Source Code Listings .....	<i>page</i> xi
Preface .....	xiii
Audience .....	xiii
General Considerations .....	xiii
Organization .....	xiv
<b>1. Introduction</b> .....	1
1.1 Acknowledgments .....	1
1.2 Typographical Conventions .....	1
1.3 Source Code Listings .....	2
<b>2. General Principles</b> .....	3
<b>3. Formatting Conventions</b> .....	9
3.1 Source Form .....	9
3.2 Case .....	10
3.3 Indentation .....	13
3.4 White Space .....	17
3.5 Statements and Expressions .....	20
3.6 Symbols and Numbers .....	22
<b>4. Naming Conventions</b> .....	24
4.1 Modules, Procedures, and Types .....	24
4.2 Supplemental Notation .....	27
4.3 Data Objects .....	30
4.4 Construct Blocks .....	34
<b>5. Documentation Conventions</b> .....	38
<b>6. Programming Principles</b> .....	44
6.1 Standards Conformance .....	44
6.2 Module Design .....	44
6.3 Procedure Arguments .....	50
6.4 Argument Verification .....	82
6.5 Recursive Procedure Design .....	86
6.6 State, Side Effects, and Thread Safety .....	90

<b>7. Programming Conventions</b> .....	98
7.1 Declaration and Initialization of Data Objects .....	98
7.2 Allocatable and Pointer Attributes .....	102
7.3 Dynamic Data Attributes .....	128
7.4 Control Flow .....	133
7.5 Character String Expressions .....	138
<b>8. Input and Output</b> .....	140
8.1 General I/O Operations .....	140
8.2 Formatted, Unformatted, and Stream I/O .....	155
8.3 Messages .....	163
<b>9. Packaging Conventions</b> .....	165
9.1 Files .....	165
9.2 External Procedures .....	165
9.3 Submodules .....	167
<b>10. Generic Programming</b> .....	171
10.1 Generic Code Techniques .....	172
10.2 Preprocessor Replication .....	179
<b>11. Object Orientation</b> .....	183
11.1 Type and Class Design .....	184
11.2 Creation, Construction, Initialization, and Assignment .....	189
11.3 Type-Bound Procedures and Procedure Pointer Components .....	197
11.4 Inheritance .....	208
11.5 Polymorphism .....	212
<b>12. Parallel Processing</b> .....	216
12.1 Preliminary Considerations .....	217
12.2 Parallel Program Patterns .....	220
12.3 Fortran 2008 Parallel Processing .....	242
<b>13. Numerical Types, Kinds, and Operations</b> .....	247
13.1 The Concept of KIND .....	247
13.2 Floating-Point Operations .....	249
13.3 Floating-Point Exceptions .....	253
13.4 Bit Manipulation .....	258
<b>14. C Interoperability</b> .....	262
<b>15. Updating Old Programs</b> .....	271
15.1 Statements .....	271
15.2 Techniques .....	282
15.3 Nonstandard Features .....	284

<b>A. Source Code</b> .....	289
A.1 Type_bound_demo .....	289
A.2 Unlimited_demo .....	295

<b>B. Rule List</b> .....	308
---------------------------	-----

Bibliography .....	321
Index .....	327
