<b>1. Magnetic Relaxation of Lanthanide-Based Molecular Magnets</b>	<b>1</b>
<i>Elena Bartolomé, Ana Arauzo, Javier Luzón, Juan Bartolomé, and Fernando Bartolomé</i>	
<b>1 Introduction</b>	<b>2</b>
<b>2 Electronic Structure, Magnetism, and Relaxation of Lanthanide Ions</b>	<b>6</b>
2.1 Electronic Structure of the Lanthanides	6
2.2 Mechanisms of Magnetic Relaxation of Molecules	12
2.3 Magnetic Interactions	24
2.4 Beyond the Anisotropy Barrier: Energy Spectrum and Relaxation Times	31
2.5 Summary	33
<b>3 Computational Tools and Theoretical Methods</b>	<b>35</b>
3.1 Introduction	35
3.2 Electrostatic Models	35
3.3 Quantum Chemistry Methods	41
3.4 CASSCF–CASPT2/RASSI-SO Method	45
<b>4 Experimental Methods for Investigation of Relaxation Mechanisms in Lanthanide Molecular Magnets</b>	<b>60</b>
4.1 Introduction	60
4.2 DC Magnetization and AC Susceptibility Experiments	61
4.3 Heat Capacity Measurements	76
4.4 Spectroscopic Methods	84
4.5 Conclusions	101
<b>5 Lanthanide-Based SIMs</b>	<b>101</b>
5.1 Introduction	101
5.2 Influence of the Lanthanide Ion	103
5.3 Crystal Field Environment	117
5.4 Conclusions and Outlook	137
<b>6 Dinuclear Lanthanide-Based SMMs</b>	<b>139</b>
6.1 Homo Dinuclear [Ln <sub>2</sub> ] SMMs	139

6.2	Heterodinuclear SMMs	163
6.3	Conclusions	167
<b>7</b>	<b>Polynuclear Lanthanide-Based SMMs</b>	168
7.1	Introduction	168
7.2	Homonuclear Ln Clusters ( $\text{Ln}_x$ , $x > 2$ ): SMTs and SMMs	168
7.3	Heteronuclear Ln-3d Clusters	182
7.4	Conclusions	194
<b>8</b>	<b>1D, 2D, and 3D Extended Systems</b>	196
8.1	1D Molecular Magnets	197
8.2	Higher Dimensionality	215
8.3	Conclusions	226
<b>9</b>	<b>Molecular Magnets on Surfaces</b>	226
9.1	Selected Molecular Systems	232
9.2	Experimental Techniques	233
9.3	Surfaces and Substrates	235
9.4	Devices	240
9.5	Conclusions and Outlook	245
<b>10</b>	<b>Conclusions and Perspectives</b>	246
	<b>Acknowledgments</b>	251
	<b>References</b>	251
<b>2.</b>	<b>Laser-Induced Ultrafast Magnetic Phenomena</b>	291
	<i>Karel Carva, Pavel Baláz, and Ilie Radu</i>	
<b>1</b>	<b>Introduction</b>	292
<b>2</b>	<b>Theoretical Approaches to Describe Laser-Induced Magnetization Dynamics</b>	297
2.1	Phenomenological Description of Laser-Driven Spin Dynamics	298
2.2	Derivation of Relativistic Effects	300
2.3	Interaction Between Light and Magnetic Medium	304
2.4	Magnetization Dynamics in the Ultrafast Range	310
2.5	Ab Initio Methods for Calculating Exchange Interactions, Magneto-Optical Response, and Scattering Processes	323
<b>3</b>	<b>Experimental Methods to Study Laser-Induced Magnetization Dynamics</b>	338
3.1	All-Optical Detection Techniques	339
3.2	Time-Resolved Magneto-Optical Spectroscopy	344
3.3	Time-, Energy-, Momentum-, and Spin-Resolved Electron Spectroscopy	346
3.4	Time-, Spatial-, and Element-Resolved X-Ray Measurements of Spin Dynamics	349
3.5	Time-Resolved THz-Based Studies	353
<b>4</b>	<b>Ultrafast Demagnetization</b>	356
4.1	Demagnetization in Transition Metals and Their Compounds or Alloys	356
4.2	Demagnetization in Rare-Earth Based Materials	361
4.3	Demagnetization in Half-Metals, Semiconductors, or Insulators	365

4.4	Discussion of the Relation Between the Observed MO Response and Magnetization	369
4.5	Character of the Demagnetized State	372
<b>5</b>	<b>Ultrafast Magnetization Switching</b>	378
5.1	Early Work on Magnetization Switching	379
5.2	Overview of Laser-Induced Magnetization Switching	383
5.3	Models of Heat-Driven Multisublattice Reversal	394
5.4	Inverse Faraday Effect	398
<b>6</b>	<b>Ultrafast Generation of Spin Currents</b>	402
6.1	Superdiffusive Model and Hot Electron Transport	407
6.2	Thermally Driven Spin Currents	407
6.3	Noncollinear Arrangement and Spin Torques	410
<b>7</b>	<b>Discussion of Underlying Physical Mechanisms</b>	416
7.1	Different Scattering Mechanisms	416
7.2	Spin Transport	428
<b>8</b>	<b>Concluding Remarks and Outlook</b>	431
	<b>Acknowledgments</b>	434
	<b>References</b>	434
	<b>Author Index</b>	465
	<b>Subject Index</b>	499
	<b>Material Index</b>	505
