## Radiation Monitoring for Protection of the Public after Major Releases of Radionuclides to the Environment

Pr	reface	e	1
1.	Int	roduction	2
	1.1	Background	2
	1.2	Objective of the Report	3
	1.3	Scope	3
	1.4	Structure and Content	3
2.	Maj	jor Releases of Radionuclides to the Environment	4
	2.1	Source Terms of Power Reactors.	4
		2.1.1 Material in Radioactive Releases	4
		2.1.2 Physical and Chemical Forms	5
		2.1.3 Severe Accident	7
		2.1.4 Radionuclides	9
	<b>2.2</b>	Source Terms of Fuel Cycle Facilities	13
	2.3	Environmental Processes and Radiological Assessments	14
		2.3.1 Pathways of Public Exposure	14
		2.3.2 Representative Person	15
		2.3.3 Radiological Environmental Impact Assessments	15
		2.3.4 Consideration of Exposure Pathways	16
		2.3.5 Atmospheric Transport and Ground Deposition	16
		2.3.6 Terrestrial Environments.	18
		2.3.7 Aquatic Environments	19
		2.3.8 Urban Environments	20
		2.3.9 Commodities and Consumer Products	<b>2</b> 1
		2.3.10 Uninhabited Environments	21
	2.4	Protection of the Public.	21
		2.4.1 Health Effects	21
		2.4.2 Natural Background	23
		2.4.3 Exposure Situations and Radiation Protection	23
		2.4.4 Phases of Emergency Preparedness and Response	24
		2.4.5 Emergency Zones and Distances	25
		2.4.6 Operational Intervention Levels	28
	25	Monitoring Data for Radiological Assassments	20
	2.0	2.5.1 Data for Assessment of External Exposure	20
		2.5.2 Data for Assessment of Internal Exposure	30
		2.5.3 Multiple Data Sources	30
		2.5.4 Uncortainties in Assessments	31
			91

RADIATION MONITORING FOR PROTECTION OF THE PUBLIC AFTER MAJOR RELEASES

	2.6 2.7	<ul> <li>6 Relative Importance of Radionuclides and Pathways of Exposure</li> <li>7 Overview of Major Releases</li> </ul>				
3.	Mor	Ionitoring Programs				
	3.1	verview of Monitoring Programs	38			
	0.1	<b>3.1.1</b> Government Monitoring Programs	<b>£0</b>			
		8.1.2 Operator Monitoring Programs	<b>40</b>			
		3.1.3 Monitoring Conducted by Interested Parties	<b>£1</b>			
		8.1.4 Monitoring Programs for Specific Types of Releases	<b>£1</b>			
	3.2	Ionitoring Programs in Planned Exposure Situations	<b>41</b>			
		3.2.1 Government Monitoring Programs	<b>12</b>			
		<b>3.2.2</b> Operator Monitoring Programs	43			
		3.2.3 Pre-operational Monitoring Programs 4	43			
		3.2.4 Monitoring During Normal Operations	<b>46</b>			
	3.3	Ionitoring Programs in Emergency Exposure Situations	<b>46</b>			
		3.3.1 Early Emergency Phase	<b>18</b>			
		3.3.2 Intermediate Emergency Phase	53			
	3.4	Ionitoring Programs in Existing Exposure Situations	54			
	3.5	Ionitoring Programs for Specific Pathways of Exposure and Environments	56			
		3.5.1 External Radiation Fields in the Environment.	58			
		3.5.2 Airborne Radioactive Material	31			
		<b>3.5.3</b> Precipitation	34			
		<b>3.5.4</b> Deposition Density and Activity Concentration in Soil	36			
		B.5.5 Foodstuffs	<b>39</b>			
		8.5.6 Drinking Water	71			
		8.5.7 Aquatic Environments	73			
		8.5.8 Terrestrial Environments	74			
		8.5.9 Urban Environments	75			
		8.5.10 Commodities and Consumer Products	77			
		3.5.11 Elements of Transport Infrastructure	78			
	3.6 Individual Monitoring Programs.		78			
		3.6.1 Objectives of Individual Monitoring	79			
		3.6.2 Individual Monitoring of Occupational and Public Exposures	79			
		3.6.3 Individual Monitoring within the Overall Monitoring Response	30			
		3.6.4 Rapid Interpretation of Monitoring Data	31			
		3.6.5 Individual Monitoring Programs 8	32			
	3.7	Data Management	<b>34</b>			
		3.7.1 Metadata	35			
		3.7.2 Data Quality, Storage and Archiving 8	85			
		8.7.3 Transparency 8	85			
4.	Мо	toring Systems and Methods	87			
	4.1	ntroduction	87			
	4.2	Radiation Detection Systems	88			
	4.3	Characterization of External Radiation Fields	91			
	-10	4.3.1 Installed and Survey Systems with Gamma Detectors	91			
		4.3.2 In-situ Gamma Spectrometry	93			
		4.3.3 Passive Environmental Dosimeters	94			
		4.3.4 Equipment and Data of Interested Parties	95			
	4.4	Characterization of Airborne Radioactivity.	96			
4.4.1 Sampling		4.4.1 Sampling	96			
		4.4.2 Size Distribution of Aerosol Particles	97			
		4.4.3 Technical Standards for Air Monitoring	99
