<b>1. Biological Structures</b>	1
<i>Zoe Fisher, Andrew Jackson, Andrey Kovalevsky, Esko Oksanen, and Hanna Wacklin</i>	
<b>1.1 Introduction: Neutrons and Biological Structures</b>	2
<b>1.2 Diffraction</b>	3
1.2.1 Macromolecular Crystallography	3
1.2.2 Neutron Fiber Diffraction	11
<b>1.3 Small-Angle Neutron Scattering (SANS)</b>	12
1.3.1 SANS Instrumentation	13
1.3.2 Sample Preparation	15
1.3.3 Data Processing and Analysis	19
<b>1.4 Neutron Reflectometry</b>	22
1.4.1 Specular and Off-Specular Reflection	23
1.4.2 Grazing-Incidence SANS (GISANS)	24
1.4.3 Instruments	25
1.4.4 Experimental Considerations	25
1.4.5 Data Analysis and Refinement	31
<b>1.5 Membrane Diffraction</b>	36
1.5.1 Instruments, Data Collection, and Analysis	37
1.5.2 Experimental Considerations	37
<b>1.6 Deuterium Labeling for Biological Structure Determination</b>	37
1.6.1 Protein Deuteration	38
1.6.2 Biopolymer Deuteration	41
1.6.3 Biomembrane and Small Molecule Deuteration	41
1.6.4 Current and Future Deuteration Facilities	43
<b>1.7 Scientific Highlights</b>	45
1.7.1 Neutron Protein Crystallography	45
1.7.2 Fibre Biomaterials and Structural Biopolymers	52
1.7.3 Protein Solution Structures	54
1.7.4 Membrane Structures and Proteins in Membranes	56
1.7.5 Biomedical Applications and Biomaterials	63
<b>1.8 Future Perspectives</b>	65
<b>References</b>	65

<b>2. Dynamics of Biological Systems</b>	77
<i>Tilo Seydel</i>	
<b>2.1 Introduction</b>	78
<b>2.2 Fundamental Aspects and Overview</b>	80
2.2.1 Neutron Spectroscopy Fundamentals to Study Biological Systems	80
2.2.2 Disambiguation of Symbols	81
2.2.3 Collective and Self-Correlation Functions	81
2.2.4 Observable Quantities	82
2.2.5 Past and Present Topics in the Dynamics of Biological Systems	83
<b>2.3 Concepts of Diffusion</b>	84
2.3.1 Diffusion Fundamentals	84
2.3.2 Diffusion in Colloidal Suspensions	87
2.3.3 Diffusion in Confined Geometries	91
2.3.4 Fractional Generalization of the Diffusion Equation	93
<b>2.4 Macromolecules in Aqueous Solutions</b>	96
2.4.1 Center-of-Mass Diffusion	96
2.4.2 Internal Molecular Motions	98
<b>2.5 Numerical Methods: Data Analysis</b>	101
2.5.1 Reducing and Fitting Spectra	101
2.5.2 Modeling of the Solvent Water Contribution	103
2.5.3 Separation of the Rotational and Translational Diffusions	103
2.5.4 Molecular Dynamics Simulations	105
<b>2.6 Spectrometers to Study Biological Dynamics</b>	106
2.6.1 Types of Spectrometers for Biological Dynamics	106
2.6.2 Types of Measurements	107
2.6.3 Recent Advances in Neutron Optics	108
2.6.4 Practical Aspects of Experiments on Biological Samples	112
<b>2.7 Neutron Spectroscopy in the Context of Complementary Methods</b>	114
2.7.1 Dynamic Light Scattering (Visible and X-Ray Photons) and Other Photon Methods	114
2.7.2 Nuclear Magnetic Resonance	115
2.7.3 Fluorescence Correlation Spectroscopy	116
<b>2.8 Applications</b>	116
2.8.1 Proteins as Hydrated Powders	116
2.8.2 Proteins in Solution, Crowding, and Cluster Formation	118
2.8.3 Membrane Vesicles	122
2.8.4 Planar Lipid Membranes	123
2.8.5 Biological Fibers	124
2.8.6 Other Systems	126
<b>2.9 Future Perspectives</b>	127
<i>References</i>	128

<b>3. The Structure of Water and Aqueous Systems</b>	135
<i>Alan K. Soper</i>	
<b>3.1 Introduction</b>	136
3.1.1 Water Controversies	137
3.1.2 Water: The Role of Neutron Scattering	140
3.1.3 Scope of This Chapter: What Is Included and What Is Not Included	145
<b>3.2 The Structure of a Liquid and How It Is Measured</b>	146
3.2.1 The Structure of a Liquid	146
3.2.2 The Molecular Pair Correlation Function	148
3.2.3 The Neutron Total Scattering Experiment	150
3.2.4 How the Scattering Data Are Interpreted	157
<b>3.3 Pure Water Substance</b>	163
3.3.1 A Case Study: Ambient Water	164
3.3.2 Beyond the Site-Site Radial Distribution Functions	169
3.3.3 Water Structure: Effect of Temperature and Pressure	172
<b>3.4 Ionic Solutions</b>	179
3.4.1 The Dissimilar Pair, NaCl and KCl	180
3.4.2 Other Studies of Ions in Water	189
<b>3.5 Microheterogeneity in Aqueous Mixtures</b>	190
3.5.1 A Case Study of Alcohol:Water Mixtures	191
3.5.2 Other Studies	197
<b>3.6 Water at Interfaces</b>	198
3.6.1 MCM-41 Substrate	199
3.6.2 Scattering From MCM-41	200
3.6.3 Using the (100) to Characterize Water in Confinement	203
<b>3.7 Toward Ever Greater Complexity—Some Concluding Remarks</b>	205
<i>References</i>	207
<b>4. Ionic Liquids and Neutron Scattering</b>	213
<i>Olga Russina and Alessandro Triolo</i>	
<b>4.1 Introduction</b>	213
<b>4.2 Structure in Ionic Liquids Systems: Microscopic and Mesoscopic Correlations</b>	218
4.2.1 Structure of Neat Compounds	218
4.2.2 Structure of Binary Mixtures Containing Ionic Liquids	231
4.2.3 Macromolecules and Other Large Scale Aggregates Dissolved in ILs	247
<b>4.3 Relaxation Processes in Ionic Liquid Systems</b>	257
<b>4.4 Conclusion and Perspective</b>	269
<i>References</i>	270

<b>5. Catalysis</b>	279
<i>Peter W. Albers, David Lennon, and Stewart F. Parker</i>	
<b>5.1 Introduction—Why Neutrons for Catalysis?</b>	280
<b>5.2 Experimental</b>	283
5.2.1 Design of Experiments	283
5.2.2 Sampling	284
5.2.3 Cell Design	285
5.2.4 Choice of Complementary Methods	286
5.2.5 Industrial Aspects	287
<b>5.3 Production, Formation and Use of Catalysts</b>	289
5.3.1 Catalyst Supports: Carbons	289
5.3.2 Catalyst Supports: Oxides	292
5.3.3 Fresh Catalysts: Water and OH-Groups	292
5.3.4 Pearlman's Catalyst	296
5.3.5 Catalyst Reduction Step	296
5.3.6 Used Catalysts: Preferential Adsorption	298
<b>5.4 Hydrogenation Catalysts</b>	299
5.4.1 Hydrogen in Supported Nano-Particles	299
5.4.2 Methyls on Pd: Catalyst Deactivation	304
5.4.3 Fuel Cell Catalysts	308
5.4.4 Hydrogenation of Nitriles with Raney® Metals	309
<b>5.5 Catalysts for Commodity Chemicals</b>	312
5.5.1 Methyl Chloride Synthesis	312
5.5.2 Fischer-Tropsch Catalysis	319
5.5.3 Synthesis of Acrylics—Methyl Methacrylate	324
5.5.4 Methanol Synthesis	330
5.5.5 Ammonia Synthesis	333
5.5.6 Hydrogen Storage and Production via Oxyhydrides	334
<b>5.6 Outlook: Experimental Limits and New Perspectives</b>	338
5.6.1 Non-Hydrogenous Adsorbates	338
5.6.2 Operando Spectroscopy	339
5.6.3 Homogeneous Catalysis	340
5.6.4 Conclusions	340
<b>References</b>	341
<b>6. Sorbate Dynamics in Zeolite Catalysts</b>	349
<i>Alexander J. O'Malley and C. Richard A. Catlow</i>	
<b>6.1 Introducing Zeolite Catalysts</b>	349
<b>6.2 Studying Dynamics in Zeolites</b>	351
6.2.1 Studying Molecular Diffusion in Zeolites	351
6.2.2 Quantifying Translational Diffusion	352
6.2.3 Localized Motions in Zeolites	357
<b>6.3 Complementarity Between QENS and MD Simulations</b>	360
6.3.1 Recent Improvements in MD Simulations	361
<b>6.4 Hydrocarbon Behaviour in MFI Zeolites</b>	364
6.4.1 <i>n</i> -Alkane Diffusion in Silicalite and Na-ZSM-5	364

<b>6.4.2 Branched Alkane Diffusion in Silicalite and Na-ZSM-5</b>	370
<b>6.4.3 Localised Hydrocarbon Motions in ZSM-5: Benzene</b>	377
<b>6.5 Hydrocarbon Behaviour in the Faujasite Zeolites</b>	381
6.5.1 Propane Dynamics in NaY	381
6.5.2 Pentane Isomer Dynamics in NaY – The Levitation Effect	387
<b>6.6 Dynamics of Methanol in Faujasite and MFI Zeolites</b>	391
6.6.1 Localised Motions in ZSM-5	391
6.6.2 Methanol Diffusion in HY	394
<b>6.7 Conclusion</b>	398
<b>Acknowledgments</b>	398
<b>References</b>	398
<b>7. Atomic Quantum Dynamics in Materials Research</b>	403
<i>Carla Andreani, Roberto Senesi, Matthew Krzystyniak, Giovanni Romanelli, and Felix Fernandez-Alonso</i>	
<b>7.1 Aim and Scope</b>	404
<b>7.2 Conceptual Framework</b>	406
7.2.1 Atoms Are Quantum Objects	406
7.2.2 Epithermal Neutrons Probe the Quantum Character of Atoms	410
7.2.3 Atoms and Their Local Chemical Environment	414
7.2.4 Link to Materials Modeling and Theory	417
<b>7.3 Practice of Spectroscopy With Epithermal Neutrons</b>	420
7.3.1 Anatomy of a Measurement	420
7.3.2 VESUVIO Spectrometer	427
<b>7.4 Whetting Your Appetite for More: Case Studies</b>	432
7.4.1 From Order to Disorder in Water	432
7.4.2 Molecular Intercalation in Nanostructured Media	435
7.4.3 Beyond Hydrogen: From Lithium to Dental Cements	440
<b>7.5 Perspectives and Outlook</b>	446
7.5.1 Current Capabilities and Beyond	446
7.5.2 Tackling Disordered Systems	449
<b>Funding</b>	450
<b>A.1 Position Uncertainty for a Particle in a Box</b>	451
<b>A.2 Hermite Polynomials</b>	451
<b>A.3 Position and Momentum Uncertainties for an Ensemble of Quantum Particles</b>	451
<b>Acknowledgments</b>	452
<b>References</b>	453
<b>8. Soft Condensed Matter</b>	459
<i>Mitsuhiko Shibayama</i>	
<b>8.1 Introduction</b>	460
8.1.1 Soft Condensed Matter	460

8.1.2 Energy Related to Soft Matter	462
8.1.3 Energy Dispersion	463
8.1.4 Dynamics	463
<b>8.2 Basic Theory of Neutron Scattering for Soft Condensed Matter</b>	
8.2.1 Scattering Vector and Scattering Intensity	465
8.2.2 Coherent Scattering and Incoherent Scattering	466
8.2.3 Elastic Scattering and Inelastic Scattering	468
8.2.4 Scattering Length Density	468
8.2.5 Scattering Length Density Distribution Function and Correlation Function	470
8.2.6 Transmission	470
8.2.7 Multiple Scattering and Background Scattering	471
<b>8.3 Neutron Scattering Instruments and Methodologies</b>	
8.3.1 Small-Angle Neutron Scattering (SANS)	474
8.3.2 Neutron Reflectivity (NR)	478
8.3.3 Inelastic Neutron Scattering (INS)	481
<b>8.4 Polymeric Systems</b>	
8.4.1 Polymer and Neutron Scattering	484
8.4.2 Scattering Functions of Polymeric Systems	486
<b>8.5 Rubbers and Gels</b>	
8.5.1 Scattering Functions of Polymer Gels: Effects of Cross-Linking	491
8.5.2 Charged Gels	495
8.5.3 Physical Gels	498
<b>8.6 Breakthrough Works in Polymer Sciences</b>	
8.6.1 Size of Polymer Chains	500
8.6.2 Critical Phenomena in Polymer Blends	501
8.6.3 Quantum-Phase Separation of Isotope Blends	503
8.6.4 Direct Observation of Reptation Motion of Molten Polymer by Spin Echo Spectroscopy	503
8.6.5 Order-Disorder Transition of Block Copolymer Thin Films	505
8.6.6 Volume Phase Transition of Polymer Gels	505
8.6.7 Contrast Variation SANS on Surfactant Effects of Block Copolymers	506
<b>8.7 New Directions</b>	
8.7.1 Poloxamer	508
8.7.2 Kinetics of Amphiphilic Molecules in Lipid Vesicles	509
8.7.3 Shish-Kebab Structure	510
8.7.4 Structure Formation of Ion-Pair and Salt	511
8.7.5 Tough Polymer Gels	511
<b>8.8 Future Directions of Neutron Scattering in Soft Condensed Matter</b>	
8.8.1 High-Resolution/High-Brilliance SANS	518
8.8.2 Complementary SANS and SAXS	518
8.8.3 Computational-Science-Aided Neutron Scattering	519

8.8.4 High-Pressure Experiments	522
8.8.5 Rheo-SANS	526
<b>Appendix A. Scattering Functions of Spheres With Interparticle Interactions</b>	
A.1 Scattering Function of Isolated Spheres	530
A.2 Interparticle Interference	530
A.3 Debye Equation for Spherical Systems	530
A.4 Fournet Equation	531
A.5 Ornstein-Zernike Function	531
A.6 Percus-Yevick Equation	533
A.7 Modified Percus-Yevick Equation	534
A.8 Hayter-Penfold Equation	535
A.9 Freltoft-Kjems-Sinha Equation	536
<b>Appendix B. Contrast Variation</b>	
B.1 Two-Component Systems	537
B.2 Multicomponent Systems	537
B.3 Contrast Matching Method	537
B.4 Contrast Variation Method	538
B.5 Physical Meaning of the Partial Structure Factor	539
<b>References</b>	540
<b>9. Ionic Conductors and Protonics</b>	547
<i>Maths Karlsson and Adrien Perrichon</i>	
<b>9.1 Solid-State Ionics</b>	547
<b>9.2 Proton Conductors</b>	550
9.2.1 Proton Conducting Oxides/Perovskites	551
9.2.2 Mechanisms of Proton Diffusion	552
<b>9.3 Oxide-Ion Conductors</b>	552
9.3.1 Oxide-Ion Conducting Oxides	554
9.3.2 Mechanisms of Oxide-Ion Diffusion	555
<b>9.4 Neutron Scattering</b>	556
9.4.1 Role/Capacity of Neutron Scattering	556
9.4.2 Neutron Scattering and Computer Simulations	557
<b>9.5 Case Studies</b>	559
9.5.1 Neutron Diffraction	559
9.5.2 Neutron Reflectivity	563
9.5.3 Inelastic Neutron Scattering	564
9.5.4 Quasielastic Neutron Scattering	568
9.5.5 Case Studies on Other Structure Types	573
<b>9.6 Perspectives</b>	575
<b>Acknowledgments</b>	576
<b>Abbreviations of Commonly Used Words in Alphabetical Order</b>	576
<b>References</b>	576

<b>10. High-Temperature Levitated Materials</b>	583	11.6 Other Future Applications of High Pressure	672
<i>Louis Hennet, Dirk Holland Moritz, Richard Weber, and Andreas Meyer</i>		11.7 Summary	675
10.1 Introduction	583	Appendix A	675
10.2 Theoretical Background/Data Analysis	585	References	676
10.2.1 Structure (WANS)	585		
10.2.2 Dynamics (QENS)	587		
10.3 Neutron Scattering Instruments	590	<b>12. Engineering Applications</b>	683
10.3.1 For WANS Experiments	590	<i>Wanchuck Woo, Masato Ohnuma, and Xun-Li Wang</i>	
10.3.2 For QENS Experiments	591	12.1 Introduction	683
10.4 Levitation Techniques	592	12.2 Residual Stress Measurements	687
10.4.1 Aerodynamic Levitation (CNL)	593	12.2.1 Principle of Strain Measurements	689
10.4.2 Electromagnetic Levitation (EML)	599	12.2.2 Enhanced Capability of Deep Penetration by Neutron Diffraction	691
10.4.3 Electrostatic Levitation (ESL)	601	12.2.3 Practical Issues in Neutron-Diffraction Measurements of Residual Stresses	692
10.4.4 Temperature Measurements	604	12.2.4 Examples of Engineering Applications	694
10.5 Structural Investigations	604	12.3 In-Situ Study of Deformation and Phase Transformation	701
10.5.1 Study of Metallic Melts	604	12.3.1 Experimental Considerations	702
10.5.2 Study of Oxide Melts	612	12.3.2 Case Studies	704
10.6 Dynamical Investigations	620	12.4 Small-Angle Neutron Scattering	718
10.6.1 Study of Metallic Melts Using EML	620	12.4.1 Measurement Theory	718
10.6.2 Study of Metallic Melts Using ESL	625	12.4.2 Practical Aspects of Analysis in Metals and Alloys	719
10.6.3 Experiments Using CNL	626	12.4.3 Which Form Factor to Use?	723
10.7 Conclusion and Perspectives	630	12.4.4 Quantitative Evaluation of Volume Fraction— Importance of Scattering Length Density	724
Acknowledgments	632	12.4.5 Magnetic Scattering and "A" Value in Steel	725
References	632	12.4.6 Another Way to Use Different Contrast: Combination of SANS and SAXS	726
<b>11. High-Pressure Neutron Science</b>	637	12.4.7 Further Expansion of SANS as a Daily Tool With a Compact Neutron Source	728
<i>Malcolm Guthrie</i>		12.5 Summary and Outlook	729
11.1 Introduction	637	Acknowledgments	730
11.2 High-Pressure Instrumentation	639	References	730
11.2.1 The Beginnings of High-Pressure Instrumentation	639		
11.2.2 The Diamond Anvil Cell (DAC)	642	<b>Index</b>	739
11.2.3 The Rise of Synchrotrons	644		
11.2.4 Neutron Instrumentation at High Pressure	646		
11.3 Data Reduction Considerations for High Pressure Cells	648		
11.3.1 The Cell Background	649		
11.3.2 Cell Attenuation	650		
11.4 High-Pressure Neutron Facilities	653		
11.4.1 Reactor Sources	654		
11.4.2 Spallation Sources	657		
11.4.3 The European Spallation Source	662		
11.5 High-Pressure Neutron Science	664		
11.5.1 Biological Systems	664		
11.5.2 Chemistry and Materials Science	666
