

# CONTENTS

<i>Preface</i>	<i>vii</i>
<i>Future Contributions</i>	<i>ix</i>
<i>Contributors</i>	<i>xiii</i>
<i>Erratum</i>	
<b>1. Utilizing the Eigen-Emittance Concept for Bright Electron Beams</b>	<b>1</b>
Leanne Delma Duffy and Alex J. Dragt	
1. Introduction	1
2. Theory	3
3. Construction of Initial Distributions	29
4. Applications to Bright Electron Beams	32
5. Summary and Discussion	42
References	43
<b>2. Analytical Methods for the Calculation and Simulation of New Schemes of Static and Time-of-Flight Mass Spectrometers</b>	<b>45</b>
Igor Spivak-Lavrov	
1. Introduction	46
2. Analytical Equations for Calculating the Dynamics of the Charged Particle Beam and Their General Properties	50
3. Analytical Methods of Calculating 2D Fields and Fields Reduced to the 2D Ones	68
4. Numerical Calculation of Instrument Characteristics of Static and TOF Mass Spectrometers	97
5. Summary and Conclusions	124
Acknowledgments	125
References	125
<i>Contents of Volumes 151–192</i>	<i>129</i>
<i>Index</i>	<i>137</i>
