WELCOME ADDRESS	I
OPENING AND INTRODUCTION	II
EXECUTIVE SUMMARY	V
SUMMARY OF THE WORKSHOP	VII
Agenda	
Participants List	
PLENARY TALK	
(1) Overview of PFM/PFC Research in US, W. B. Gauster(SNLA)	1
(2) Layered and Doped Materials for Plasma Facing Components, H. Conrads (KFA Jülich)	29
TOPICS PRESENTATION AND DISCUSSION	
TOPICS 1: How to bridge Present Large Machines' Experiences to the Design Activities of the Next Step Devices?	
(3) How to Gap the Experience Gained in Today's Large Fusion Devices to the Next Step Devices?, R. Behrisch (MPI)	91
(4) Results of JET and Implications for Next Step Devices, K. J. Dietz (JET)	103
(5) Experiences with Graphite Divertor Plate in JT-60 Lower X-Point Operation, T. Ando (JAERI)	129
(6) Comment from TFTR, M. Ulrickson (SNLA)	147
TOPICS 2: Problem Area of PFC Aspects	
(7) Overview: Heat Removal Limitations of Present PFC Design and Possibilities for Improvement, R. D. Watson & R. E. Nygren (SNLA)	159
(8) Comment on Heat Exhaust of PFC, M. Seki (JAERI)	177
(9) Gaseous Divertor Experiment by PISCES-A, L. Schmitz(UCLA) ..	187
(10) Comment, H. Nariai (Tsukuba Univ.)	197
TOPICS 3: Impact of Neutron Effects to PFM and PFC Feasibilities for ITER	
(11) Overview: Neutron Effects and Materials Selection for the Next Step Plasma Facing Components, T. Burchell (ORNL) ..	203

(12) Change of Thermal Properties of Graphite by Neutron Irradiations, T. Maruyama (PNC)	221	(27) Overview: Erosion of Plasma Facing Components, A. A. Haasz (Univ. of Toronto)	459
(13) 1. Key Properties for PFC Materials 2. How to Correlate the Change of Micro Structure with Material Properties?, T. Oku (Ibaraki Univ.)	237	(28) Evaluation of Bulk-boronized Graphites as Plasma-Facing Materials for ITER, Y. Hirooka (UCLA)	495
(14) How to Establish the Data Base without 14MeV INS?, T. Tanabe (Osaka Univ.)	249	(29) Erosion/Redeposition in the DIII-D Divertor, K. L. Wilson (SNLL)	523
TOPICS 4: Trapping and Detrapping of Implanted Hydrogen Isotopes		(30) Data from MPI Garching, R. Behrisch (MPI-Garching)	535
(15) Overview: Trapping and Detrapping of Implanted Hydrogen Isotopes, K. L. Wilson (SNLL)	161	TOPICS 7: Present Status of Material Data Base	
(16) Thermal Desorption Spectra of Hydrogen and Hydrocarbons from Graphite Implanted with Hydrogen, M. Yamawaki(Univ. Tokyo) ..	287	(31) Overview on Existing Datasets for Plasma Facing Materials, H. Bolt (Univ. Tokyo)	551
(17) Compensation Effects on the Diffusion Constants of Hydrogen in Materials, K. Watanabe & K. Ashida (Toyama Univ.)	303	(32) PSI Data obtained by Surface and Vacuum Science Laboratory, Hokkaido University, T. Hino (Hokkaido Univ.)	569
(18) Diffusion Constants of Hydrogen Isotopes in Graphite and Compensation Effect, K. Ashida & K. Watanabe (Toyama Univ.) ..	309	TOPICS 8: Possibilities of Medium- and High-Z Plasma Facing Materials for Future Large Machines	
(19) Ion-Induced and Thermal Release of Hydrogen Isotopes from Graphite, K. Morita (Nagoya Univ.)	333	(33) Overview: Possible Plasma Scenario Compatible with High Z Plasma Facing Material, K. Itoh (NIFS)	587
(20) Hydrogen Tapping and Re-Emission for Graphite, A. A. Haasz (Univ. of Toronto)	355	(34) Operation Experiences of Ultra Long Pulse TRIAM Mo-Limiter Discharge, N. Yoshida (Kyushu Univ.)	667
(21) Hydrogen Solubility in Neutron Irradiated Graphite, H. Atsumi (Kinki Univ.)	361	(35) Comment from JT-60(II) Material Aspect and Helium Recycling, H. Nakamura (JAERI)	705
(22) Hydrogen Behavior in Mo and W, T. Tanabe (Osaka Univ.)	367		
TOPICS 5: Erosion of Plasma Facing Materials under Off-Normal Operating Conditions			
(23) Overview: Simulation of Disruptions in Different HRF Test Facilities, J. Linke (KFA Jülich)	379		
(24) Evaluation Process of the Thermal Erosion during Disruptions for ITER, H. Bolt (Univ. Tokyo)	401		
(25) Erosion of Plasma Facing Materials under Off-Normal Conditions, J. G. van der Laan (NET)	421		
(26) Efforts towards Runaway Electron Damage Data Base Establishment, H. Bolt (Univ. Tokyo)	441		
TOPICS 6: Erosion of Plasma Facing Materials under Normal Operating Conditions
