

## Table of Contents

Preface ..... ii

### Invited talks

|  |    |
|--|----|
| 1. Clarifying slow roll inflation and the quantum corrections to the observable power spectra<br>Hector J. de Vega ..... | 1  |
| 2. How I Learned to Like $w < -1$ Dark Energy<br>Nemanja Kaloper .....   |    |
| 3. Primordial Black Holes as a Probe of Inflation, Dark Matter and Extra Dimensions<br>Bernard Carr .....                | 21 |
| 4. The CMB in 2005: has anything changed?<br>Andrew Jaffe .....  |    |
| 5. Probing new physics with the LHC<br>Junichi Tanaka .....  | 41 |
| 6. Collapsing dynamics and symmetry-breaking in Bose-Einstein condensates<br>Masahito Ueda .....                         |    |
| 7. Recent Progress in the Study of Gamma-Ray Bursts<br>Shiho Kobayashi .....   | 57 |
| 8. Progenitors of Gamma-Ray Bursts<br>Miguel-Angel Aloy .....  | 62 |
| 9. Status of numerical relativity and GRMHD simulation<br>Masaru Shibata .....   |    |
| 10. Inflation in AdS/CFT<br>Robert Myers .....   |    |
| 11. QCD and supergravity<br>Shigeki Sugimoto .....   |    |
| 12. On the origin of gravitational thermodynamics<br>Vijay Balasubramanian .....   |    |
| 13. Eguchi-Hanson Solitons in AdS spacetime<br>Robert Mann .....   | 75 |
| 14. Black holes and the cosmic censorship conjectures<br>Mihalis Dafermos .....  |    |

## Oral Presentation

|     |  |     |
|-----|--|-----|
| 1.  | <b>PBH and DM from cosmic necklaces</b><br>Tomohiro Matsuda .....  | 84  |
| 2.  | <b>Super-horizon black hole and its evolution</b><br>Tomohiro Harada .....   | 88  |
| 3.  | <b>Correspondence between Loop-inspired and Brane cosmology</b><br>Shuntaro Mizuno .....   | 92  |
| 4.  | <b>Possibility of realization of a curvaton scenario in a theory with two dilatons coupled to the scalar curvature</b><br>Kazuharu Bamba ..... | 96  |
| 5.  | <b>Black hole phase transition as nonequilibrium dynamics</b><br>Hiromi Saida .....  | 100 |
| 6.  | <b>Toawrd a no-go theorem for accelerating universe by nonlinear backreaction</b><br>Masumi Kasai .....  | 104 |
| 7.  | <b>Research of the nature of dark matter via the lensing effects to high redshift type Ia supernovae observation</b><br>Chul-Moon Yoo .....    | 107 |
| 8.  | <b>The Quintom model of dark energy</b><br>Bo Feng .....   | 111 |
| 9.  | <b>Dark Energy and Cross Correlation of CMB with LSS</b><br>Tomo Takahashi .....   | 115 |
| 10. | <b>Constraining curvature and dark energy from the baryon acoustic peak and supernovae</b><br>Kazuhide Ichikawa .....                          | 115 |
| 11. | <b>Graviton emission from a higher-dimensional black hole</b><br>Alan Cornell .....  | 119 |
| 12. | <b>Close-limit analysis for collision of two black holes in higher dimensions</b><br>Hirotaka Yoshino .....                                    | 123 |
| 13. | <b>Black holes on and off the wall</b><br>Antonino Flachi .....  | 127 |
| 14. | <b>Solitonic generation of 5-dimensional black ring solutions</b><br>Hideo Iguchi .....  | 131 |
| 15. | <b>The avoidance of the ghost problem in the DGP braneworld model</b><br>Keisuke Izumi .....   | 135 |
| 16. | <b>Deformed horizons and singularities in five dimensional charged black holes</b><br>Ken Matsuno .....  | 139 |
| 17. | <b>Geometrical Aspects of D-branes : Black Hole Microstates</b><br>Shunji Matsuura .....   | 143 |
| 18. | <b>Geometrical Aspects of D-branes : Boundary States and Gravity Solutions</b><br>Shinpei Kobayashi .....                                      | 147 |
| 19. | <b>Generalized variational principle for stellar dynamics and quasi-equilibrium states in N-body system</b><br>Atsushi Taruya .....            | 151 |
| 20. | <b>Analytical study of axi-symmetric shell collapses</b><br>Masafumi Seriu .....   | 155 |
| 21. | <b>Gravitational Radiation from Stationary Rotating Cosmic Strings</b><br>Kouji Ogawa .....  | 159 |
| 22. | <b>Wave effects in gravitational lensing by a cosmic string</b><br>Teruaki Suyama .....  | 163 |
| 23. | <b>MHD Shocks for Accreting Plasma onto a Black Hole</b><br>Masaaki Takahashi .....  | 167 |
| 24. | <b>The verification of Tidal effects in the relativistic treatment</b><br>Kentaro Takami .....   | 171 |
| 25. | <b>Accurate evolution of Orbiting Binary Black Holes</b><br>Ryoji Takahashi .....  | 175 |
| 26. | <b>Gravitational wave from realistic stellar collapse : odd parity perturbation</b><br>Kenta Kiuchi .....                                      | 179 |
| 27. | <b>The Evolution of the 'Constant' of Motion in Kerr Background</b><br>Katsuhiko Ganz .....  | 183 |
| 28. | <b>Progress in observational two-body problem</b><br>Hideki Asada .....  | 185 |
| 29. | <b>Operator geometry and algebraic quantum gravity</b><br>Masaru Siino .....   | 189 |
| 30. | <b>Classification of cohomogeneity-one membranes</b><br>Hiroshi Kozaki .....   | 193 |
| 31. | <b>Cosmology with Warped String Compactification</b><br>Shinji Mukohyama .....   | 193 |

|  |     |
|--|-----|
| 32. <b>The spectrum of gravitational waves in Randall-Sundrum braneworld cosmology</b><br>Tsutomu Kobayashi .....                  | 197 |
| 33. <b>Effective Action Approach to String Gas Compactification</b><br>Sugumi Kanno .....  | 201 |
| 34. <b>Black hole entropy in loop quantum gravity</b><br>Takashi Tamaki .....  | 205 |
| 35. <b>Scalar Field Contribution to Rotating Black Hole Entropy</b><br>Masakatsu Kenmoku .....                                     | 209 |
| 36. <b>Universal property from local geometry of Killing horizon</b><br>Jun-ichirou Koga .....                                     | 213 |
| 37. <b>Moduli Instability in Warped Compactification</b><br>Kunihito Uzawa .....   | 217 |
| 38. <b>Inner structure of Kaluza-Klein black holes</b><br>Hideki Ishihara .....  | 221 |
| 39. <b>Stationary Spacetime from Intersecting M-branes</b><br>Makoto Tanabe .....  | 225 |
| 40. <b>Is there a stable phase of non-uniform black branes?</b><br>Umpei Miyamoto .....  | 229 |
| 41. <b>Fractional space-like branes on a time-like orbifold</b><br>Shinsuke Kawai .....  | 233 |
| 42. <b>A variational formulation for the Einstein-Maxwell equations</b><br>Sumio Yamada .....                                      | 237 |
| 43. <b>Critical Behaviour in Gravitational Collapse of Tangential Pressure Model</b><br>Ashutosh Mahajan .....                     |     |
| 44. <b>Numerical study of naked singularity</b><br>Ken-ichi Nakao .....  | 241 |
| 45. <b>Angular momentum and conservation laws for dynamical black holes</b><br>Sean A. Hayward .....                               | 245 |
| 46. <b>New dynamical solutions for the Einstein-scalar field system and their asymptotic behaviors</b><br>Makoto Yoshikawa .....   | 249 |
| 47. <b>Time evolution of density perturbations in self-similar gravitational collapse of a perfect fluid</b><br>Eiji Mitsuda ..... | 253 |

## Poster Presentation

|  |     |
|--|-----|
| 1. <b>Signal-to-noise ratio of the CMB angular trispectrum using the full radiative transfer functions</b><br>Noriyuki Kogo .....                | 257 |
| 2. <b>Covariant boundary conditions for perturbation in compactified codimension-two braneworlds</b><br>Yuuiti Sendouda .....                    | 261 |
| 3. <b>Effects of Gauss-Bonnet term on the final fate of gravitational collapse</b><br>Hideki Maeda .....   | 265 |
| 4. <b>Second order perturbation and energy loss by the KK modes in the RS model</b><br>Shunichiro Kinoshita .....                                | 269 |
| 5. <b>Detecting a gravitational-wave backgrounds with next-generation space interferometers</b><br>Hideaki Kudoh .....                           | 273 |
| 6. <b>Detecting a stochastic background of gravitational waves in presence of non-Gaussian Noise</b><br>Yoshiaki Himemoto .....                  | 277 |
| 7. <b>Gravitational Self-force for Low Multipole Modes</b><br>Hiroyuki Nakano .....  | 281 |
| 8. <b>Search for inspiraling neutron star binaries by TAMA300 detector</b><br>Hideyuki Tagoshi .....   |     |
| 9. <b>The accelerating universe and spin-interacting fields in Einstein-Cartan theory</b><br>Tomoki Watanabe .....                               | 285 |
| 10. <b>Solitonic solutions of five dimensional vacuum Einstein equations generated by the inverse scattering method</b><br>Shinya Tomizawa ..... | 289 |
| 11. <b>Skyrme Branes</b><br>Noriko Shiiki .....  | 293 |
| 12. <b>Induced metric on classical brane fluctuation</b><br>Konosuke Sawa .....  | 297 |
| 13. <b>Effects of Lovelock terms on the final fate of gravitational collapse</b><br>Masato Nozawa .....  | 301 |

|  |     |
|--|-----|
| 14. <b>Wronskian Formulation for the Spectrum of Curvature Perturbations</b>                       |     |
| Shuichiro Yokoyama .....   | 305 |
| 15. <b>Thermodynamics of Kalza-Klein black holes</b>   |     |
| Yasunari Kurita .....  | 309 |
| 16. <b>Second order gauge invariant perturbation theory and cosmological perturbations</b>         |     |
| Kouji Nakamura .....   | 313 |
| 17. <b>High-energy effective theory for a bulk brane</b>   |     |
| Shunsuke Fujii .....   | 317 |
| 18. <b>Can we create a universe in the laboratory?</b>   |     |
| Nobuyuki Sakai .....   | 320 |
| 19. <b>A new canonical formalism of <math>f(R)</math>-type gravity in terms of Lie derivatives</b> |     |
| Yoshiaki Ohkuwa .....  | 324 |
| 20. <b>Non-Gaussianity of one-point distribution functions in the Universe</b>                     |     |
| Takayuki Tatekawa .....  | 328 |
| 21. <b>Non-BPS D9-branes in the Early Universe</b>   |     |
| Kenji Hotta .....  | 332 |
| 22. <b>Equilibrium problem of non-BPS black holes in D=5 supergravity</b>                          |     |
| Daisuke Ida .....  |     |
| 23. <b>Black Hole Evaporation in Vaidya Spacetime</b>  |     |
| Shintaro Sawayama .....  | 336 |
| 24. <b>Can thick braneworlds be self-consistent ?</b>  |     |
| Masato Minamitsuji .....   | 340 |
| 25. <b>Non-Gaussianity from multi-field stochastic inflation</b>                                   |     |
| Takeshi Hattori .....  | 344 |
