of a short-hard GRB: the environment of a compact object merger	398
<i>A. de Ugarte Postigo, C. C. Thöne, A. Rowlinson, R. G. Benito, A. J. Levan, J. Gorosabel, P. Goldoni & S. Schulze</i>
