

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Plasma World	1
1.2	Plasma Waves	4
1.3	Importance of Helicon Plasma Source	7
	References	8
<b>2</b>	<b>Fundamentals of Plasma and Its Diagnostics</b>	11
2.1	Basic Plasma Properties	11
2.1.1	Plasma Oscillation	12
2.1.2	Debye Sheath	13
2.1.3	Plasma Conditions and Definition of Temperature	14
2.2	Plasma Generation	16
2.3	Motion of Charged Particles	17
2.3.1	Cyclotron Motion	18
2.3.2	Drift Motion	19
2.3.3	Magnetic Moment	21
2.4	Plasma as Fluids	26
2.4.1	Kinetic Description and Maxwell Transport Equation	27
2.4.2	Magnetohydrodynamic Equations	29
2.4.3	Simplified Magnetohydrodynamic Equations	33
2.5	Transport Process	36
2.5.1	Collision and Resistivity	37
2.5.2	Diffusion Parameters	41
2.5.3	Ambipolar Diffusion	42
2.5.4	Diffusion Across the Magnetic Field	43
2.5.5	Diffusion in a Cylinder and Recombination	45
2.5.6	Anomalous Diffusion	47
2.5.7	Wall Conditions	49
2.6	Equilibrium and Stability	52
2.6.1	Plasma Equilibrium	53
2.6.2	Plasma Instabilities	56

2.7	Plasma Diagnostics	64
2.7.1	Electric and Magnetic Measurements	64
2.7.2	Measurements by Electromagnetic Waves	73
2.7.3	Light Emission and Radiation Loss Measurements	76
2.7.4	Particle Measurements	83
	Appendix	86
	References	91
<b>3</b>	<b>Basic Helicon Wave Plasma</b>	<b>95</b>
3.1	Cold Plasma Dispersion Relation	96
3.1.1	Dispersion Relation	96
3.1.2	Wave Characteristics Using Cold Plasma Dispersion Relation	99
3.1.3	Additional Remarks on Plasma Wave Phenomena	104
3.2	Helicon Wave Structures	112
3.2.1	Dispersion Relations of Helicon and Trivelpiece Gould Waves	112
3.2.2	Spatial Structures of Helicon Wave	121
3.3	Helicon Plasma Production and Its Mechanism	130
3.3.1	Comparison of RF Plasma Sources	130
3.3.2	Highly Efficient Helicon Plasma Production	134
3.3.3	Production Mechanism of High-Density, Helicon Plasma	138
3.4	Examples of Helicon Source and Its Characteristics	154
3.4.1	Device Size of Helicon Source	154
3.4.2	Antenna Geometry and Wave/Plasma Characteristics	172
3.4.3	Magnetic Field Effect	176
3.4.4	Frequency Effect	183
3.4.5	Effects of Gas Species and Its Pressure	185
	Appendix	187
	References	194
<b>4</b>	<b>Extensive Helicon Plasma Science</b>	<b>201</b>
4.1	Fundamental Studies	201
4.1.1	Basic Helicon and Whistler Wave Characteristics	201
4.1.2	Control of Plasma Behavior	203
4.1.3	Torus Experiment	207
4.1.4	Mode Transition	209
4.1.5	Neutral Density Effect	213
4.1.6	Instabilities	222
4.2	Various Plasma Applications	237
4.2.1	Helicon Plasma Thruster	237
4.2.2	Nuclear Fusion Related Research	271
4.2.3	Industrial Application	281
4.2.4	Other Applications	283
	References	284

<b>5</b>	<b>Summary and Future Aspects</b>	<b>297</b>
5.1	Summary of Helicon Plasma Science	297
5.2	Future Aspects	299
5.2.1	Fundamental Helicon Science	299
5.2.2	Helicon Plasma Application	306
5.3	Final Concluding Remark	311
	References	312
