

## CONTENTS

Preface by the Translators* . . . . .	v
Notation . . . . .	ix
Introduction . . . . .	1
Note on Vinogradov's Method by the Translators* . . . . .	19
I. General Lemmas . . . . .	21
Notes . . . . .	42
II. The Investigation of the Singular Series in Waring's Problem . . . . .	45
Notes . . . . .	54
III. The Contribution of the Basic Intervals in Waring's Problem . . . . .	55
Notes . . . . .	61
IV. An Estimate for $G(n)$ in Waring's Problem. . . . .	62
Notes . . . . .	69
V. Approximation by the Fractional Parts of the Values of a Polynomial . . . . .	71
Notes . . . . .	81
VI. Estimates for Weyl Sums . . . . .	82
Notes . . . . .	113
VII. The Asymptotic Formula in Waring's Problem . . . . .	117
Notes . . . . .	123
VIII. The Distribution of the Fractional Parts of the Values of a Polynomial . . . . .	124
Notes . . . . .	127

\* These, and the notes to the individual chapters, have been added to the translation.

IX. Estimates for the Simplest Trigonometrical Sums with Primes . . . . .	128
Notes . . . . .	162
X. Goldbach's Problem . . . . .	163
Notes . . . . .	175
XI. The Distribution of the Fractional Parts of the Values of the Function $\alpha p$ . . . . .	177
Notes . . . . .	180
