

## CONTENTS OF PART C

### IX. Safety Issues and Waste Management

Waste from fusion reactor: A comparison with other energy producing systems, <i>K. Brodén, R. Edwards, M. Lindberg, P. Rocco and M. Zucchetti</i>	1
Fusion reactor safety—Issues and perspective, <i>T. Inabe, M. Seki and T. Tsunematsu</i>	7
ITER reference accidents, <i>H.-W. Bartels, A. Poucet, G. Cambi, C. Gordon, M. Gaeta, W. Gulden, T. Honda, M. Iseli, H. Jahn, J. Koonce, O. Kveton, B. Merrill, N. Mitchell, R.L. Moore, D. Petti, S. Polkinghorne, M.T. Porfiri, J. Raeder, G. Saji, E. Stubbe, S.J. Piet, L. Topilski, N. Uckan and W. VanHove</i>	13
ITER inherent/passive ultimate safety margins, <i>S.J. Piet, L.N. Topilski, H.-W. Bartels, A.E. Poucet and D.A. Petti</i>	21
In-vessel transient analysis code INTRA for ITER accident analyses, <i>H. Jahn, R. Blomquist, W. Gulden, L.-L. Johansson and E. Kajlert</i>	29
Safety scenario and integrated thermofluid test, <i>Y. Seki, R. Kurihara, S. Nishio, S. Ueda, I. Aoki, T. Ajima, T. Kunugi, K. Takase and M. Shibata</i>	37
The safety implications of tokamak dust size and surface area, <i>K.A. McCarthy, D.A. Petti, W.J. Carmack and G.R. Smolik</i>	45
Design and safety aspects of the cryostat confinement barrier, <i>M.E.P. Wykes, R. Bourque, Y. Nakashima, M. Nakahira, D.F. Holland and S.J. Piet</i>	53
Analysis and experimental results on ingress of coolant event in vacuum vessel, <i>R. Kurihara, T. Ajima, T. Kunugi, K. Takase, M. Shibata, Y. Seki, I. Hosokai, J. Ohmori, M. Yamauchi and F. Kasahara</i>	61
Thermofluid experiments on ingress of coolant event, <i>T. Kunugi, K. Takase, M. Shibata, R. Kurihara and Y. Seki</i>	67
An experimental study of ingress-of-coolant accident in fusion reactors, <i>M.Z. Hasan, M. Monde, Y. Mitsutake and K. Iwamoto</i>	73

Temperature distributions in a Tokamak vacuum vessel of fusion reactor after the loss-of-vacuum events occurred, <i>K. Takase, T. Kunugi, M. Shibata and Y. Seki</i>	83
Response of ITER to loss of vacuum accidents, <i>J.M. Gay, G. Marbach and W. Gulden</i>	89
ITER divertor heat transfer system and loss of vacuum accident sequence analyses overview, <i>G. Cambi, M.T. Porfiri, H. Jahn, D.G. Cepraga and H.-W. Bartels</i>	95
Safety approach for plasma anomaly events in fusion reactor: Code development and assessments, <i>T. Honda, H.-W. Bartels, N.A. Uckan, Y. Seki and T. Okazaki</i>	103
Applications of the CATHARE and CONTAIN codes in parallel runs, <i>P. Sardain, M. Porporat, J.M. Gatt and G. Marbach</i>	109
Study of safety concept for a helical-type fusion reactor, FFHR, <i>T. Uda, A. Sagara, O. Motojima, H. Yamanishi, S. Tanaka, T. Terai, T. Noda and FFHR Group</i>	115
Extended monodisperse aerosol modelling for fusion power plant containments, <i>W.E. Han</i>	127
Deposition of D <sub>2</sub> O from air to plant and soil during an experiment of D <sub>2</sub> O vapor release into a vinyl house, <i>M. Atarashi, H. Amano, M. Ichimasa and Y. Ichimasa</i>	133
Deposition of heavy water on soil and reemission to the atmosphere, <i>S. Yokoyama, H. Noguchi, M. Ichimasa, Y. Ichimasa and S. Fukutani</i>	141
Initial tritium waste management criteria and assessment for ITER, <i>I.A. Ionesyan, V.K. Kapychev, V.N. Tebus and V.N. Frolov</i>	149
Assessment of dose rate profiles and accessibility inside the building of the experimental fusion reactor, ITER, during operation and after shutdown, <i>M. Youssef, A. Kumar, M. Abdou, H. Khater, M. Sawan and D. Henderson</i>	155
Evaluation of dose rate and reactor core and nuclear properties for superconductive magnets in ITER, <i>K. Maki, S. Sato, K. Hayashi, K. Yamada and H. Takatsu</i>	173
Radiation and safety aspects of removal of activated components from the ITER vacuum vessel, <i>R. Haange, T. Burgess, R. Hager, Y. Hattori, C. Holloway, N. Matsuhira, E. Martin, K. Shibanuma and A. Tesini</i>	187
Dose assessment for the ignitor experiment, <i>M. Zucchetti, R. Bisesi and A. Carpignano</i>	193

## **X. Models and Experiments for Fusion Nuclear Technology**

Perspective for fusion nuclear technology of universities in Japan, <i>A. Iiyoshi</i>	201
Study on an inertial electrostatic confinement fusion as a portable neutron source, <i>M. Ohnishi, Y. Yamamoto, M. Hasegawa, K. Yoshikawa and G.H. Miley</i>	207
Streaming analysis for radiation through ITER mid-plane port, <i>S. Sato, H. Takatsu, T. Utsumi, H. Iida, S. Mori and R. Santoro</i>	213
Neutronics for ITER diagnostic systems and ports, <i>G. Shatalov, A. Borisov, S. Sheludjakov and A. Serikov</i>	221
Decay heat measurement on aluminum, copper and type 304 stainless steel irradiated by D-T neutrons, <i>F. Maekawa, Y. Ikeda and E.T. Cheng</i>	229
Verification of ITER shielding capability and FENDL data benchmarking through analysis of bulk shielding experiment on large SS316/water assembly bombarded with 14 MeV neutrons, <i>M.Z. Youssef, A. Kumar, M.A. Abdou, C. Konno, F. Maekawa, M. Wada, Y. Oyama, H. Maekawa and Y. Ikeda</i>	235
Neutron and photon flux spectra in a mock-up of the ITER shielding system, <i>H. Freiesleben, W. Hansen, D. Richter, K. Seidel, S. Unholzer, U. Fischer, Y. Wu, M. Angelone, P. Batistoni and M. Pillon</i>	247

Neutronics experiment on a mock-up of the ITER shielding system at the Frascati neutron generator (FNG), <i>M. Angelone, P. Batistoni, L. Petrizzi and M. Pillon</i>	255
Experimental and calculational studies of non-uniform shieldings of fusion reactors, <i>V.V. Afanasiev, M.I. Andreev, A.G. Belevitin, D.M. Dmitriev and V.L. Romodanov</i>	261
Benchmark experiment on bulk shield of SS316/water with simulated superconducting magnet, <i>C. Konno, F. Maekawa, Y. Oyama, M. Wada, Y. Kasugai, Y. Ikeda, H. Maekawa, M.Z. Youssef, A. Kumar and M.A. Abdou</i>	267
Benchmark experiment on void effects in a bulk shield assembly and investigation on the predictive ability of these effects by transport calculations, <i>F. Maekawa, C. Konno, Y. Ikeda, Y. Oyama, Y. Uno and H. Maekawa</i>	275
The use of MNCP for neutronics calculations within large buildings of fusion facilities, <i>J.E. Eggleston, M.A. Abdou and M.Z. Youssef</i>	281
Nuclear heating measurements for SS-316, copper, graphite, tungsten, chromium, beryllium in a copper centered assembly bombarded with 14 MeV neutrons and analysis, <i>Y. Ikeda, F. Maekawa, M. Wada, Y. Kasugai, C. Konno, Y. Uno, A. Kumar, M.Z. Youssef and M.A. Abdou</i>	289
Integral experiment of induced radioactivity in D-T fusion neutron environment and validation of activation cross section library, <i>Y. Kasugai, Y. Ikeda, F. Maekawa, C. Konno, M. Wada, Y. Uno, A. Kumar, M.Z. Youssef and M.A. Abdou</i>	299
Experimental measurement of nuclear heating in a graphite-centered assembly in deuterium–tritium neutron environment for the validation of data and calculation, <i>A. Kumar, Y. Ikeda, M.Z. Youssef, M.A. Abdou, F. Maekawa and Y. Kasugai</i>	307
Validation of induced radioactivity calculations for candidate fusion materials through measurements in a graphite-centered assembly, <i>A. Kumar, Y. Ikeda, M.Z. Youssef, M.A. Abdou and Y. Kasugai</i>	319
Activation experiments at TFTR in deuterium–tritium neutron field, <i>A. Kumar, H.W. Kugel and G. Ascione</i>	329
Experimental investigation of radioactivities induced in fusion reactor materials by 14-MeV neutrons, <i>H. Freiesleben, V. Kovalchuk, D. Markovskij, K. Seidel, V. Tereshkin and S. Unholzer</i>	337
Activation study at SNEG-13 facility of the candidate ferritic steel 10X9VFA, <i>V.D. Kovalchuk, V.V. Mostovoy, V.I. Tereshkin and D.V. Markovskij</i>	343
Activation analysis of ITER blanket first wall, <i>A. Lopatkin and V. Muratov</i>	349
Total leakage multiplication experiments and analysis on a combined beryllium sphere, <i>D.Y. Chuvilin, D.V. Markovskij, V.A. Zagryadskij and S.P. Simakov</i>	359
MHD pressure drop and heat transfer of lithium single-phase flow in a rectangular channel under transverse magnetic field, <i>M. Takahashi, M. Aritomi, A. Inoue and M. Matsuzaki</i>	365
Liquid metal heat pipes for fusion application, <i>A. Makhankov, A. Anisimov, A. Arakelov, A. Gekov, N. Jablov, V. Yuditskiy, I. Kirillov, V. Komarov, I. Mazul, A. Ogorodnikov and A. Popov</i>	373
Analyses of divertor high heat-flux components on thermal and electromagnetic loads, <i>M. Araki, K. Kitamura, K. Urata and S. Suzuki</i>	381
Numerical analysis on fracture behavior of a single-edge-cracked plate subjected to electromagnetic force, <i>T. Teramoto, T. Nagai, Y. Utsugi and M. Saito</i>	389
Optimization of plasma initiation in the ITER Tokamak, <i>I. Senda, T. Shoji, T. Tsunematsu, T. Nishino and H. Fujieda</i>	395

Evaluation method of magnetic damping effect for fusion reactor first wall, <i>T. Horie, T. Niho and Y. Tanaka</i>	401
Evaluation of flux flow resistivity of high Tc superconducting cable for application to fusion reactors, <i>Y. Fukuzaki, T. Uchimoto, Y. Yoshida and K. Miya</i>	409
Development of high field Tokamak with force-balanced coil, <i>J. Kondoh, K. Fujii, K. Nomoto, T. Harada, S. Tsuji-Iio and R. Shimada</i>	417
Fracture toughness of thick-section weld joint of SUS 316 at cryogenic temperature, <i>A. Nishimura, R.L. Tobler, H. Tamura, S. Imagawa and J. Yamamoto</i>	425
Failure mode and effect analysis on ITER heat transfer systems, <i>T. Pinna, R. Caporali, G. Cambi, L. Burgazzi, A. Poucet and M.T. Porfiri</i>	431
Impact of source term uncertainty on neutronics analysis of D-Li neutron irradiation facility (IFMIF), <i>Y. Oyama, K. Noda and K. Kosako</i>	437
Japanese contribution to ITER task of irradiation tests on diagnostics components, <i>T. Nishitani, E. Ishitsuka, T. Kakuta, H. Sagawa, K. Noda, Y. Oyama, T. Iida, T. Sugie, H. Kawamura and S. Kasai</i>	443
Optical measurements of high temperatures for material investigations in nuclear reactor environments, <i>F. Jensen, T. Kakuta, T. Shikama, T. Sagawa, M. Narui and M. Nakazawa</i>	449

## **XI. Repair and Maintenance**

Remote maintenance of in-vessel components for ITER, <i>T. Burgess, R. Haange, R. Hager, Y. Hattori, J. Herndon, C. Holloway, D. Maisonnier, E. Martin, N. Matsuhira, K. Shibamura, M. Sironi, E. Tada and A. Tesini</i>	455
Development of remote maintenance equipment for ITER blankets, <i>E. Tada, S. Kakudate, K. Oka, K. Obara, M. Nakahira, K. Taguchi, A. Itoh, S. Fukatsu, N. Takeda, H. Takahashi, K. Akou, K. Shibamura, T. Burgess, A. Tesini, N. Matsuhira, C. Holloway and R. Haange</i>	463
Simulation and experimental validation of first wall/blanket assembly and maintenance for the next step fusion reactor, <i>F. Andritsos, C. Damiani, F. Farfaletti-Casali, D. Maisonnier, G. Mercurio and E. Ruiz-Morales</i>	473
Magnetic nondestructive evaluation of fatigue damage of ferromagnetic steels for nuclear fusion energy systems, <i>A. Gilanyi, K. Morishita, T. Sukegawa, M. Uesaka and K. Miya</i>	485
A laser metrology/viewing system for ITER in-vessel inspection, <i>P.T. Spampinato, R.E. Barry, J.B. Chesser, J.N. Herndon, M.M. Menon, A. Slotwinski, M.A. Dagher and J.L. Yuen</i>	493
Development of 15-m-long radiation hard periscope for ITER in-vessel viewing, <i>K. Obara, A. Ito, S. Kakudate, K. Oka, M. Nakahira, Y. Morita, K. Taguchi, S. Fukatsu, N. Takeda, H. Takahashi, E. Tada, R. Hager, K. Shibamura and R. Haange</i>	501
Non-destructive characterization of plasma-sprayed tungsten and braze-joints for fusion by ultra-sonic examination, <i>I. Šmid, E. Kny, M. Scheerer, P.A. Hahn, G. Korb, J. Linke and G. Vieider</i>	511

## **XII. Inertial Confinement Fusion Energy**

Recent progress on fusion nuclear technology in inertial fusion, <i>J.M. Perlado and J. Sanz</i>	519
--	-----

Chamber technology concepts for inertial fusion energy—three recent examples, <i>W.R. Meier, R.W. Moir and M.A. Abdou</i>	537
Indirectly driven target design influence on energetic balance of inertial confinement fusion power plant, <i>N. Cerullo, S. Lanza and M. Vezzani</i>	549
Scaling criteria for IFE liquid wall protection scheme simulation, <i>A. Ying and M. Abdou</i>	555
Compressible response of thin liquid film/porous substrate first walls in IFE reactors, <i>N.B. Morley</i>	563
Author index of Parts A, B and C	569
