Preface	iii
Acknowledgments	v
Executive Summary	viii
1. Introduction	1
2. Volumes	3
2.1 Introduction (Reference points, Coordinate systems, and Volumes)	3
2.1.1 Reference Points	3
2.1.2 Coordinate Systems	3
2.1.3 Volumes	3
2.2 Gross Tumor Volume (GTV)	4
2.3 Clinical Target Volume (CTV)	5
2.3.1 Prescription of Treatment of Subclinical Extensions Adjacent to a GTV	6
2.3.2 Prescription of Treatment of Subclinical Extensions at a Distance from a GTV	6
2.4 Planning Target Volume (PTV)	6
2.4.1 Margins for Geometric Variations and Uncertainties	6
2.4.1.1 Internal Margin (IM) and Internal Target Volume (ITV)	8
2.4.1.2 Set-up Margin (SM)	9
2.4.2 The Concept of Planning Target Volume (PTV)	10
2.4.3 Adding or Combining the Margins	11
2.5 Treated Volume	12
2.5.1 General Aspects	12
2.5.2 Conformity Index (CI)	13
2.6 Irradiated Volume	13
2.7 Organs at Risk (OR)	13
2.7.1 Definition of Organs at Risk	13
2.7.2 Planning Organ at Risk Volume (PRV)	15
2.8 Recommendations for Recording and Reporting Volumes	15
2.9 Probability of Benefit and Risk of Complications	17
3. Absorbed Doses	21
3.1 From Prescribing a Therapeutic Irradiation to Recording and Reporting	21
3.2 The ICRU Reference Point	21
3.3 The Dose Variation Throughout the CTV	21
3.4 The Three Levels of Dose Evaluation for Reporting	22
3.5 Organs At Risk (OR)	22
3.6 Reporting Doses in a Series of Patients	22
3.6.1 Introduction	22
3.6.2 Reporting Prescription of Treatment (Protocol)	22
3.6.3 Description of Actual Treatment in a Series of Patients	23
Appendix: Clinical Examples	26
Case Number 1. Breast Cancer	27
Case Number 2. Cancer of the Prostate	31
Case Number 3. Lung Cancer	39
References	45
ICRU Reports	48
Index	52
