Contents

Series Foreword ix

Preface xi

Acknowledgments xiii

I GENERAL PRINCIPLES

1 Connectionist Learning for Control: An Overview 5
Andrew G. Barto

2 Overview of Designs and Capabilities 59
Paul J. Werbos

3 A Menu of Designs for Reinforcement Learning Over Time 67
Paul J. Werbos

4 Adaptive State Representation and Estimation Using Recurrent Connectionist Networks 97
Ronald J. Williams

5 Adaptive Control using Neural Networks 115
Kumpati S. Narendra

6 A Summary Comparison of CMAC Neural Network and Traditional Adaptive Control Systems 143
L. Gordon Kraft, III, and David P. Campagna

7 Recent Advances in Numerical Techniques for Large Scale Optimization 171
David F. Shanno

8 First Results with Dyna, An Integrated Architecture for Learning, Planning and Reacting 179
Richard S. Sutton

II MOTION CONTROL

9 Computational Schemes and Neural Network Models for Formation and Control of Multijoint Arm Trajectory 197
Mitsuo Kawato

10 Vision-Based Robot Motion Planning 229
Bartlett W. Mel

11 Using Associative Content-Addressable Memories to Control Robots 255
Christopher G. Atkeson and David J. Reinkensmeyer

12 The Truck Backer-Upper: An example of Self-Learning in Neural Networks 287
Derrick Nguyen and Bernard Widrow

13 An Adaptive Sensorimotor Network Inspired by the Anatomy and Physiology of the Cerebellum 301
James C. Houk, Satinder P. Singh, Charles Fisher, and Andrew G. Barto

14 Some New Directions for Adaptive Control Theory in Robotics 349
Judy A. Franklin and Oliver G. Selfridge

III APPLICATION DOMAINS

15 Applications of Neural Networks in Robotics and Automation for Manufacturing 365
Arthur C. Sanderson

16 A Bioreactor Benchmark for Adaptive Network-based Process Control 387
Lyle H. Ungar

17 A Neural Network Baseline Problem for Control of Aircraft Flare and Touchdown 403
Charles C. Jorgensen and C. Schley

18 Intelligent Control for Multiple Autonomous Undersea Vehicles 427
Martin Herman, James S. Albus, and Tsai-Hong Hong

A A Challenging Set of Control Problems 475
Charles W. Anderson and W. Thomas Miller

Index 511
