1. High-order harmonic generation in thin-film solids	1
Troie D. Journigan and Michael Chini	
1. Introduction	2
2. Linear and nonlinear propagation effects in bulk solids	15
3. HHG in thin films and 2D materials	18
4. Conclusion	26
Acknowledgments	26
References	27
2. Simulation of time-dependent quantum dynamics using quantum computers	33
Erik Lötstedt, Takanori Nishi, and Kaoru Yamanouchi	
1. Introduction	34
2. Basics of quantum computing	36
3. Application of quantum computers to time-dependent simulations	47
4. Quantum computing of strong-field dynamics	51
5. Spin dynamics of a Heisenberg spin chain	57
6. Summary	64
Acknowledgments	65
References	65
