Organizing and Editorial Committees	v
Foreword	vii
Welcoming Address Nobuaki KUMAGAI	1
Opening Remarks Katsuhiko FUJII	2
 Section 1 New Superconductors and Proposals for Their Applications	
Highest Temperature (120 K) Tl-Ba-Ca-Cu-O Superconducting System(Invited) A. M. Hermann and Z. Z. Sheng	5
Bi(Pb)-Sr-Ca-Cu-O High-T _c Superconductors(Invited) H. Maeda	11
Some Recent Studies on Oxide Superconductors in China(Invited) Q. S. Yang	17
Progress of Oxide Superconducting Film Formation and Application to Electronics Field(Invited) T. Kobayashi	24
Recent Advances in the Deposition of High Quality Oxide Superconducting Films by Pulsed Laser Deposition at Bellcore/Rytgers(Invited) T. Venkatesan, C. C. Chang, E. W. Chase, D. M. Hwang, L. Nazar, P. England, C. Rogers, J. M. Tarascon, P. Barboux, X. D. Wu, A. Inam, B. Dutta, M. S. Hegde, J. B. Wachtman, W. L. McLean and M. Croft	30
Status of High Field Magnets and Advanced High Field Superconductors(Invited) K. Noto, K. Watanabe and Y. Muto	36
Experimental Investigations for New Superconducting Mechanism(Invited) R. Aoki and T. Nakamura	44
Critical Current Characteristics in Superconducting Oxides with High Critical Temperatures(Invited) T. Matsushita	49
 Fabrications of Superconductors	
Preparation and Superconducting Properties of Rare-Earth-Free Superconductors H. Mukaida, Y. Matsuta, K. Shikichi, K. Kawaguchi, M. Nemoto and M. Nakao	57

Solution Growth of Oxide Superconductor Single Crystals T. Fujii and J. Shirafuji	62	Formation of Oxide Superconductor Thin Films with Excimer Laser M. Kanai, T. Kawai and S. Kawai	141
Processing Condition and Transport Properties of PbBiSrCaCuO Compound M. Murakami, A. Hayashi, M. Kimura, M. Saga and K. Doi	67	Preparation and Characterization of High T_c Superconducting BiSrCaCuO Films Y. Fukumoto, M. Tonouchi and T. Kobayashi	147
Superconductivity of $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ -Metal Composites N. Imanaka, F. Saito, H. Imai and G. Adachi	73	La-Ba-Cu-O Thin Films on ITO Coated Glass K. Fujino	153
Preparation of High- T_c Bi-Sr-Ca-Cu-O Superconductors T. Emoto, J. Yamamoto and Y. Murakami	78	Low-Temperature Growth of NdBaCuO Epitaxial Films M. Iyori, Y. Yoshizako, M. Tonouchi and T. Kobayashi	159
Y-Ba-Cu-O Superconductor Prepared from Freeze-Dried Powders T. Ito, H. Ohtera, T. Tachiwaki, A. Sasaki and A. Hiraki	83	Preparation of High Temperature Superconducting Films with Multi Ion Beam Sputtering Apparatus H. Kuwahara, N. Nakamura, E. Kamijo, K. Yoshimura and S. Tanemura	164
Preparation of Y-Ba-Cu-O Superconductor by Melt Processing S. Saji, S. Abe, T. Shibayanagi and S. Hori	89	Ln-Ba-Cu-O Thin Film Deposited by Ion Beam Sputtering T. Yotsuya, Y. Suzuki, S. Ogawa, H. Kuwahara, T. Tajima, K. Otani and J. Yamamoto	170
Fabrication of YBaCuO with High Transport J_c M. Murakami, M. Morita and K. Miyamoto	95	MgO Growth on (110) NdBaCuO Epitaxial Films Y. Yoshizako, M. Iyori, M. Tonouchi and T. Kobayashi	176
Fabrication of High T_c Superconducting Tape by Solid Reaction Method H. Mukai, N. Shibuta, T. Hikata, K. Sato, M. Nagata and H. Hitotsuyanagi	101	Properties of Superconductors	
Formation of the High- T_c Phase of Bi-Pb-Sr-Ca-Cu-O Superconductor U. Endo, S. Koyama and T. Kawai	107	Superconductivity Relating to Tl Localized State in Narrow-gap Semiconductor PbTe H. Murakami, Y. Mizomata and R. Aoki	181
Preparation and Characterization of High T_c Superconductive Tl and Bi Systems M. Tonouchi, Y. Fukumoto and T. Kobayashi	113	Neutron Irradiation Effects in Advanced Superconductors H. Yoshida, H. Kodaka, K. Miyata, Y. Hayashi and K. Atobe	183
Effect of High Pressure Oxygen Annealing on Superconductivity of $\text{La}_x\text{CuO}_{4-y}$ and $\text{La}_{2-x}\text{Ba}_x\text{CuO}_{4-y}$ R. Ogawa, T. Miyatake and K. Shibutani	117	Electronic Structures of Transition Metal Oxides by the Two-Band Hubbard Model. Valence-bond Full CI Study K. Yamaguchi, M. Nakano, H. Nnimoto and T. Fueno	189
Formations of Superconducting Films		Raman Spectra of Bi-Sr-Ca-Cu-O System M. Hangyo, S. Nakashima, M. Nishiuchi, A. Mitsuishi and T. Kawai	195
Fabrication of Screen-Printed High- T_c Superconducting Oxide Thick Films on YSZ Substrates T. Maeoka, H. Okada, Y. Nagamori, C. Hirosue, Y. Kondo, S. Yano, H. Inada, S. Okamoto and K. Hayashi	123	Basic Structures of High T_c Oxide Superconductors —from the View Point of Solid State Chemistry T. Kawai, S. Kawai, S. Tanaka, S. Takagi, T. Horiuchi and K. Ogura	201
Preparation of Y-Ba-Cu-O Films by rf Magnetron Sputtering M. Suzuki, T. Ozaki and Y. Shimada	129	Electrical Conductivity and Seebeck Coefficient of Y-Ba-Cu-O and Bi-Sr-Ca-Cu-O Systems at High Temperature H. Nagai, M. Yokota, K. Majima and K. Ohobayashi	208
Synthesis of High-temperature Superconducting Y-Ba-Cu-O Thin Film by ICB K. Yamanishi, Y. Kawagoe, S. Yasunaga, K. Imada and K. Sato	135	57Fe Mossbauer Study of High- T_c Y-Ba-Cu Oxide Superconductor S. Nasu, Y. Oda, T. Kohara, K. Ueda, T. Shinjo, K. Asayama and F. E. Fujita	214

Effect of Oxygen Deficiency and Metal Substitution on Raman Spectra of $\text{YBa}_2\text{Cu}_3\text{O}_{7-y}$	220	Structure Study on Bi-Sr-Ca-Cu-O Thin Film Prepared by Low Temperature Process	291
M. Hangyo, S. Nakashima, M. Nishiuchi and A. Mitsuishi		T. Matsushima, K. Hirochi, H. Adachi, K. Setsune and K. Wasa	
Effect of Non-stoichiometry in Metallic Composition and Heat Treatment Temperature on the Superconducting Properties of Sputtered Y-Ba-Cu-O Films	226	Structure and Superconducting Properties of Sputtered Gd-Ba-Cu-O Thin Films by Low Temperature Process	297
H. Kajikawa, T. Hase, M. Okuda, K. Nishimura and Y. Kawate		S. Hayashi, T. Kamada, K. Setsune, T. Hirao, K. Wasa and A. Matsuda	
Electrical Properties of Single-Crystal $\text{LnBa}_2\text{Cu}_3\text{O}_y$ ($\text{Ln}=\text{Eu}, \text{Dy}, \text{Ho}$) under a Pulsed Magnetic Field up to 50T	232	Superconducting Property Measuring System by Magnetization Method	303
M. Hikita, Y. Tajima, H. Fuke, K. Sugiyama, M. Date and A. Yamagishi		K. Ikisawa, T. Mori and N. Takasu	
Measurements of Critical Currents in Oxide Superconductor by Pulse Current Technique	238	Applications of Superconductors	
K. Shimohata, S. Yokoyama, M. Morita, T. Yamada and M. Wakata		Ohmic Contact to $\text{YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ Ceramics	309
Temperature Dependence of Critical Current Densities for Single-crystal BiSrCaCuO and Polycrystal BiPbSrCaCuO	243	T. Kusaka, Y. Suzuki, A. Aoki, T. Aoyama, T. Yotsuya and S. Ogawa	
M. Koizumi, D. Ito, Y. Yamada, S. Murase and S. Nomura		High T_c Superconducting Three-Terminal Device under Quasi-Particle Injection	315
Characterization of Microstructure in Ag-sheathed Tapes of $\text{Ba}_2\text{LnCu}_3\text{O}_{6+x}$ Oxides($\text{Ln}=\text{Y}, \text{Gd}$, and Ho)	249	K. Hashimoto, U. Kabasawa, M. Tonouchi and T. Kobayashi	
T. Takayama, K. Osamura, S. Ochiai and H. Tabata		Memory Characteristics of Ceramic Superconducting Ring	321
High Resolution Observation of High T_c Superconductor based on Bi-Ca-Sr-Cu-O System	255	M. Hasunuma, A. Takeoka, S. Sakaiya, T. Hirano, M. Takai, Y. Kishi and Y. Kuwano	
Y. Tsubokawa, H. Endoh, R. Shimizu, J. Ogiwara, K. Harada and Y. Taniguchi		Three-Dimensional Flux-sensor Composed of High- T_c Superconductor	327
High Resolution Electron Microscope Images of Oxide Superconductors Taken at 4.2K	261	H. Okushiba, S. Nishijima, K. Takahata, T. Okada and T. Hagihara	
H. Yoshida, Y. Yokota, H. Hashimoto, M. Iwatsuki and Y. Harada		Evaluation of Performance of Magnetic Shield with Oxide Superconductors	333
The Characterization of the Y-Ba-Cu-O System Compound Prepared by Solid State Reaction, Metal Alkoxide Solutions and Sol-Gel Method	267	S. Yoshida, M. Kaino, T. Nishihara and A. Ieiji	
M. Muroya, Y. Takemoto, T. Hatayama, K. Yamamoto, T. Yoshida and E. Tada		A New Proposal of Application of Liquid Nitrogen Cooled Superconducting Power Cables to Electric Power System	337
Characterization of High T_c Superconductors by Luminescence Method	273	H. Fukagawa, H. Suzuki, A. Ichinose and S. Akita	
Y. Fujiwara and T. Kobayashi		The Design of Superconducting Power Cable Using High T_c Superconductors	343
Observation of the High- T_c Phase and Determination of Pb Position in Bi-Pb-Sr-Ca-Cu Oxide Superconductor	279	N. Ichiyanagi, F. Enokubo and Y. Furuto	
H. Nobumasa, T. Arima, K. Shimizu, Y. Otsuka, Y. Murata and T. Kawai		High- T_c Superconductor Anodes for Relativistic Electron Beam Diodes	348
The Stress-Strain Relationship for Multilayers of the High T_c Superconducting Oxides	285	H. Matsuzawa, Y. Ishibashi, K. Irikura, K. Okamoto, T. Osada, A. Mochizuki, H. Wada and T. Akitsu	
H. Hidaka and H. Yamamura		Section 2 Superconducting Magnets and the Materials	
		Progress in the Understanding and Manipulation of Microstructure in High J_c Nb-Ti Alloy Composites (Invited)	357
		P. J. Lee, J. C. McKinnell and D. C. Larbalestier	

Recent Activities at MIT in the Applications of Acoustic Emission Technology for Superconducting Magnets(Invited) Y. Iwasa	363
Evaluation of Materials for Superconducting Magnets for Fusion and Other Applications(Invited) T. Okada	371
Study of Superconducting Magnet Materials for Applications in Radiation Environments(Invited) H. W. Weber	378
Technical Feature of Possible High T_c Superconducting Magnet(Invited) O. Tsukamoto	388
The Characteristics of Helium as a Coolant for Superconducting Magnets(Invited) T. H. K. Frederking and J. Yamamoto	394
Superconductors	
Parameters Relevant to Strain Dependence of Critical Current in Practical Nb ₃ Sn Superconducting Wires K. Katagiri, K. Saito, M. Ohgami, T. Okada, A. Nagata, K. Noto and K. Watanabe	401
Development of AC Applications of Superconducting Wires K. Matsumoto, Y. Tanaka and K. Oishi	407
Composite Materials	
Effect of Epoxy Cracks on Stability of Impregnated Windings T. Yamashita, S. Nishijima, K. Takahata and T. Okada	413
Deformation Behavior of Three Dimensional Glass Fabric Reinforced Plastic at Low Temperature Y. A. Wang, S. Nishijima, T. Okada, T. Uemura, T. Hirokawa and J. Yasuda	419
Thermal Fracture of Glassfiber Reinforced Plastics at Low Temperatures S. Ueda and Y. Shindo	425
Evaluation of Irradiation Effect of FRP by AE Method T. Nishiura, K. Katagiri, S. Nishijima and T. Okada	431
Development of Three Dimensional Fabric Reinforced Plastics for Cryogenic Application H. Okuyama, S. Nishijima, T. Okada, T. Hirokawa, J. Yasuda and T. Uemura	437
Data Base of Organic Composite Materials for Cryogenic Application S. Nishijima and T. Okada	443

Cryogenic and Radiation Resistant Properties of Three Dimensional Fabric Reinforced Composite Materials J. Yasuda, T. Hirokawa, T. Uemura, Y. Iwasaki, S. Nishijima, T. Okada, H. Okuyama and Y. A. Wang	449
Self-compression of the Multilayer Insulation around the Horizontal Cylindrical Shield T. Ohmori and R. C. Niemann	455
Structural Materials	
Low-Temperature Properties of High Purity Copper K. Ohta, N. Yamamoto, K. Motoba and H. Okamoto	461
GFRP-Stainless Steel Hybrid Cryostat T. Mori, K. Ikizawa, N. Takasu, J. Ogata, Y. Yoshinaga, N. Yamada and H. Ohta	467
Cryogenic Mechanical Properties of A5083-SUS304L Explosively Bonded Joint Y. Mukai and A. Nishimura	473
Mechanical Properties of a Low Density Al-Li Base Alloy at Cryogenic Temperature S. Saji, K. Yamamura, N. Furushiro and S. Hori	479
Adiabatic Deformation of Austenitic Stainless Steel Sheet Near Absolute Zero K. Shibata, E. Naito, H. Sakamoto and K. Fujita	485
Effects of Nb ₃ Sn Heat Treatment on Cryogenic Mechanical Properties of Austenitic Steels M. Shimada	491
Cryogenic Strength of Laser-Welded 22 Mn Steel M. Nakano, T. Kataoka, K. Kishida and A. Matsunawa	497
Magnetic Field Effect on Elasto-Plastic Fracture Toughness at 4K H. Yanagi, A. Nyilas and W. Specking	503
Superconducting Magnet Technology	
SHETEM Project - Supercritical Helium Force Cooled Superconducting Test Magnet J. Yamamoto and Y. Murakami	509
Voltage Distribution within Superconducting Coils during Quench T. Tominaka, N. Hara and K. Kuroda	515
Detection of Local Normal Zone in Superconducting Magnet Using Ultrasonic Wave A. Ninomiya, K. Sakaniwa, N. Kitazawa, T. Ishigohka, H. Toyoda and Y. Higo	521
Protection of Superconducting Magnets Using ZnO Arrestor T. Ishigohka	527

Section 3 Energy Applications

Energy Storage Study in Osaka University(Invited) Y. Murakami	535
SMES Developments at the University of Wisconsin (Invited) R. W. Boom, M. K. Abdelsalam, Y. Eyssa, M. Hilal, X. Huang, G. E. McIntosh and J. Pfotenhauer	541
Recent Topics of SMES Research(Invited) M. Masuda	547
Superconducting Synchronous Generator and the Power System Characteristics(Invited) T. Nitta and T. Okada	561
AC Superconductivity Application to the Electrical Machines(Invited) M. Yamamoto	567
Superconducting Magnet Systems for Fusion Reactors (Invited) A. Ulbricht	573
Status of Large Helical Project(Invited) O. Motojima	580
Development of Large Superconducting Magnets for Fusion Application at JAERI(Invited) K. Okuno and S. Shimamoto	586
Superconducting Magnet Energy Storage (SMES)	
Design Study of Large Scale SMES T. Shintomi	592
Conceptual Design Studies of 5GWh Superconducting Magnetic Energy Storage System T. Maekawa, H. Kuwahara, T. Fukatsu, K. Kase, M. Iwamoto, T. Yamada and O. Ogino	598
Design Study of 5GWh SMES T. Nakano, K. Hayakawa and M. Shimizu	604
The Effect of SMES for the System Stability and the Load Frequency Control in the Power System K. Maekawa, N. Hashimoto, J. Hasegawa, H. Miyauchi, K. Tsuji, Y. Ohsawa, N. Suzuki and Y. Ishigaki	610
Power System Stabilization by Using Superconducting Magnetic Energy Storage Y. Mitani, Y. Kowada, K. Tsuji and Y. Murakami	616
Power Conditioning System for Superconducting Magnetic Energy Storage T. Ise, Y. Murakami and K. Tsuji	622

Studies on Superconducting Magnetic Energy Storage for Photovoltaic Power Generation
Y. Ohsawa, K. Kato and T. Homma

628

Superconducting Generators

Conceptual Design of 200,000 kW Class Pilot Superconducting Generator Carried out by Super-GM (Part 1; Low Response Excitation Machine)
S. Kurihara, O. Tsukamoto, K. Uyeda, S. Hirose and M. Tanaka

634

Conceptual Design of 200,000 kW Class Pilot Superconducting Generator Carried out by Super-GM (Part 2; Quick Response Excitation Machine)
S. Kurihara, O. Tsukamoto, T. Tanaka, T. Kitajima and M. Sunada

640

Experiment of Brushless Fully Superconducting Generator with Magnetic Flux Pump
I. Muta, H. Tsukizi, T. Sasano, Y. Tsutsui and T. Furukawa

645

On the Excitation Control of Superconducting Synchronous Generator Connected to Electric Power Grid
S. Imai and K. Matsuura

651

Development Considerations on Multifilamentary Superconductors for Superconducting Generator
S. Kurihara, Y. Kimura, S. Meguro, K. Uyeda, T. Saitoh, K. Takahashi and H. Kubokawa

657

Ac Applications

Conceptual Design of 275 kV 300 MVA Superconducting Shell Type Transformer
S. Hayashi, Y. Saikawa, T. Kishida, T. Yamada, A. Ohara, M. Morita, K. Shiono, T. Kohan and H. Nakazawa

663

Nb₃Sn Superconducting Power Transmission Cable
N. Higuchi, N. Natori, K. Arai and T. Hoshino

668

Development and Tests of Extruded Polyethylene Insulated Superconducting Cable
M. Kosaki, M. Nagao, Y. Mizuno, K. Horii and N. Shimizu

674

New Applications

New Power Generation Systems by Superconducting Electro-magnetic Pumping-up Device
E. Tada, T. Uemura and K. Imaichi

680

Japanese Experimental Ship with the Superconducting Electro-magnetic Thruster
Y. Sasakawa, K. Imaichi, E. Tada and S. Takezawa

686

Effect of Strong Magnetic Fields on Relative Oxygen /Chlorine Evolution Efficiencies in Magnetoelectrolysis of Sodium Chloride Solutions M. Hiroi, M. Muroya, E. Tada and Y. Takemoto	692
The Development of Electrodes for Use in the Superconducting Electromagnetic Propulsion Ship and its Evaluation M. Muroya, M. Hiroi, S. Ogawa, E. Tada and Y. Takemoto	697
Development of Superconducting Networks for a Large-Scale Magnetic Shield K. Takahata, S. Nishijima and T. Okada	703
Magnetic Shielding by a Tubular Superconducting Winding in Parallel and Transverse Field M. Ohgami, K. Takahata, S. Nishijima and T. Okada	709
Magnetic Field Screening with Superconducting NbTi-Cu Multilayer Films S. Ogawa, M. Yoshitake, K. Nishigaki, T. Sugioka, M. Inoue and Y. Saji	715

Section 4 Applications for Accelerators and Measurements, Superconducting Electronics

Superconducting Accelerator Magnets(Invited) H. Hirabayashi	723
Superconducting Magnet Systems for MRI(Invited) D. G. Hawksworth	731
Determination of Structures of Proteins in Solution by Using a Superconducting Magnet NMR Instrument(Invited) Y. Kyogoku	745
Biomagnetism: Magnetic Fields Produced by Human Body (Invited) Y. Ucikawa and M. Kotani	750
Josephson Digital Circuits(Invited) S. Hasuo	756
A 4.7 T Magnet for Magnetic Resonance Imaging H. Maeda, M. Urata, T. Wada, T. Yazawa and A. Sato	762
Quasiparticle 90 GHz Mixer with Nb/A ₁₀ x/Nb Array Junctions T. Noguchi, T. Takami and K. Hamanaka	768
Superconducting Mixers in the Submillimeter Region K. Sakai, T. Fukushima, Y. Ichioka, J. Inatani and S. Kodaira	774
Multi-channel SQUID System and Application to Biomagnetism H. Furukawa, T. Katayama, S. Fujita and K. Shirae	779

Flux-Flow Noise in Type-II Superconductor Thin Films O. Okamura, J. Shirafuji and N. Sano	785
Section Technical Data of Composite Materials	
High-Strength and High-Modulus Polyethylene Fiber M. Nakai, H. Yasuda and I. Yoshida	793
Innovative Polyimide Film "UPILEX" K. Yano	798
List of Participants and Author Index	805
