

CONTENTS

Invited Lecture

J. Labat <i>SPIG from beginning to today</i>	13
-------------------------------------------------------	----

SECTION 1

ATOMIC COLLISION PROCESSES

Invited Lectures

Oddur Ingólfsson, Helga Dögg Flosadóttir, Benedikt Ómarsson and Ilko Bald <i>Comprehensive study on the metastable negative ion fragmentation of individual DNA components and larger oligonucleotides</i>	17
Jan M. Rost <i>Ultrafast and ultracold: Finite plasmas under extreme conditions</i>	18

Topical Lectures

Jiří Horáček and Ivana Páidarová <i>On the calculation of resonances by means of analytical continuation in coupling constant</i>	19
Ronald McCarroll <i>Isotopic effects in atomic and molecular reactions</i>	20

D. P. Van Der Werf, G. B. Andresen, M. D. Ashkezari, M. Baquero-Ruiz, W. Bertsche, P. D. Bowe, C. C. Bray, E. Butler, C. L. Cesar, S. Chapman, M. Charlton, J. Fajans, T. Friesen, M. C. Fujiwara, D. R. Gill, J. S. Hangst, W. N. Hardy, R. S. Hayano, M. E. Hayden, A. J. Humphries, R. Hydomako, S. Jonsell, L. Kurchaninov, R. Lambo, N. Madsen, S. Menary, P. Nolan, K. Olchanski, A. Olin, A. Povilus, P. Pusa, F. Robicheaux, E. Sarid, D. M. Silveira, C. So, J. W. Storey, R. I. Thompson, D. Wilding, J. S. Wurtele and Y. Yamazaki (Alpha collaboration) <i>Antimatter transport processes</i>	22
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

Progress Reports

Ana Banković <i>Recent advances in studies of positron swarms in electric and magnetic fields in gases</i>	24
Adric Jones, Peter Caradonna, Joshua Machacek, Casten Makochekeanwa, Daniel Slaughter, Robert McEachran, James Sullivan and Stephen Buckman <i>Trends in positron scattering from noble gases</i>	25

Aleksandar R. Milosavljević, A. Giuliani, C. Nicolas, J-F Gil, J. Lemaire, M. Refregiers and L. Nahon <i>Gas-phase photoionization of a protein</i>	26
Milovan Šuvakov, Srdjan Marjanović <i>Nonlinear transport in gases, traps and surfaces</i>	27
Contributed Papers	
J. Jose, G. B. Pradhan, V. Radojević, S. T. Manson, and P. C. Deshmukh <i>Inner shell photodetachment of Na⁺ using the multi-configuration Tamm-Dancoff approximation</i>	29
Jelena B. Maljković, Aleksandar R. Milosavljević, Zoran Pešić, F. Blanco, G. García, Dragutin Šević and Bratislav P. Marinković <i>Absolute differential cross section for elastic electron scattering from halothane at 100eV</i>	33
Aleksandar R. Milosavljević, Jelena B. Maljković, Dragutin Šević, Iztok Čadež and Bratislav P. Marinković <i>Measurement of kinetic energy distribution of positive ions from electron induced dissociation of pyrimidine molecule</i>	37
M. M. Ristić, G. B. Poparić and D. S. Belić <i>Electron impact excitation of the a³Π state of CO: Full range differential cross sections</i>	41
V. M. Ristić, T. B. Miladinović and J. M. Stevanović <i>Ionization transition rate for circularly polarized fields, for different Z, including non-zero initial momentum</i>	45
Nenad Simonović <i>The collinear helium atom – Hyperspherical approach</i>	49
Aleksandar R. Tančić and Miroslav Nikolić <i>Elastic scattering of electrons on atoms with one vacancy</i>	53
Svetlana Vučić and R. M. Potvliege <i>The role and character of resonant states in photoionization of atoms by strong infrared laser field</i>	59
Tasko Grozdanov and Ronald McCarroll <i>Statistical model for H⁺+D₂ reactive collisions based on mean isotropic interaction potential</i>	63
Ana Banković, Saša Dujko, Ronald D. White, Joan P. Marler, Gordana Malović, Stephen J. Buckman and Zoran Lj. Petrović <i>On diffusion of positrons in electric and magnetic fields in molecular gases</i>	67

Saša Dujko, Ute Ebert, Ronald White and Zoran Lj. Petrović <i>Electron transport data in N₂-O₂ streamer plasma discharges</i>	71
Željka Nikitović, Vladimir Stojanović and Zoran Lj. Petrović <i>Transport coefficients for electron scattering in mixtures of CF₄, Ar and O₂</i>	75

SECTION 2

PARTICLE AND LASER BEAM INTERACTION WITH SOLIDS

Invited Lecture

Satoshi Hamaguchi <i>Plasma surface interactions in material processing</i>	81
--------------------------------------------------------------------------------------	----

Topical Lecture

N. Bundaleski, A. G. Silva, U. Schröder, A. M. C. Moutinho and O. M. N. D. Teodoro <i>Adsorption dynamics of water on the surface of TiO₂ (110)</i>	82
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

Progress Reports

Ana Mančić <i>Generation and probing of warm dense matter (Al) created by laser-accelerated proton beam</i>	83
----------------------------------------------------------------------------------------------------------------------	----

M. A. Mirković, N. N. Nedeljković and D. K. Božanić <i>Formation and decay of the Rydberg states of multiply charged ions interacting with solid surfaces</i>	84
------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

Ivan Radović, Nataša Bibić and Zoran L. Mišković <i>Interactions of ions with graphene</i>	85
-----------------------------------------------------------------------------------------------------	----

Paul Tiwald, Christoph Lemell, Georg Wachter and Joachim Burgdörfer <i>Theory of below-threshold kinetic electron emission</i>	86
-----------------------------------------------------------------------------------------------------------------------------------------	----

Branko Tomčik <i>Deposition and characterization of ultra thin diamond like carbon films</i>	87
-------------------------------------------------------------------------------------------------------	----

Contributed Papers

Duško Borka, Srđan Petrović, Vladimir Lukić, Jeff Timko, Vesna Berec and Nebojša Nešković <i>Channeling of protons in a <100> Si thin crystal: A quantum mechanical approach</i>	89
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

Vesna Borka Jovanović, Srđan Petrović, Duško Borka and Nebojša Nešković <i>Regular and chaotic motions of protons in the Hénon-Heiles potential well</i>	93
-------------------------------------------------------------------------------------------------------------------------------------------------------------------	----

D. K. Božanić and N. N. Nedeljković <i>The influence of initial velocity distribution on ionization dynamics of Rydberg atoms approaching solid surfaces in the electric field</i>	97
S. M. D. Galijaš, N. N. Nedeljković, M. D. Majkić and A. B. Bunjac <i>The effect of core polarization on the population of the Rydberg states of ArVIII ions escaping solid surfaces</i>	101
M. D. Majkić, N. N. Nedeljković and S. M. D. Galijaš <i>Neutralization of multiply charged Rydberg ions interacting with solid surfaces under the grazing incidence geometry</i>	105
M. A. Mirković, N. N. Nedeljković and D. K. Božanić <i>Survival of large-l Rydberg states of highly charged ions in the vicinity of metal surfaces</i>	109
N. N. Nedeljković, D. K. Božanić, R. J. Dojčilović, J. D. Pajović <i>Self-consistent procedure for treatment of the ionization dynamics of Rydberg atoms approaching solid surfaces in the electric field</i>	113
Ivan Radović, Vesna Borka Jovanović and Zoran L. Mišković <i>Interactions of fast ions with supported graphene: Quantum hydrodynamic model</i>	117
Jovan Vukanić and Rodoljub Simović <i>Interpolation formula for reflection coefficient of keV light ions from solids upon angle of incidence</i>	121
V. Goncharov, G. Gusakov, M. Puzyrev, M. Samtsov <i>Pulsed laser deposition of diamond-like amorphous carbon films from different carbon targets</i>	125
Aleksandar Bojarov, Marija Radmilović-Radjenović and Zoran Lj. Petrović <i>The influence of the ion induced secondary electron emission on the characteristics of rf plasmas</i>	131
A. N. Chumakov, N. A. Berjeza, N. A. Bosak, J. D. Hu, Z. X. Guo, Q. Q. Xie <i>Nanostructural modification of Al-C-Ti-coating on AZ91D alloy using multipulse nanosecond laser action</i>	135
Victor Goncharov, Konstantin Kozadaev and Dmitriy Shechegrikovich <i>The investigation of two-phase plasma fluxes of silver</i>	139
Ljubomir Nikolić, Tudor W. Johnston, Francois Vidal, Seiji Ishiguro and Miloš M. Škorić <i>Relativistic short-pulse laser interaction with thin foils</i>	143

Marica Popović, Draško Furundžić and Slobodanka Galović <i>Photothermal depth profiling of optical gradient materials by neural network</i>	147
Vadym Prysiashnyi <i>Aluminium surface atmospheric pressure DCSBD plasma treatment in air and nitrogen atmospheres</i>	151

SECTION 3

LOW TEMPERATURE PLASMAS

Invited Lectures

Yuri Akishev, Mikhail Grushin, Vladimir Karalnik, Igor Kochetov, Anatoly Napartovich and Nikolay Trushkin <i>Generation of atmospheric pressure non-thermal plasma by diffusive and constricted discharges in rest and flowing gases (air and nitrogen)</i>	157
Pascal Chabert and Emilie Despiau-Pujo <i>Modelling of chlorine inductive discharges</i>	158
Ulrich Kogelschatz <i>Collective phenomena in volume and surface barrier discharges</i>	160
Yuri Lebedev <i>Microwave discharges: Generation and diagnostics</i>	161

Topical Lectures

Valery Arkhipenko, Evgeniy Gusakov and Leanid Simonchik <i>Parametric decay instability control by non-monochromatic pumps</i>	162
Elena Filimonova and George Naidis <i>Effect of gas mixture composition on tar removal process in a pulsed corona discharge reactor</i>	163
Åshild Fredriksen, Lekha Nath Mishra and Njål Gulbrandsen <i>On magnetic field geometry and its effects on double layers and flows in low-temperature plasmas</i>	164
Lu-Jing Hou, Alexei Ivlev, Hubertus M. Thomas, Gregor E. Morfill <i>Numerical experiments in strongly coupled complex (dusty) plasmas</i>	165
Miran Mozetić <i>Application of highly non-equilibrium plasma for modification of biomedical samples</i>	166

Ramón J. Peláez, Stevica Djurović, Mihaela Ćirišan, Juan Antonio Aparicio and Santiago Mar <i>Regularities and irregularities of the Stark parameters for single ionized noble gases</i>	167
Progress Reports	
Saša Gocić <i>Electrical breakdown in nitrogen at low pressure - Physical processes and statistics</i>	168
Olivier Guaitella, Ilya Marinov, Binjie Dong, Antoine Rousseau <i>Influence of adsorbent materials on streamers propagation in air and induced chemical efficiency</i>	169
Kari Niemi, Jochen Waskoenig, Lucy Marie Graham and Timo Gans <i>Optical diagnostics on cold atmospheric pressure plasmas</i>	170
Bratislav M. Obradović <i>Evolution of electric field in dielectric barrier discharge in helium</i>	171
Suzana N. Stamenković <i>New models and distributions of the electrical breakdown time delay in neon</i>	172
Contributed Papers	
Michail Belkov, Victor Burakov, Alessandro De Giacomo, Vasilii Kiris, Sergei Raikov and Nikolai Tarasenko <i>Laser-induced breakdown spectroscopy for rapid detection of carbon in soils</i>	173
Michail Belkov, Victor Burakov, Vasilii Kiris and Sergei Raikov <i>Development of calibration-free algorithm in laser-induced breakdown spectroscopy</i>	177
Viktor Burakov, Nikolai Tarasenko, Mikhail Nedelko, Oleksandr Shuaibov, Mikhail Chuchman <i>Time-resolved spectroscopy and imaging diagnostics of laser-produced plasma from a chalcogenide sample</i>	181
Mihaela Ćirišan, Ramon J. Peláez, Stevica Djurović, Juan Antonio Aparicio and Santiago Mar <i>Measured Stark shifts of some Kr III UV lines</i>	185
Marko Cvejić, Sonja Jovićević, Emilien Mothe, Laurent Mercadier, Nikola Konjević, Jörg Hermann <i>Electron density diagnostics of laser induced plasma in helium</i>	189

Stevica Djurović, Ramon J. Peláez, Mihaela Ćirišan, Juan Antonio Aparicio and Santiago Mar <i>Kr III stark halfwidths measured in pulsed arc plasma</i>	193
Stevica Djurović and Igor Savić <i>Correction of the H_{β} spectral line profile to the influence of the neighbour hydrogen lines for high electron densities</i>	197
Milivoje Ivković, Manuel Ángel González, Sonja Jovićević, Marco Antonio Gigosos, Nikola Konjević <i>Stark broadening of the He I 447.1 nm line and its forbidden components in dense cool plasma</i>	201
Saša Lazović, Nevena Puač, Gordana Malović and Zoran Lj. Petrović <i>Spatial profiles of electron and ion concentrations in a large size CCP discharge obtained by using a Langmuir probe</i>	205
Gordana Lj. Majstorović, Nikola M. Šišović and Nikola Konjević <i>Comparative spectroscopic temperature measurements in hydrogen hollow cathode glow discharge</i>	209
Vera Mazankova, Frantisek Krcma, Ivana Bockova, Ivo Soural and Vasco Guerra <i>Mercury titration in nitrogen post-discharge</i>	213
Zoran Mijatović, Dragan Nikolić, Radomir Kobilarov and Milivoje Ivković <i>Stark broadening of the hydrogen H_{γ} spectral line</i>	217
Slavoljub Mijović and Mira Vučeljić <i>Influence of experimental errors on determination of a real profile of spectral lines by regularization method</i>	221
B. M. Obradović, N. Cvetanović and M. M. Kuraica <i>Study of titanium emission spectra in $N_2 - H_2$ abnormal DC glow discharge</i>	225
Maja Rabasović, Dragutin Šević, Mira Terzić and Bratislav Marinković <i>Detecting indium in electric waste using laser induced breakdown spectroscopy</i>	229
Mara Šćepanović <i>Stark widths predictions from temperatures dependencies of several multiply charged ions spectral lines</i>	233
Valery Arkhipenko, Andrey Kirillov, Yauhen Safronau and Leanid Simonchik <i>Microdischarges in the current range from microamperes to amperes</i>	237

Milada Bartlova, Vladimir Aubrecht and Oldrich Coufal <i>Net emission coefficients of radiation in thermal plasmas of air with carbon admixture</i>	241
Jovica Jovović, Nikola M. Šišović and Nikola Konjević <i>Spatial distribution of ArI line intensity in a low-pressure microwave discharge in argon and argon-molecular gas mixtures</i>	245
Kinga Kutasi <i>Comparison of plasmas generated from N₂-O₂ and NO by an Ar ion jet in low pressure reactor</i>	249
Yuri Lebedev, Timur Mavlyudov, Iren Epstein and Anna Chvyreva <i>Nonequilibrium strongly nonuniform microwave discharge in the mixture of nitrogen with argon</i>	253
Vidosav Lj. Marković, Saša R. Gocić, Suzana N. Stamenković <i>Breakdown energy of gases and the surface law</i>	257
Dmitry Polyakov, Valeria Shumova, Leonid Vasilyak and Vladimir Fortov <i>Simulation of dust particles influence on plasma of DC discharge</i>	261
Paulo A. Sá, Kinga Kutasi and Vasco Guerra <i>Electron kinetics in the ternary mixtures Ar-O₂-N₂ and He-O₂-N₂</i>	265
Marija Savić, Marija Radmilović-Rađenović and Zoran Lj. Petrović <i>The effect of metastable atoms on the secondary electron production in argon</i>	269
Dmitriy Shutov, Alexander Ivanov, Sergey Smirnov, Vladimir Rybkin <i>Experimental and theoretical studies on the characteristics of low-pressure glow discharge with liquid cathode</i>	273
Suzana N. Stamenković, Vidosav Lj. Marković and Saša R. Gocić <i>Nonstationary exponential distributions of the breakdown voltages in ramp breakdown experiments</i>	277
Nikola Škoro, Dragana Marić, Gordana Malović, William G. Graham and Zoran Lj. Petrović <i>Low-pressure DC discharge in water vapour</i>	281
B. Dojčinović, G. Roglič, B. M. Obradović, M. M. Kuraica, J. Purić, M. Natić, T. Tosti and D. Manojlović <i>Degradation of 4-chlorophenol using water falling film DBD reactor</i>	285
Irina Filatova, Viktor Azharonok, Mikhail Kadyrov, Vladimir Beljavsky, Bozena Sera, Iveta Hruskova, Petr Spatenka and Michal Sery <i>RF and microwave plasma application for pre-sowing caryopsis treatments</i>	289

Aleksandra Jesenko, Dusan Popović and Vladimir Milosavljević <i>Measurement of etch rate for SiO₂ single crystal treated with DC-plasma</i>	293
Vesna V. Kovačević, Bratislav M. Obradović, Goran B. Sretenović, Milorad M. Kuraica and Jagoš Purić <i>Electrical and spectral diagnostics of water falling film DBD in nitrogen and air</i>	297
A. L. Mosse, A. V. Lozhachnik, G. E. Savchenko, V. V. Sauchyn <i>Mobile plasma unit for toxic waste destruction</i>	301
Nevena Puač, Dejan Maletić, Saša Lazović, Gordana Malović, Antonije Đorđević and Zoran Lj. Petrović <i>Current-voltage characteristics of atmospheric pressure plasma jet</i>	307
Nina Radić, Biljana Dojčinović, Bratislav M. Obradović, Milorad M. Kuraica and Mirko Černák <i>Depositon of silver on plasma activated polypropylene surface by dielectric barrier discharge</i>	311
V. Sazavska, F. Krcma, N. Zemanek, L. Radkova, P. Fojtikova, R. Prikryl, M. Zmrzly, D. Janova <i>Pulsed RF low pressure hydrogen plasma for plasmachemical corrosion removal</i>	315
I. P. Smyaglikov, N. I. Chubrik, O. O. Kuznechik and D. V. Minko <i>Formation of antifriction and wear-proof coatings by heterogeneous arc plasma</i>	319
Goran B. Sretenović, Bratislav M. Obradović, Vesna V. Kovačević, Milorad M. Kuraica and Jagoš Purić <i>Pulsed corona discharge generated by Marx generator</i>	323
M. P. Valdivia, E. S. Wyndham, M. Favre and J. C. Valenzuela <i>Pulsed capillary discharge operated as a compact soft X-ray source</i>	327
Hana Vojkovská, Jitka Slámová, Zdenka Kozáková and František Krčma <i>Study of sterilization effect of dielectric barrier discharge on eucaryotic microorganisms</i>	331

SECTION 4

GENERAL PLASMAS

Invited Lectures

Wolfram Kollatschny <i>Line profile variations in selected Seyfert galaxies</i>	337
Akio Komori <i>High density and high temperature plasmas in Large Helical Device</i>	338

Topical Lectures

Seiji Ishiguro <i>Multi-scale simulation for plasma science</i>	339
A. N. Klyucharev, N. N. Bezuglov, A. A. Mihajlov, Lj. M. Ignjatovic <i>Influence of inelastic Rydberg atom-atom collisional process on kinetic and optical properties of low-temperature laboratory and astrophysical plasmas</i>	340
Sylvie Sahal-Bréchet <i>Case studies on recent Stark broadening calculations and Stark-B database development in the framework of the European project VAMDC (Virtual Atomic and Molecular Data Center)</i>	341
Progress Reports	
Edi Bon, Luka Č. Popović, Nataša Gavrilović and Giovanni La Mura <i>The disk emission in the broad line region of active galactic nuclei</i>	342
Vesna Borka Jovanović and Dejan Urošević <i>Spectral indices of radio loops</i>	343
Dejan Dimitrijević <i>Parametric dependence of two-plasmon decay in homogeneous plasma</i>	344
Milan S. Dimitrijević, Sylvie Sahal-Brechet, Andjelka Kovačević, Darko Jevremović, Luka Č. Popović <i>European Virtual Atomic and Molecular Data Center – VAMDC</i>	345
Ivan P. Dojčinović <i>Plasma flow interaction with iter divertor related surfaces</i>	346
Dragana Ilic, Luka Popovic, Stefano Ciroi, Giovanni La Mura, Piero Rafanelli <i>Physical properties of the broad line region in active galactic nuclei</i>	347
Evangelia Lyratzi, Emmanuel Danezis, Luka Č. Popović, Antonios Antoniou, Milan S. Dimitrijević and Dimitrios Stathopoulos <i>Using the GR model to study the AGN spectra</i>	348
Nenad Sakan <i>The calculation of the photo absorption processes in dense hydrogen plasma with the help of cut-off Coulomb potential model</i>	349
Zoran Simić <i>Stark broadening of heavy metal spectral lines in atmospheres of chemically peculiar stars</i>	350

Contributed Papers

Mahmoud Moslehi-Fard, Samad Sobhanian and Laleh Ataei Seresh <i>Accessibility of lower hybrid wave in Tokamak and study of frequency and magnetic field effects on accessibility</i>	351
Milan Rajković, Mitsuo Kono, Yasuaki Kishimoto and Miloš M. Škorić <i>Local multifractal characteristics of confined fusion plasma and neutral fluid turbulence</i>	355
Samad Sobhanian, M. A. Mohammad, Maryam Golalikhani, Mahmood Moslehi-Fard and Sirius Khorram <i>Neutron measurements in Sahand plasma focus</i>	359
Andjelka Kovačević, Luka Č. Popović, Alla Shapovalova and Dragana Ilić <i>Timing analysis of light curves of 3C390.3</i>	363
Jelena Kovačević and Luka Č. Popović <i>Contribution of starburst regions in AGN spectra</i>	367
F. Krema, K. Klohnova, L. Polachova, G. Horvath <i>Optical emission spectroscopy of abnormal glow discharge in nitrogen-methane mixtures at atmospheric pressure</i>	371
Neila Larbi-Terzi, Sylvie Sahal-Brechet, Nebil Ben Nessib and Milan S. Dimitrijević <i>Stark broadening parameters for white dwarf atmospheres research</i>	375
Dušan Onić and Vladimir M. Čadež <i>Effects of radiation on convective instability in stratified stellar plasmas</i>	379
Vladimir A. Srećković, Ljubinko M. Ignjatović, Anatolij A. Mihajlov and Milan S. Dimitrijević <i>Electrical conductivity of plasmas in DB white dwarf atmospheres</i>	383
Marko Stalevski, Predrag Jovanović, Luka Č. Popović <i>Perturbations in the accretion disk emissivity: Theory versus observations</i>	387
Desanka Šulić, Aleksandra Nina and Vladimir Srećković <i>Numerical simulations of the effect of localised ionospheric perturbations on subionospheric VLF propagation</i>	391
Author index	397
Program of the SPIG 2010	402
