## Part I Basic Concepts

<b>1</b>	<b>Introduction</b>	3
1.1	Motivation	3
1.2	Historical Perspective	4
1.3	Modern Approaches	5
	References	9
<b>2</b>	<b>Polarized Light</b>	11
2.1	Polarization of Coherent Electromagnetic Radiation	11
2.1.1	Maxwell's Theory of Electromagnetic Radiation	11
2.1.2	The Polarization Ellipse	13
2.1.3	Parameterization of Polarization: Stokes Vectors	14
2.1.4	The Principal Frame	16
2.1.5	The Poincaré Sphere	17
2.2	Electric Dipole Radiation from Atomic Transitions	17
2.2.1	Coordinate Frames, Scattering Amplitudes, and Stokes Parameters	17
2.2.2	Atomic State Parameters, Electron Charge Clouds, and Their Experimental Determination	23
2.2.3	The Incoherent Case with Conservation of Atomic Reflection Symmetry	27
2.2.4	The Incoherent Case Without Conservation of Atomic Reflection Symmetry	28
2.2.5	Summary of Parameterization for P-State Excitation	31
2.2.6	Extension to Coherently Excited Stark Manifolds	31
	Exercises	34
	References	35
