	Preface		xi
	Not	tation	xiii
1	Introduction		
	1.1	Multivariable Systems	2
	1.2	Nonlinear Systems	5
	1.3	Discrete and Continuous Time Models and Controllers .	6
	1.4	Some Basic Concepts in Control	8
	1.5	Gain and Signal Size	15
	1.6	Stability and the Small Gain Theorem	18
	1.7	Comments	22
P	ART	I LINEAR SYSTEMS	25
2	Rep	presentation of Linear Systems	27
	2.1^{-1}	Impulse Response and Weighting Function	27
	2.2	Transfer Function Matrices	28
	2.3	Transfer Operator	30
	2.4	Input–Output Equations	30
	2.5	State Space Form	31
	2.6	Discrete Time Systems	37
	2.7	Comments	41
3	Properties of Linear Systems		
	3.1	Solving the System Equations	43
	3.2	Controllability and Observability	44
	3.3	Poles and Zeros	48
	3.4	Stability	53
	3.5	Frequency Response and Frequency Functions	58
