Contents

1	Intr	oduction	1
	1.1	Equations of Motion of Hydrodynamic Media	2
	1.2	Invariant Properties of Hydrodynamic Media	7
	1.3	Properties of Vortex Motions	10
	References		
2	Dynamics of Point Vortex Singularities		
	2.1	Vortex Structures	15
	2.2	General Theory of Point Singularities	
		in Two-Dimensional Nonviscous Hydrodynamics	26
	2.3	Motion of Point Vortices	33
	2.4	Interaction of a Point Vortex and a Dipole	37
	2.5	Motion of a Dipole Point Vortex in Areas with Boundaries	53
	2.6	The Evolution of a Dipole-Type Point Vortex in a Circular Area	63
	Refe	prences	71
3	Influence of Potential Waves on Point Vortex Motion		
	3.1	The Mechanism of the Influence of Waves on Vortex Motion	75
	3.2	Influence of the Wave on the Interacting Vortex Pair	78
	3.3	Dynamics of Vortices in Large Wave Envelope	100
	3.4	Interaction of Resonances with Attractor in Reversible Systems	107
	3.5	Vortex Motion Equation in Potential Wave Field Near the Wall	115
	Refe	prences	128
4	Nontrivial Stationary Vortex Configurations		
	4.1	Vortex Necklaces	129
	4.2	Vortex Structures with Complex Point Singularities	141
	4.3	Topological Nontrivial Vortices in a Hydrodynamic Medium	161
