

# Table of Contents

<b>First Part</b>	<b>Laser Insulating Crystals and Their Stimulated Emission</b>	<b>1</b>
<b>Chapter 1</b>	Development of Crystal-Laser Physics (Short Historical Remarks) .....	3
	1.1. Fluorine- and Oxygen-Containing Laser Crystalline Hosts and Their Activator Ions .....	8
	1.1.1. The Laws of Crystal-Field Disorder of $\text{Ln}^{3+}$ Ions in Insulating Laser Crystals .....	8
	1.2. Other Laser Crystals .....	22
	1.3. Stimulated-Emission Channels of Activated Insulating Laser Crystals .....	23
	1.4. Stimulated Emission $4f^N-4f^N$ and $4f^{N-1}5d^1-4f^N$ Channels of $\text{Ln}^{3+}$ Ions .....	34
	1.4.1. Laser Channels of $\text{Ce}^{3+}$ Ions .....	34
	1.4.2. Laser Channels of $\text{Pr}^{3+}$ Ions .....	35
	1.4.3. Laser Channels of $\text{Nd}^{3+}$ Ions .....	38
	1.4.4. Inter manifold Laser Channels of $\text{Sm}^{3+}$ , $\text{Eu}^{3+}$ , $\text{Tb}^{3+}$ , and $\text{Dy}^{3+}$ Ions .....	41
	1.4.5. Laser Channels of $\text{Ho}^{3+}$ Ions .....	41
	1.4.6. Laser Channels of $\text{Er}^{3+}$ Ions .....	44
	1.4.7. Inter manifold Laser Channels of $\text{Tm}^{3+}$ and $\text{Yb}^{3+}$ Ions .....	46
	1.5. Laser Channels of $\text{Ln}^{2+}$ and $\text{U}^{3+}$ Ions .....	46
	1.6. Laser Channels of $\text{Cr}^{3+}$ , $\text{Cr}^{4+}$ , $\text{Ti}^{3+}$ , and $\text{Mn}^{5+}$ Ions ...	49
	1.7. Laser Channels of $\text{TM}^{2+}$ Activators .....	53
	1.8. Crystalline Laser Hosts for Obtaining Generation of $\text{Ln}^{3+}$ Activators at New Wavelengths .....	55
	1.8.1. Laser Channels of $\text{Ln}^{3+}$ Activators in Cubic Garnet Crystals .....	58
	1.8.2. Laser Channels of $\text{Ln}^{3+}$ Activators in Orthorhombic Crystals of $\text{RAlO}_3$ Type ( $\text{R} = \text{Y}$ and $\text{Ln}$ ) .....	58
	1.8.3. Laser $4f^N-4f^N$ Channels of $\text{Ln}^{3+}$ Ions in Single-Centered Anisotropic $\text{LiRF}_4$ and $\text{BaR}_2\text{F}_8$ Fluorides ( $\text{R} = \text{Y}$ and $\text{Ln}$ ) .....	66

1.8.4.	Laser Channels of $\text{Ln}^{3+}$ Activators in Monoclinic Double Potassium-Rare-Earth Tungstates .....	68
1.8.5.	Laser $4f^N$ - $4f^N$ Channels of $\text{Ln}^{3+}$ Activators in Trigonal Fluorides with Tysonite Structure .....	69
	References .....	74
<b>Second Part</b>	<b>Energy Levels and Optical-Transition Intensities of Generating Activators in Insulating Laser Crystals .....</b>	<b>91</b>
<b>Chapter 2</b>	<b>Stark-Level Structure of Lasing Activator Ions .....</b>	<b>93</b>
2.1.	Basic Concepts of Modern Crystal-Field Theory .....	94
2.2.	Stark-Level Energies of Generating Ions in Laser Insulating Crystals (Experimental Data) .....	100
	References .....	211
<b>Chapter 3</b>	<b>Intensity of Radiative Transitions of <math>\text{Ln}^{3+}</math> Activators in Insulating Laser Crystals .....</b>	<b>227</b>
3.1.	Electric Dipole Transitions .....	228
3.1.1.	Transition Polarization .....	230
3.2.	Judd-Ofelt Intensity Parameters $\Omega_t$ .....	231
3.2.1.	Reduced-Matrix Elements of the Tensor Operators $U^{(l)}$ (Table Data) .....	232
3.2.2.	Calculations of the $\Omega_t$ Parameters .....	233
3.3.	Magnetic Dipole Transitions .....	234
3.4.	Spectroscopic-Quality Parameters of Insulating Laser Crystals with $\text{Ln}^{3+}$ Activators .....	235
3.4.1.	Spectroscopic-Quality Parameters for Crystals Doped with $\text{Nd}^{3+}$ Ions .....	235
3.4.2.	Spectroscopic-Quality Parameters for Crystals Doped with $\text{Er}^{3+}$ Ions .....	238
3.4.3.	Spectroscopic-Quality Parameters for Crystals Doped with $\text{Pm}^{3+}$ Ions .....	240
	References .....	302
<b>Chapter 4</b>	<b>Multiphonon <math>4f^N</math>-<math>4f^N</math> Nonradiative Transitions of <math>\text{Ln}^{3+}</math> Activators in Laser Crystals .....</b>	<b>307</b>
4.1.	Principal Mechanisms of the Modern Theory of Nonradiative Relaxation of $\text{Ln}^{3+}$ Ions in Crystals .....	308
4.1.1.	Covalent-Nonlinear Model .....	315
4.1.1.1.	Comparison between Theory and Experiment .....	322
4.2.	Energy-Gap Law—Dependence of $W_{J'}$ on $\Delta E_{J'}$ .....	323
	References .....	325

<b>Third Part</b>	<b>Multilevel Operating Laser Schemes for the Excitation of Stimulated Emission in Activated Crystals .....</b>	<b>331</b>
<b>Chapter 5</b>	<b>Cascade Operating Schemes for Crystalline Lasers .....</b>	<b>333</b>
5.1.	Cascade Laser Schemes for Crystals Doped with $\text{Ln}^{3+}$ Activators .....	335
5.1.1.	Cascade Laser Action in $\text{Pr}^{3+}$ and $\text{Nd}^{3+}$ Ion-Doped Crystals .....	336
5.1.2.	Cascade Laser Action in $\text{Ho}^{3+}$ Ion-Doped Crystals .....	337
5.1.3.	Cascade Laser Action in $\text{Er}^{3+}$ and $\text{Tm}^{3+}$ Ion-Doped Crystals .....	339
5.2.	Features of Cascade Generation of the $\text{Ln}^{3+}$ Ions in Crystals .....	341
5.3.	Cross-Cascade Laser Schemes for Crystals Doped with $\text{Ln}^{3+}$ Activators .....	348
	References .....	354
<b>Chapter 6</b>	<b>Sensitizing, Deactivating, and Feed-Flowing Operating Schemes for Crystalline Lasers .....</b>	<b>357</b>
6.1.	Sensitizing Laser Schemes .....	359
6.2.	Deactivating Laser Schemes .....	367
6.3.	Feed-Flowing Laser Schemes .....	368
6.4.	Laser Action of Unlike $\text{Ln}^{3+}$ Ion-Doped Crystals .....	373
	References .....	374
<b>Chapter 7</b>	<b>Stepwise Laser Operating Schemes for Crystals Doped with <math>\text{Ln}^{3+}</math> Activator Ions .....</b>	<b>381</b>
7.1.	Upconversion and Stimulated Emission of $\text{Ln}^{3+}$ Ions in Crystals at High-Level Energy Excitation .....	382
7.1.1.	Stepwise Upconversion Operating Schemes of Crystals Doped with the $\text{Yb}^{3+} + \text{Ho}^{3+}$ System of Activators .....	382
7.1.2.	Stepwise Upconversion Operating Schemes of Crystals Doped with the $\text{Yb}^{3+} + \text{Er}^{3+}$ System of Activators .....	385
7.1.2.1.	Anti-Stokes Lasing under Multiwavelength Excitation .....	391
7.1.2.2.	Pulsed 2- $\mu\text{m}$ Laser Generation of $\text{BaYb}_2\text{F}_8:\text{Er}^{3+}$ Crystals under Flashlamp Pumping .....	392
7.1.3.	Stepwise Upconversion Operating Schemes of Crystals Doped with the $\text{Yb}^{3+} + \text{Tm}^{3+}$ System of Activators .....	397

	7.1.3.1. Flashlamp-Pumped Pulsed Laser Action of BaYb <sub>2</sub> F <sub>8</sub> :Tm <sup>3+</sup> Crystals at 1.5- $\mu$ m Wavelength ....	399
7.2.	Upconversion Operating Laser Schemes for Er <sup>3+</sup> Ion-Doped Crystals .....	400
7.3.	Operating Laser Schemes with Stepwise Absorption of Pump Quanta for YAlO <sub>3</sub> and LiYF <sub>4</sub> Crystals Doped with Er <sup>3+</sup> Ions .....	402
	References .....	402
<b>Chapter 8</b>	<b>Cross-Relaxation Operating Schemes for Crystalline Lasers ....</b>	<b>405</b>
8.1.	Cross-Relaxation Laser Operating Schemes with Quantum Efficiency Equal to 1 .....	407
8.1.1.	“Green” <sup>3</sup> D <sub>4</sub> → <sup>7</sup> F <sub>5</sub> Laser Channel of Tb <sup>3+</sup> Ions in the LiYF <sub>4</sub> :Gd <sup>3+</sup> Crystal .....	407
8.1.2.	One-Micron <sup>1</sup> D <sub>2</sub> → <sup>3</sup> F <sub>3</sub> Laser Channel of Pr <sup>3+</sup> Ions in the YAlO <sub>3</sub> Crystal .....	407
8.1.3.	Three-Micron <sup>4</sup> I <sub>11/2</sub> → <sup>4</sup> I <sub>13/2</sub> Laser Channel of Er <sup>3+</sup> Ions in Y <sub>3</sub> Al <sub>5</sub> O <sub>12</sub> -Type Crystals .....	409
8.2.	Cross-Relaxation Laser Operating Schemes with Quantum Efficiency Equal to 2 .....	411
8.2.1.	Two-Micron <sup>5</sup> I <sub>7</sub> → <sup>5</sup> I <sub>8</sub> Laser Channel of Ho <sup>3+</sup> Ions in the Y <sub>3</sub> Al <sub>5</sub> O <sub>12</sub> :Cr <sup>3+</sup> , Tm <sup>3+</sup> Crystal .....	411
8.2.2.	Two-Micron <sup>3</sup> H <sub>4</sub> → <sup>3</sup> H <sub>6</sub> Laser Channel of Tm <sup>3+</sup> Ions in the Y <sub>3</sub> Al <sub>5</sub> O <sub>12</sub> :Cr <sup>3+</sup> Crystal .....	417
8.3.	Cross-Relaxation Laser Operating Schemes with Quantum Efficiency Equal to 3 .....	419
8.3.1.	Two-Micron <sup>5</sup> I <sub>7</sub> → <sup>5</sup> I <sub>8</sub> Laser Channel of Ho <sup>3+</sup> Ions in the BaEr <sub>2</sub> F <sub>8</sub> :Tm <sup>3+</sup> Crystal .....	419
8.4.	Three-Micron <sup>5</sup> I <sub>6</sub> → <sup>5</sup> I <sub>7</sub> Laser Channel of Ho <sup>3+</sup> Ions in the BaYb <sub>2</sub> F <sub>8</sub> Crystal ( $\eta_{cr-r}^{eff} = 3$ at $\eta_{cr-r} = 4$ ) .....	425
	References .....	427
<b>Chapter 9</b>	<b>Laser Operating Schemes with Strong Depopulation of the Ground States of Generating Ln<sup>3+</sup> Ions .....</b>	<b>431</b>
9.1.	Ground-State Lifting—a Way to Increase Crystalline-Laser Efficiency .....	434
9.1.1.	Praseodymium Laser Systems .....	435
9.1.2.	Features of the Ground-State-Lifting Scheme .	438
9.1.2.1.	Power Saturation in Prepumping <sup>3</sup> H <sub>4</sub> → <sup>1</sup> G <sub>4</sub> and <sup>3</sup> H <sub>4</sub> → <sup>1</sup> D <sub>2</sub> Channels ..	442
9.2.	Laser Action of Ln <sup>3+</sup> Ions in Insulating Crystals Under Condition of Ground-State-Level Depletion .....	443

9.2.1.	Peculiarities of SE Excitation at Resonance <sup>4</sup> F <sub>3/2</sub> ↔ <sup>4</sup> I <sub>9/2</sub> Channel in Lasers on the Base of Y <sub>2</sub> SiO <sub>5</sub> :Nd <sup>3+</sup> Crystals at Room Temperature .....	444
9.3.	Photon-Avalanche Phenomena in Laser Crystals with Ln <sup>3+</sup> Activators .....	448
9.3.1.	Photon Avalanche in Pr <sup>3+</sup> Ion-Doped Laser Crystals .....	448
9.3.2.	Kinetic Model for a Photon Avalanche in Laser Crystals Doped with Pr <sup>3+</sup> Ions .....	451
9.3.2.1.	Two-Ion Mechanism .....	458
9.3.2.2.	Photon-Phonon Mechanism .....	461
9.3.2.3.	Raman Mechanism .....	462
9.3.3.	Photon-Avalanche Upconversion in the Nd <sup>3+</sup> :LiYF <sub>4</sub> Laser .....	464
9.3.4.	Photon-Avalanche Operating Scheme for Blue Laser on the Base of the LiYF <sub>4</sub> :Tm <sup>3+</sup> Crystal .....	466
	References .....	467
<b>Fourth Part</b>	<b>Novel and Promising Technologies in the Physics and Technique of Crystalline Lasers .....</b>	<b>471</b>
<b>Chapter 10</b>	<b>New Generation of Crystalline Lasers .....</b>	<b>473</b>
10.1.	Laser Action of Crystals Doped with Ln <sup>3+</sup> Ions under Selective Laser Pumping .....	473
10.1.1.	Crystalline Laser Converters .....	474
10.1.1.1.	Uniform Laser Pumping .....	474
10.1.1.2.	Profiled Laser Pumping .....	476
10.1.1.3.	Numerical Estimation of Ultimate Energy Input .....	478
10.1.1.4.	Laser Converters Based on Crystals Doped with Ln <sup>3+</sup> Ion Activators .....	479
10.1.2.	Laser-Diode-Pumped Crystalline Lasers .....	481
10.1.2.1.	Some Basic Schemes of Laser-Diode Pumping .....	483
10.1.2.2.	Laser Action of Crystals Doped with Ln <sup>3+</sup> Ions under Laser-Diode Excitation .....	486
10.2.	Miniature Crystalline Lasers with High Density of Waveguiding Laser Pumping .....	489
10.2.1.	Crystalline Fiber Lasers .....	490
10.2.2.	Crystalline Planar and Strip Waveguide Lasers .....	492

10.2.3. Crystalline Ribbon and Sheet Lasers .....	494
10.3. Crystalline Lasers with Self-Frequency Conversion ....	499
10.3.1. Self-Frequency Doubling Crystalline Lasers ..	500
10.3.2. Self-SRS Crystalline Lasers .....	503
10.3.3. Crystalline Lasers with Self-Frequency Conversion in Pumping Channels .....	508
10.4. Solar-Pumped Crystalline Lasers .....	512
References .....	512
<b>Chapter 11</b> Concluding Remarks .....	521
11.1. The Current State in Laser-Diode-Pumped Crystalline Laser Development (Table Data) .....	522
11.2. Up-to-Date Survey of Crystalline Upconversion Lasers (Table Data) .....	526
11.3. Praseodymium Crystalline Lasers for the Creation of “White” Laser Light .....	532
References .....	534
<b>Appendix A</b> Crystalline Hosts and Lasing Ions .....	541
<b>Index</b> .....	553
