Par	rt I A	Arts and Nonlinear Systems: 'Nonlineart'	
1	Intro	oduction	3
2	Bou 2.1	ndaries in Visual Perception and the Arts Is Our Visual Perception Two Dimensional or Three	9
		Dimensional?	11
	2.2	Message of the Frame	14
	2.3	Importance of the Frame to the Image Inside	17
	2.4	What Type of Mathematics Does Our Visual Brain Possess?	25
	2.5	Framed Versus Non-Framed	31
		2.5.1 The Necessity of a Frame	33
		2.5.2 Framed Paintings of Canvases	35
		2.5.3 Eliminating Frame Effects	37
		2.5.4 Frameless: Greek Pottery, Vermeer, and Feynman	45
	2.6	Perception of Image Boundaries	51
		2.6.1 Illusions and Frames	53
		2.6.2 Biocybernetics	61
		2.6.3 Representations of Boundaries in the Left	
		and Right Cerebral Hemispheres	71
	2.7	René Magritte and Bernhard Riemann	73
3	Bou	ndaries in Social Systems	79
	3.1	Social Science Approach to Boundaries	79
		3.1.1 Social and Collective Identity	80
		3.1.2 Class, Ethnic, and Gender Inequality	81
		3.1.3 Professions, Science, and Knowledge	81
		3.1.4 Communities, National Identities, and Spatial	
		Boundaries	82
	3.2	Social Boundaries and Networks	82
	3.3	Impact of Social Boundaries in Social Relations	84
	3.4	Mathematical Approaches to Social Boundaries	87

25	Social	Distance: Euclidean Metric	80		
5.5	Social	Distance. Euclidean Metric	09		
3.6	Social Distance: Ultrametric				
3.7	Social	Topological Boundaries	95		
3.8	Social	Topological Patterns	97		
	3.8.1	Growth Models	97		
	3.8.2	Cooperation and Patterns	100		
	3.8.3	Multivariate Networks	101		
	3.8.4	Pattern Formation in Unstable Social Systems	104		

Part II Mathematical Language

4	Conti	nuous Mathematics	111
	4.1	Intuitive Introduction to Topology	111
		4.1.1 Separation	114
		4.1.2 Compactness	117
		4.1.3 Connectedness and Connectivity	117
	4.2	Topological Boundary	119
	4.3	Manifold Boundary	120
	4.4	Forms and the Lie Derivative	122
	4.5	Fiber Bundles and Covariant Derivative	129
	4.6	Is the Lagrangian Derivative a Lie or a Covariant Derivative?	134
	4.7	Deformation of the Boundary	140
	4.8	Differential Topology of Boundaries: Cobordism	149
5	Discr	ete Mathematics	155
	5.1	Structured Finite Sets	156
	5.2	Formal Theory of Graphs	156
	5.3	Algebraic Theory and Spectra of Graphs	162
		5.3.1 Relations Between Eigenvalues and the Diameter	167
		5.3.2 Relations Between Eigenvalues and Connectivity	169
		5.3.3 Relations Between Eigenvalues	
		and the Topology of a Graph	169
		5.3.4 Relations Between Eigenvalues and Paths	170
		5.3.5 Other Relations Between Eigenvalues	171
	5.4	Graph Topology and Boundaries	173
		5.4.1 The Graph Topology and the Diameter	173
		5.4.2 Embeddings	176
		5.4.3 Isoperimetric Problems	179
		5.4.4 Separations	182
		5.4.5 Expanders	184
	5.5	Algebraic Topology	186
	5.6	Classification of Continuous Structure by Discrete Criteria	193
	5.7	Triangulations and CW Complexes	195
	5.8	Connecting Discrete and Continuous	198
