Part I Plasma, Particle Interactions, Mass and Heat Phenomena

1	Base Plasma Particle Phenomena at the Surface and in Plasma Volume	3
1.1	Plasma	3
1.1.1	Quasineutrality	3
1.1.2	Plasma Oscillations	4
1.1.3	Interaction of Electron Beam with Plasma	5
1.1.4	Plasma State	6
1.2	Particle Collisions with Surfaces	7
1.3	Plasma Particle Collisions	10
1.3.1	Charged Particle Collisions	10
1.3.2	Electron Scattering on Atoms	11
1.3.3	Charge-Exchange Collisions	12
1.3.4	Excitation and Ionization Collisions	13
1.3.5	Electron–Ion Recombination	27
1.3.6	Ionization–Recombination Equilibrium	30
	References	33
2	Atom Vaporization and Electron Emission from a Metal Surface	37
2.1	Kinetics of Material Vaporization	37
2.1.1	Non-equilibrium (Kinetic) Region	37
2.1.2	Kinetic Approaches. Atom Evaporations	39
2.1.3	Kinetic Approaches. Evaporations Into Plasma	44
2.2	Electron Emission	46
2.2.1	Work Function. Electron Function Distribution	46
2.2.2	Thermionic or T-Emission	47
2.2.3	Schottky Effect. Field or F-Emission	48
2.2.4	Combination of Thermionic and Field Emission Named TF-Emission	50

2.2.5	Threshold Approximation	53
2.2.6	Individual Electron Emission	53
2.2.7	Fowler–Norheim-Type Equations and Their Correction for Measured Plot Analysis	55
2.2.8	Explosive Electron Emission	56
	References	62
3	Heat Conduction in a Solid Body. Local Heat Sources	69
3.1	Brief State-of-the-Art Description	69
3.2	Thermal Regime of a Semi-finite Body. Methods of Solution in Linear Approximation	70
3.2.1	Point Source. Continuous Heating	70
3.2.2	Normal Circular Heat Source on a Body Surface	71
3.2.3	Instantaneous Normal Circular Heat Source on Semi-infinity Body	72
3.2.4	Moving Normal Circular Heat Source on a Semi-infinity Body	73
3.3	Heating of a Thin Plate	75
3.3.1	Instantaneous Normal Circular Heat Source on a Plate	75
3.3.2	Moving Normal Circular Heat Source on a Plate	76
3.4	A Normal Distributed Heat Source Moving on Lateral Side of a Thin Semi-infinite Plate	77
3.4.1	Instantaneous Normally Distributed Heat Source on Side of a Thin Semi-infinite Plate	77
3.4.2	Moving Continuous Normally Distributed Heat Source on Thin Plate of Thickness δ	79
3.4.3	Fixed Normal-Strip Heat Source with Thickness X_0 on Semi-infinite Body	80
3.4.4	Fixed Normal-Strip Heat Source with Thickness X_0 on Semi-infinite Body Limited by Plane $X = -\delta/2$	80
3.4.5	Fixed Normal-Strip Heat Source with Thickness X_0 on Lateral Side of Finite Plate ($X_0 < \delta$)	81
3.4.6	Moving Normal-Strip Heat Source on a Later Plate Side of Limited Thickness ($X_0 < \delta$)	82
3.5	Temperature Field Calculations. Normal Circular Heat Source on a Semi-infinite Body	83
3.5.1	Temperature Field in a Tungsten Body	84
3.5.2	Temperature Field in a Copper	86
3.5.3	Temperature Field Calculations. Normal Heat Source on a Later Side of Thin Plate and Plate with Limited Thickness [25]	90
3.5.4	Concluding Remarks to the Linear Heat Conduction Regime	93

3.6	Nonlinear Heat Conduction	94
3.6.1	Heat Conduction Problems Related to the Cathode Thermal Regime in Vacuum Arcs	94
3.6.2	Normal Circular Heat Source Action on a Semi-infinity Body with Nonlinear Boundary Condition	94
3.6.3	Numerical Solution of 3D Heat Conduction Equation with Nonlinear Boundary Condition	97
3.6.4	Concluding Remarks to the Nonlinear Heat Conduction Regime	98
	References	99
4	The Transport Equations and Diffusion Phenomena in Multicomponent Plasma	101
4.1	The Problem	101
4.2	Transport Phenomena in a Plasma. General Equations	101
4.2.1	Three-Component Cathode Plasma. General Equations	103
4.2.2	Three-Component Cathode Plasma. Simplified Version of Transport Equations	105
4.2.3	Transport Equations for Five-Component Cathode Plasma	109
	References	112
5	Basics of Cathode-Plasma Transition. Application to the Vacuum Arc	113
5.1	Cathode Sheath	113
5.2	Space Charge Zone at the Sheath Boundary and the Sheath Stability	116
5.3	Two Regions. Boundary Conditions	120
5.4	Kinetic Approach	121
5.5	Electrical Field	126
5.5.1	Collisionless Approach	127
5.5.2	Electric Field. Plasma Electrons. Particle Temperatures	127
5.5.3	Refractory Cathode. Virtual Cathode	128
5.6	Electrical Double Layer in Plasmas	132
	References	137

Part II Vacuum Arc. Electrode Phenomena. Experiment

6	Vacuum Arc Ignition. Electrical Breakdown	143
6.1	Contact Triggering of the Arc	143
6.1.1	Triggering of the Arc Using Additional Trigger Electrode	143

6.1.2	Initiation of the Arc by Contact Breaking of the Main Electrodes	144
6.1.3	Contact Phenomena	144
6.2	Electrical Breakdown	148
6.2.1	Electrical Breakdown Conditions	149
6.2.2	General Mechanisms of Electrical Breakdown in a Vacuum	149
6.2.3	Mechanisms of Breakdown Based on Explosive Cathode Protrusions	153
6.2.4	Mechanism of Anode Thermal Instability	154
6.2.5	Electrical Breakdown at an Insulator Surface	157
6.3	Conclusions	160
	References	161
7	Arc and Cathode Spot Dynamics and Current Density	165
7.1	Characteristics of the Electrical Arc	165
7.1.1	Arc Definition	165
7.1.2	Arc Instability	166
7.1.3	Arc Voltage	168
7.1.4	Cathode Potential Drop	170
7.1.5	Threshold Arc Current	174
7.2	Cathode Spots Dynamics. Spot Velocity	174
7.2.1	Spot Definition	174
7.2.2	Study of the Cathode Spots. General Experimental Methods	176
7.2.3	Method of High-Speed Images	176
7.2.4	Autograph Observation. Crater Sizes	188
7.2.5	Summary of the Spot Types Studies	194
7.2.6	Classification of the Spot Types by Their Characteristics	199
7.3	Cathode Spot Current Density	201
7.3.1	Spot Current Density Determination	201
7.3.2	Image Sizes with Optical Observation	201
7.3.3	Crater Sizes Observation	202
7.3.4	Influence of the Conditions. Uncertainty	203
7.3.5	Interpretation of Luminous Image Observations	204
7.3.6	Effects of Small Cathode and Low-Current Density. Heating Estimations	206
7.3.7	Concluding Remarks	207
	References	208

8	Electrode Erosion. Total Mass Losses	213
8.1	Erosion Phenomena	213
8.1.1	General Overview	213
8.1.2	Electroerosion Phenomena in Air	216
8.1.3	Electroerosion Phenomena in Liquid Dielectric Media	221
8.2	Erosion Phenomena in Vacuum Arcs	226
8.2.1	Moderate Current of the Vacuum Arcs	227
8.2.2	Electrode Erosion in High Current Arcs	242
8.2.3	Erosion Phenomena in Vacuum of Metallic Tip as High Field Emitter	245
8.3	Summary and Discussion of the Erosion Measurements	249
	References	250
9	Electrode Erosion. Macroparticle Generation	255
9.1	Macroparticle Generation. Conventional Arc	255
9.2	Macroparticle Charging	264
9.3	Macroparticle Interaction	269
9.3.1	Interaction with Plasma	269
9.3.2	Interaction with a Wall and Substrate	271
9.4	Macroparticle Generation in an Arc with Hot Anodes	277
9.4.1	Macroparticles in a Hot Refractory Anode Vacuum Arc (HRAVA)	277
9.4.2	Macroparticles in a Vacuum Arc with Black Body Assembly (VABBA)	279
9.5	Concluding Remarks	280
	References	280
10	Electrode Energy Losses. Effective Voltage	285
10.1	Measurements of the Effective Voltage in a Vacuum Arc	285
10.2	Effective Electrode Voltage in an Arc in the Presence of a Gas Pressure	292
10.3	Effective Electrode Voltage in a Vacuum Arc with Hot Refractory Anode	295
10.3.1	Effective Electrode Voltage in a Hot Refractory Anode Vacuum Arc (HRAVA)	296
10.3.2	Energy Flux from the Plasma in a Hot Refractory Anode Vacuum Arc (HRAVA)	298
10.3.3	Effective Electrode Voltage in a Vacuum Arc Black Body Assembly (VABBA)	300
10.4	Summary	302
	References	304

11 Repulsive Effect in an Arc Gap and Force Phenomena as a Plasma Flow Reaction	307
11.1 General Overview	307
11.2 Early Measurements of Hydrostatic Pressure and Plasma Expansion. Repulsive Effect upon the Electrodes	308
11.3 Primary Measurements of the Force at Electrodes in Vacuum Arcs	320
11.4 Further Developed Measurements of the Force at Electrodes in Vacuum Arcs	331
11.5 Early Mechanisms of Forces Arising at Electrodes in Electrical Arcs	339
11.6 Summary	342
References	343
12 Cathode Spot Jets, Velocity and Ion Current	347
12.1 Plasma Jet Velocity	347
12.2 Ion Energy	354
12.3 Ion Velocity and Energy in an Arc with Large Rate of Current Rise di/dt	360
12.4 Ion Current Fraction	365
12.5 Ion Charge State	373
12.6 Influence of the Magnetic Field	393
12.7 Vacuum Arc with Refractory Anode. Ion Current	404
12.8 Summary	411
References	415
13 Cathode Spot Motion in a Transverse and in an Oblique Magnetic Field	421
13.1 The General Problem	421
13.2 Effect of Spot Motion in a Magnetic Field	422
13.3 Investigations of the Retrograde Spot Motion	424
13.3.1 Magnetic Field Parallel to the Cathode Surface. Direct Cathode Spot Motion	425
13.3.2 Phenomena in an Oblique Magnetic Fields.	475
13.4 Summary	483
References	486
14 Anode Phenomena in Electrical Arcs	493
14.1 General Consideration of the Anode Phenomena	493
14.2 Anode Modes in the Presence of a Gas Pressure	494
14.2.1 Atmospheric Gas Pressure	494
14.2.2 Low-Pressure Gas	501
14.3 Anode Modes in High-Current Vacuum Arcs	503
14.3.1 Anode Spotless Mode. Low-Current Arcs	505
14.3.2 Anode Spotless Mode. High-Current Arcs	506

14.3.3 Anode Spot Mode for Moderate Arc Current	506
14.3.4 Anode Spot Mode for High-Current Vacuum Arc	509
14.4 Measurements of Anode and Plasma Parameters	523
14.4.1 Anode Temperature Measurements	524
14.4.2 Anode Plasma Density and Temperature	527
14.4.3 Anode Erosion Rate	534
14.5 Summary	535
References	539
