1	Intr Refe	Introduction			
2	Methods of Solving the Kinetic Vlasov-Boltzmann Equation				
	in C	Case of Bounded Magnetized Plasmas	7		
	2.1	Peculiarities of Fluid and Kinetic Descriptions of			
		Electromagnetic Waves in Plasmas	7		
	2.2	Calculation of Dielectric Permittivity Tensor for Semibounded			
		Gyrotropic Plasmas	15		
	2.3	Calculation of Dielectric Permittivity Tensor for Gyrotropic			
		Plasmas Affected by a Radio Frequency Field Oriented Across			
		an External Static Magnetic Field	27		
	2.4	Calculation of Dielectric Permittivity Tensor for Gyrotropic			
		Plasmas Affected by a Non-monochromatic Radio Frequency			
		Field Oriented Across an External Static Magnetic Field	36		
	2.5	Conclusions	43		
	Refe	erences	43		
3	Surface Electron Cyclotron TM-Mode Waves				
	3.1	Dispersion Equation of Surface Cyclotron TM-Modes			
		for Semibounded Plasmas	46		
	3.2	Damping of Surface Electron Cyclotron TM-Modes	54		
	3.3	Effect of Non-uniform Plasma Particle Density and Finite			
		Transverse Plasma Size on Spectrum of Surface Electron			
		Cyclotron TM-Modes	59		
	3.4	Excitation of Surface Electron Cyclotron TM-Modes by Charged			
		Particle Beams	72		
	3.5	Parametric Excitation of Surface Electron Cyclotron			
		TM-Modes	83		
	3.6	Excitation of Surface Electron Cyclotron TM-Modes			
		by Non-monochromatic External RF Fields	95		

	3.7	Gas Discharges Sustained by Surface Electron Cyclotron	105
