

Table of Contents

Introduction	ix
1. Basics of Nuclear Physics	1
1.1 Peculiarities of the Processes in Microcosm	1
1.2 Constitution of Nucleus	3
1.3 Radioactive Decay and Radioactive Radiations	5
1.4 The Radioactive Decay Law	6
1.5 The Radioactive Chains	8
1.6 X-rays	10
1.7 Interaction of Ionizing Radiation With Matter	12
1.8 Elements of Dosimetry	21
1.9 Radiation Detection	26
1.10 Natural Radiation Background	27
References	33
2. Basics of Biology	35
2.1 Cell Structure	35
2.2 Genetic Processes	46
2.3 Abnormalities in the Genetic Apparatus: Mutations	55
2.4 Carcinogenesis	60
2.5 Cancer and Age	67
References	71
3. Evaluation of the Action of Hazardous Factors on a Human	75
3.1 Calculating Risks	75
3.2 Verification of Tests	80
3.3 Probit Analysis	82
References	85

4. Effect of Ionizing Radiation on Biological Structures	87		
4.1 Physical Stage	87		
4.2 Physicochemical Stage	91		
4.3 Chemical Stage	99		
4.4 Biological Effects of Exposure to Radiation	102		
4.5 Radiation Sickness	118		
4.6 Radon and Internal Exposure	123		
References	129		
5. The Effect of Chemicals on Biological Structures	133		
5.1 Chemicals	133		
5.2 The Toxic Effects of Chemicals	150		
5.3 Methods of Carcinogen Screening	158		
5.4 Chemical Carcinogenesis Databases	173		
References	176		
6. Radiation and Chemical Hormesis	181		
6.1 Definition of “Hormesis”: Arndt–Schulz Law	181		
6.2 The Definition of “Low Doses”	182		
6.3 Radiobiology Paradigm	186		
6.4 Chemical Hormesis	187		
6.5 Radiation Hormesis	190		
6.6 Danger and Safety of Low-Dose Radiation and Chemicals	207		
References	210		
7. The Synergic Effect of Radiation and Chemical Agents	215		
7.1 Smoking	216		
7.2 The Diet	217		
7.3 Problems of Radiation Therapy	217		
References	218		
		8. The Methods of Pharmacological Defense: Antidotes, Antimutagens, Anticarcinogens, and Radioprotectors	219
		8.1 Antidotes	219
		8.2 Methods of Chemical Defense From Carcinogens	220
		8.3 Radioprotectors	221
		References	223
		9. The Regulation of Radiation and Chemical Safety	225
		9.1 The Regulation of Radiation Safety	225
		9.2 Chemical (Carcinogenic) Safety Regulation	228
		References	231
		Conclusion	233
		Subject Index	237
