<b>1</b>	<b>Review of Gyrotron Traveling-Wave Tube Amplifiers</b> .....	1
1.1	Microwave Electronics .....	1
1.2	Electrons Cyclotron Maser and Gyrotron .....	4
1.2.1	The Principle of ECM .....	4
1.2.2	The Characteristics of a Gyrotron .....	6
1.2.3	The Category of Gyrotron Tubes .....	7
1.3	Gyrotron Traveling-Wave-Tube Amplifiers .....	10
1.3.1	The Development of Gyro-TWTs .....	10
1.3.2	Comments on Technologies .....	14
1.3.3	Problems and Prospects .....	19
	References .....	21
<b>2</b>	<b>Fundamental Theory of the Electron Cyclotron Maser</b> .....	27
2.1	Introduction .....	27
2.2	Theory of the Waveguides .....	29
2.2.1	Theory of Uniform Dielectric-Loaded Waveguide .....	30
2.2.2	Theory of Periodic Dielectric-Loaded Waveguide .....	34
2.3	Theory of the Electron Cyclotron Maser in Waveguide System .....	39
2.3.1	Partitioning the Transverse Plane of an ECM System .....	40
2.3.2	The Linear Theory of Dielectric-Lined ECM System .....	42
2.3.3	The Nonlinear Theory of Dielectric-Loaded ECM System .....	45
2.3.4	Basic Concepts .....	47
2.4	Summary .....	50
	Appendix I: Derivation of the Linear Theory in Dielectric-Lined Waveguide .....	50
	1. The Field Expression in GCC .....	51
	2. The Transverse Perturbed Beam Current .....	52
	3. The Laplace Transformation .....	55
	References .....	58

<b>3 Novel Propagation Characteristics of Lossy Dielectric-Loaded Waveguides</b> .....	61
3.1 Introduction .....	61
3.2 Dielectric Loss-Induced Modal Transition.....	63
3.2.1 Eigenvalue and Mode Identification .....	63
3.2.2 Modal Transition.....	66
3.2.3 Modal Degeneration .....	69
3.2.4 Modal Selection.....	71
3.3 Periodic DL Waveguide with Suppressed Property of Periodicity....	74
3.3.1 Eigenvalue and Mode Identification .....	75
3.3.2 Influence of Dielectric Slot Ratio .....	75
3.3.3 Modal Transition in a Periodic Dielectric Waveguide System.....	78
3.3.4 Suppressing the System Periodicity Using Dielectric Loss .....	81
3.4 Mode Mapping .....	82
3.5 Conclusion .....	87
References .....	88
<b>4 Instability Competition in an Ultrahigh Gain Gyro-TWT Amplifier</b> ..	91
4.1 Introduction .....	91
4.1.1 Analysis Method of the Instability Competition .....	92
4.1.2 The Key Factors of Instability Competition .....	93
4.2 Balance Between the Backward Wave and Forward Wave in an Absolute Instability .....	94
4.2.1 Internal Feedback Dynamics of an Absolute Instability .....	96
4.2.2 Magnetic Tuning .....	98
4.2.3 High-Order Axial Mode .....	101
4.2.4 Waveguide Wall Loss .....	104
4.2.5 A Multistage Interaction Gyro-TWT Circuit .....	106
4.3 Oscillation with Multi-steady States .....	109
4.3.1 Self-Consistent Nonlinear Instability Study .....	109
4.3.2 Attenuation Strength of the Lossy Linear Stage.....	110
4.3.3 Multi-steady States of Absolute Instability Oscillation .....	111
4.3.4 Applying Magnetic Field Tapering to Enhance Nonlinear Stage Stability .....	114
4.3.5 Influence of the Downstream Port Reflection .....	116
4.3.6 Pre-bunched ECM Radiation .....	117
4.4 Summary .....	118
References .....	119

<b>5 A Lossy Ceramic-Loaded Millimeter-Wave Gyro-TWT Amplifier</b> ....	121
5.1 Introduction .....	121
5.2 Propagation Characteristics Approximation .....	123
5.2.1 The Propagation Characteristics of the Dielectric-Loaded Waveguide.....	123
5.2.2 Linear and Nonlinear Instability Study .....	126
5.3 Linear Study of Full-Wave Interaction in Dielectric-Loaded Waveguide .....	132
5.3.1 Linear Instability Competition Study .....	133
5.3.2 Linear Growth Rate Study.....	135
5.4 Nonlinear Study of Full-Wave Interaction in Dielectric-Loaded Waveguide .....	137
5.4.1 Nonlinear Instability Competition Study .....	138
5.4.2 Amplification Characteristics .....	140
5.5 Beam-Wave Coupling Strength.....	143
5.6 Summary .....	149
References .....	149
<b>6 Exploring New Mechanisms for High Power Millimeter-Wave Gyrotron Amplifiers</b> .....	151
6.1 Introduction .....	151
6.2 An ECM-Cascaded Amplifier .....	153
6.2.1 The Concept of ECM-Cascaded Amplifier .....	154
6.2.2 Beam-Wave Interaction in an ECM-Cascaded Amplifier .....	155
6.2.3 Discussion.....	157
6.3 High-Order Mode Drift Tube .....	158
6.3.1 The Concept of High-Order Mode Drift Tube .....	158
6.3.2 Beam-Wave Interaction in Overmoded Drift Tube.....	159
6.3.3 Discussion.....	161
6.4 High-Power Gyrotron Amplifier Based on Bi-modes Operation .....	161
6.4.1 The Concept of Bi-modes Operation .....	161
6.4.2 The Principle of Bi-modes Operation.....	163
6.5 High-Power Gyrotron Amplifier Based on ECM-Cascade and Pre-bunching Scheme (Gyro-CPA) .....	164
6.5.1 Key Technologies Related to a Gyro-CPA.....	164
6.5.2 Principle of Amplifier Based on ECM Cascade and Pre-bunching Excitation .....	165
6.5.3 Discussion.....	171
6.6 Conclusion .....	171
References .....	172

<b>7</b>	<b>Technologies Related to Gyrotron Amplifiers</b> .....	175
7.1	Introduction .....	175
7.2	Input Coupler .....	176
7.2.1	A Ka-Band $TE_{11}$ Mode Input Coupler .....	177
7.2.2	A Ka-Band $TE_{01}$ Mode Input Coupler .....	178
7.2.3	A W-Band Multichannel $TE_{01}$ Mode Converter .....	178
7.3	Broadband Output Window .....	181
7.3.1	A Ka-Band $TE_{11}$ Mode Output Window .....	181
7.3.2	A Ka-Band $TE_{01}$ Mode Output Window .....	182
7.4	A Small-Orbit Gun .....	182
7.5	Measurement of Lossy Dielectric Materials .....	185
7.6	Summary .....	190
	References .....	191
