<b>Part I High Conductivity Channels for a Laser Lightning-Protection System</b>	
<b>1 Electric-Discharge Guiding by a Continuous Laser-Induced Spark</b>	<b>3</b>
1.1 Introduction	3
1.2 Experimental Setup	4
1.3 Experimental Results and Discussion	6
1.4 Conclusions	13
References	14
<b>2 Experimental Simulation of a Laser Lightning-Protection System</b>	<b>15</b>
2.1 Introduction	15
2.2 Experimental Setup	16
2.3 Experimental Results and Analysis	17
2.4 Conclusions	22
References	23
<b>3 Lightning and Ecology of Atmosphere</b>	<b>25</b>
3.1 Introduction	25
3.2 Power of Lightning	25
3.3 Lightning in the Natural Capacitor “Earth-Cloud”	27
3.4 Lightning in the Natural Capacitor “Cloud-Ionosphere”	32
3.5 Orbital Electrical Socket	34
3.6 Conclusions	36
Reference	36

## Part II «Impulsar» as a Background for High Conductivity Channels Realization

<b>4</b>	<b>Interaction of an OPD with a Gas</b>	39
4.1	Introduction	39
4.2	Conditions of Stable SW Generation	40
4.3	Experimental Setup	42
4.4	Combination of OPD-Generated SW	45
4.5	Conclusions	53
	References	53
<b>5</b>	<b>Mechanism of SW Merging in a LJE</b>	55
5.1	Introduction	55
5.2	Efficient Laser Jet Engine	55
5.3	Conclusions	63
	References	63
<b>6</b>	<b>LJE Based on the Resonance Merging of SW</b>	65
6.1	Introduction	65
6.2	Parameters of a Spark in the LJE	68
6.3	Mechanism of the Resonance Merging of SW in a LJE	71
6.4	Spherical OPD	72
6.5	LJE Parameters in the Monoreflector Scheme	79
6.6	Array Reflector	79
6.7	LJE Based on the Resonance Merging of SW	82
6.7.1	Mechanism and Scheme of Acceleration	82
6.7.2	Advantages of the Method	83
6.7.3	The LJE Parameters (Initial Data)	83
6.8	Conclusions	86
	References	87
<b>7</b>	<b>LJE: The Action of SW at Low Laser Pulse Repetition Rates</b>	89
7.1	Introduction	89
7.2	LJE Parameters	89
7.3	Conclusions	93
	References	93
<b>8</b>	<b>Simulation of High Conductivity Channels in Space</b>	95
8.1	Introduction	95
8.2	Lasers for Producing Sparks in the Atmosphere	95
8.3	Use of a Pulse-Periodic Laser	98
8.4	Formation of a Current-Conducting Channel According to the “Impulsar” Program	99
8.5	Formation of an Electrical Breakdown in the Channel Formed by an Exploding Thin Wire	100
8.6	Formation of Electrical Discharges in a Plasma Channel Produced by a Solid-State Laser	108

8.7	Experimental Results	112
8.8	Conclusions	113
	References	114
<b>9</b>	<b>High Conductivity Channel Expansion Rate Measurements</b>	117
9.1	Introduction	117
9.2	Formation of Controlled Electrical Discharges in a Channel Produced by the Explosion of a Wire	120
9.3	Conclusions	126
	References	126
<b>10</b>	<b>«Impulsar»: New Application for High Power/Energy High Repetition Rate Pulse-Periodic Lasers</b>	129
10.1	Introduction	129
10.2	Experimental Setup	130
10.3	Results of Measurements	133
10.3.1	Control Measurements	133
10.3.2	Stationary Regime	134
10.3.3	Pulsed Regime	136
10.4	The Impact of Thermal Action	138
10.5	The Dynamic Resonance Loads	141
10.6	Matrix of Reflectors	142
10.7	Super Long Conductive Channel for Energy Transfer	143
10.8	Conclusions	145
	References	145

## Part III Lasers and Laser Components for High Conductivity Channels Implementation

<b>11</b>	<b>Laser Power Source for Wireless Power Transmission in Space</b>	149
11.1	Introduction	149
11.2	High Conductivity Channel Formation	152
11.3	High-Frequency Pulse-Periodic Solid-State and Gas-Dynamic Lasers	153
11.4	Pulse-Periodic HF/DF and COIL Lasers	157
11.5	Bright Future—High Power/Energy Mono-Module Disk Laser	158
11.6	Conclusions	161
	References	161
<b>12</b>	<b>High Power/Energy High Repetition Rate Lasers</b>	163
12.1	Introduction	163
12.2	Comparison of CW and P-P Regimes of Operation	163
12.3	Solid-State Lasers	165
12.4	High-Frequency Intra-Cavity Loss Modulation	166

12.5	Carbon Dioxide Lasers	166
12.6	High-Frequency P-P Regime	167
12.7	Conclusions	169
	References	169
<b>13</b>	<b>High Power/Energy Lasers and New Applications</b>	<b>171</b>
13.1	Introduction	171
13.2	Lasers for Laser Jet Engine Development	171
13.3	Long Conducting Channel and New Set of Applications	174
13.4	Lightning Control	178
13.5	Manifestation of Atmospheric Electricity Existence	180
13.6	Sprites and Jets Investigation	184
13.7	Conclusions	186
	References	186
<b>14</b>	<b>High Power/Energy Disk Lasers</b>	<b>189</b>
14.1	Introduction	189
14.2	Disk and Fiber Lasers	190
14.3	Design and Physical Foundations of Disk Laser Operation	191
14.4	Laws of Scaling of Disk Lasers	192
14.5	Regenerative Amplification of Pulses	195
14.6	Prospects for Scaling the Power/Energy of Disk Lasers	196
14.7	Conclusions	198
	References	198
<b>15</b>	<b>High Power/Energy Molecular Lasers</b>	<b>201</b>
15.1	Introduction	201
15.2	Physical Model of SSVD Formation	202
15.3	Experiments	206
15.4	High Power/Energy HF (DF) Lasers	214
15.5	Discussion	226
15.6	Conclusions	232
	References	234
<b>16</b>	<b>High Power/Energy HF (DF) Lasers</b>	<b>237</b>
16.1	Introduction	237
16.2	A New Form of SSVD	238
16.3	Non-chain HF (DF) Lasers Pumped by SIVD	249
16.4	Wide Aperture Non-chain HF (DF) Lasers	253
16.5	Conclusions	253
	References	255
<b>17</b>	<b>High Power/Energy Optics</b>	<b>257</b>
17.1	Introduction	257
17.2	Static POEs Based on Monolithic Materials	258
17.2.1	Thermal Stress State of a Solid Body Exposed to Laser Radiation	259

17.2.2	Continuous-Wave Irradiation	262
17.2.3	Pulsed Irradiation	267
17.2.4	Repetitively Pulsed Irradiation	269
17.2.5	Criteria for the Optical Surface Stability	271
17.2.6	Irreversible Changes in the Optical Surface	274
