

CONTENTS

Foreword

1. Photo	1
2. Data	2
3. Conference Program	3
4. Presentation		

The effect of photochromic groups on fullerene acceptor towards the thermal stability and efficiency of organic solar cells Chinnusamy Saravanan (Sona College of Technology, India)	21
--	-------	----

Addressing the 2nd Major Obstacle to Commercial DT Fusion Reactors: a Low Cost, Near Term 14 MeV Neutron Materials Test Facility Gerald L. Kulcinski (University of Wisconsin-Madison, U.S.A)	29
---	-------	----

Catabolism of lignin-derived aromatic compounds in <i>Sphingobium</i> sp. SYK-6 and its potential applications Eiji Masai (Nagaoka University of Technology, Japan)	37
---	-------	----

Ultrafast Electron Diffraction Facility based on an RF Photogun and Achromatic 90-degree Bends for 10-femtosecond Timing Jitter Young Uk Jeong (Korea Atomic Energy Research Institute, Korea)	47
--	-------	----

Progress of Integrated Modeling of Magnetic Fusion Plasmas Atsushi Fukuyama (Kyoto University, Japan)	64
--	-------	----

Sustainable Food and Energy Co-Production via Green Energy Farms (GEFs) Daisuke Shibata (Kazusa DNA Research Institute, Japan)	72
---	-------	----

How a newly discovered enzyme shatters our beliefs in the function of well-known fungal oxidoreductases Roland Ludwig (BOKU - University of Natural Resources and Life Sciences, Austria)	78
--	-------	----

Development of Na-Storage Inorganic Compounds and their Anode Properties for Rechargeable Battery Masahiro Shimizu (Shinshu University, Japan)	87
--	-------	----

Advanced Applications of Novel Light Sources Based on Electron Linear Accelerators Yasushi Hayakawa (Nihon University, Japan)	95
Data analysis of plasma turbulence in a linear device and its application to Heliotron J Yoshihiko Nagashima (Kyushu University, Japan)	107
Microtube-forming polymers of bacterial origin Minoru Takeda (Yokohama National University, Japan)	114
Development of iron-base composite materials with high thermal conductivity Naoyuki Hashimoto (Hokkaido University, Japan)	121
Tungsten Material Developments for Plasma Facing Components of Fusion Reactor Akira Hasegawa (Tohoku University, Japan)	127
Impact of Mid-Infrared Free-Electron Laser on Molecular Structures of Bio-related Compounds Takayasu Kawasaki (Tokyo University of Science, Japan)	134

5. Panel Discussion

Research Collaborations for Zero-Emission Energy Moderator: Takashi Sagawa (Kyoto University, Japan) Panelist: Young Uk Jeong (Korea Atomic Energy Research Institute, Korea) Roland Ludwig (BOKU - University of Natural Resources and Life Sciences, Austria) Atsushi Fukuyama (Kyoto University, Japan) Savitri Garivait (King Mongkut's University of Technology Thonburi, Thailand) Roger Dargaville (Melbourne Energy Institute, School of Earth Sciences, Australia)	147
--	-----

6. Parallel Seminar, Satellite Meeting

Recent progress in wood biomass research	171
Exploring novel principles for highly efficient utilization of solar energy 2016	172
The 1st International Workshop on CSR and free electron lasers from ultra short bunch electron beam (Satellite Meeting)	174

7. Poster Session
