

# Receiver Operating Characteristic Analysis in Medical Imaging

## Contents

<b>Preface</b> . . . . .	1
<b>Glossary</b> . . . . .	3
<b>Abstract</b> . . . . .	7
<b>Executive Summary</b> . . . . .	9
<b>1 Introduction</b> . . . . .	11
1.1 Development of ROC Methodology . . . . .	11
1.2 The Need for Objective Assessment of Imaging Technology . . . . .	11
1.3 Methods for Evaluating an Imaging Technology . . . . .	11
1.4 The Meaning of Diagnostic Accuracy . . . . .	13
1.5 The Basics of ROC Analysis . . . . .	14
1.5.1 Producing an ROC Curve from a Single Data Set . . . . .	14
1.6 Inadequacy of Sensitivity and Specificity as Performance Measures . . . . .	16
1.7 Appropriate Clinical Tasks for ROC Methodology . . . . .	17
<b>2 The ROC Decision Model</b> . . . . .	19
2.1 The Decision Variable . . . . .	19
2.2 The Binormal Model . . . . .	19
2.3 ROC Curve Fitting . . . . .	20
2.3.1 Parametric and Semi-Parametric Models . . . . .	20
2.3.2 A Nonparametric Model . . . . .	20
2.3.3 Proper and Degenerate ROC Curves . . . . .	21
2.4 Single-Valued Indices of Observer Performance . . . . .	21
2.4.1 Area Under the ROC Curve and Index of Detectability . . . . .	21
2.4.2 Psychophysics and the Ideal Observer . . . . .	22
2.5 Forced-Choice Tasks . . . . .	22
<b>3 Conventional ROC Methodology</b> . . . . .	23
3.1 Indices of Diagnostic Performance Derived from ROC Curves . . . . .	23
3.2 Sources of Variance and Correlations . . . . .	23
3.3 Multireader Multicase Methodology . . . . .	24
3.3.1 Introduction . . . . .	24
3.3.2 The Jackknife Technique . . . . .	25
3.3.3 The MRMC Statistical Model . . . . .	25
3.3.4 Other Approaches to MRMC ROC Analysis . . . . .	26
3.3.5 Advantages of the MRMC Methodology . . . . .	27
<b>4 Generalizing the Results of an ROC Analysis</b> . . . . .	29

## RECEIVER OPERATING CHARACTERISTIC (ROC) ANALYSIS IN MEDICAL IMAGING

<b>5</b>	<b>Extensions to Conventional ROC Methodology: LROC, FROC, and AFROC</b>	<b>31</b>
5.1	Limitations of Conventional ROC Methodology	31
5.2	Location ROC (LROC)	31
5.3	Free Response ROC (FROC and AFROC)	33
5.4	AFROC Analysis	34
<b>6</b>	<b>Statistical Analysis and Power Estimation</b>	<b>37</b>
6.1	Hypothesis Testing	37
6.2	Estimating Statistical Power	38
6.3	Statistical Power Calculations	39
6.4	Combining ROC Data from Different Studies Using Meta-Analysis	40
<b>7</b>	<b>Some Practical Considerations when Planning ROC Studies</b>	<b>41</b>
7.1	Introduction	41
7.2	Population Studies and Stress Tests	41
7.3	Selecting an Efficient Methodology for a Comparison Study	41
7.4	Case Selection	42
7.4.1	Choice of Single or Multiple Abnormalities	42
7.4.2	Selection Bias	42
7.5	Case Verification	43
7.5.1	Clinical and Pathological Verification	43
7.5.2	Verification Using Imaging Procedures	43
7.5.3	Verification by Consensus Among Experts	43
7.5.4	Verification Bias	43
7.6	Observers	44
7.6.1	Selecting Observers	44
7.6.2	Instructions to Observers	44
7.6.3	Training Observers	45
7.7	Data Collection	45
7.7.1	Sequential Readings and Counterbalanced Designs	45
7.7.2	Continuous versus Discrete Rating Scales	45
7.8	Numbers of Cases and Readers Needed in an ROC Study	46
7.8.1	Effect Size	46
7.8.2	The Number of Cases	46
7.8.3	Variability Among Readers	46
7.9	Reporting the Results	47
<b>Appendix A</b>	<b>Computer Programs for ROC Analysis Available on the Internet</b>	<b>49</b>
<b>Appendix B</b>	<b>An Example of Multireader, Multicase ROC Analysis Using the DBM Methodology</b>	<b>51</b>
<b>Appendix C</b>	<b>Estimating Case Size and Reader Number from Pilot Data</b>	<b>53</b>
<b>References</b>		<b>57</b>
