

(EX1/3) Overview of RI-Mode Results on TEXTOR-94	273
(EX1/4) H-Mode Regimes and Observations of Central Toroidal Rotation in ALCATOR C-Mod	281
(EX1/D) Discussions of Session EX1	289
Session EX2 – Helical Experiments (Wednesday, 21 October)	295
(EX2/1) Investigation of Equilibrium, Global Modes and Microinstabilities in the Stellarator W7-AS	295
(EX2/4) First plasmas in the TJ-II Flexible Heliac	303
(EX2/D) Discussions of Session EX2	311
Session EX3 – Divertors 1 (Wednesday, 21 October)	317
(EX3/2) Energy and Particle Control Characteristics of the ASDEX Upgrade ‘Lyra’ Divertor	317
(EX3/3) Detached Divertor Plasmas in ALCATOR C-Mod: A Study of the Role of Atomic Physics	325
(EX3/5) Confinement Degradation of ELMy H-Modes at High Density and/or Radiated Power Fraction	335
(EX3/6) Operational Limits of High Density H-Modes in ASDEX Upgrade	343
(EX3/7) Characteristics of Various Confinement Regimes Obtained with EC and LH Heating on the TdeV Tokamak	351
(EX3/D) Discussions of Session EX3	359
Session EX4 – Innovative Concepts, Reversed Field & Mirror Experiments (Thursday, 22 October)	367
(EX4/3) Recent Progress in RFP Research on the RFX Experiment	367
(EX4/4) Reversed Field Pinch Experiment on a New Large Machine, TPE-RX	375
(EX4/5) Confinement in the RFP: Lundquist Number Scaling, Plasma Flow, and Reduced Transport	383
(EX4/6) Plasma Confinement in the GAMMA 10 Tandem Mirror	391
(EX4/D) Discussions of Session EX4	399
Session EX5 – Transport, Internal Transport Barriers, H-Mode (Thursday, 22 October)	405
(EX5/4) Reduced Transport and E_R Shearing in Improved Confinement Regimes in JT-60U	405
(EX5/5) Behavior of Electron and Ion Transport in Discharges with an Internal Transport Barrier in the DIII-D Tokamak	413
(EX5/6) A Comparative Study of Core and Edge Transport Barrier Dynamics of DIII-D and TFTR Tokamak Plasmas	421
(EX5/D) Discussions of Session EX5	429

Volume 2

Session EX6 – Transport & Divertors 2 (Thursday, 22 October)	435
(EX6/1) Transport in JET High Performance Plasmas	435
(EX6/2) Scaling of H-Mode Pedestal Characteristics in DIII-D and C-Mod	443
(EX6/4) Recent Results from Divertor and SOL Studies at JET	451
(EX6/6) Radiative Divertor and SOL Experiments in Open and Baffled Divertors on DIII-D	459
(EX6/D) Discussions of Session EX6	467
Session EX7 – Transport (Friday, 23 October)	473
(EX7/1) H-Mode Power Threshold and Confinement in JET H, D, D-T and T Plasmas	473
(EX7/5) Experimental Investigation of ITG-like Turbulence Characteristics in T-10 Tokamak Core Plasma with Toroidal and Poloidal Correlation Reflectometry	481
(EX7/D) Discussions of Session EX7	489
Session EX8 – Transport (Friday, 23 October)	497
(EX8/1) Effects of Plasma Shape and Profiles on Edge Stability in DIII-D	497
(EX8/2) MHD Phenomena at ASDEX Upgrade	505
(EX8/3) Energy Confinement and MHD Activity in Shaped TCV Plasmas with Localised Electron Cyclotron Heating	513
(EX8/4) Localized MHD Activity Near Transport Barriers in JT-60U and TFTR	521
(EX8/5) Error Field Mode Studies on JET, COMPASS-D and DIII-D, and Impli- cations for ITER	529
(EX8/6) Alfvén eigenmodes and their Impact on Plasma Characteristics in JT-60U	537
(EX8/D) Discussions of Session EX8	545
Session CD1 – Plasma Heating and Current Drive 1 (Friday, 23 October)	551
(CD1/1) Heating and Non-inductive Current Drive by Negative-ion based NBI in JT-60U	551
(CD1/2) Reactor Relevant ICRF Heating in JET D-T Plasmas	559
(CD1/4) LHCD Current Profile Control Experiments towards Steady State Im- proved Confinement on JT-60U	567
(CD1/5) Plasma Heating and Sustainment in the Ion Cyclotron Range of Frequen- cies on the Stellarator W7-AS	575
(CD1/D) Discussions of Session CD1	581
Session CD2/EX9 – Long Pulse Operation & Current Drive 2 (Friday, 23 October)	587
(CD2/EX9/1) Plasma Control Issues for an Advanced Steady State Tokamak Re- actor	587

(CD2/EX9/2) Long Sustainment of JT-60U Plasmas with High Integrated Performance	595
(CD2/EX9/3) Progress Towards Sustainment of Advanced Tokamak Modes in DIII-D	603
(CD2/EX9/5) Current Profile Modification with Electron Cyclotron Current Drive in the DIII-D Tokamak	611
(CD2/EX9/D) Discussions of Session CD2/EX9	619
Session CDP – Plasma Heating and Current Drive (Tuesday, 20 October)	625
(CDP/02) High Power RF Systems for Long Pulse Operation on TORE SUPRA and Planned Upgrades	625
(CDP/03) Core and Edge Electron Dynamics during Lower Hybrid Current Drive Experiments	629
(CDP/04) High Density Lower Hybrid Current Drive and Ion Bernstein Waves Heating Experiments on FTU	635
(CDP/05) ECRH and ECCD Experiments in an Extended Power Range at the W7-AS Stellarator	639
(CDP/06) Sawtooth control by on-axis electron cyclotron current drive on the WT-3 tokamak	643
(CDP/07) Electron Cyclotron Heating at 140 GHz on FTU Tokamak in Steady-State Conditions and During Current Ramp-Up	647
(CDP/08) Progress in EC Heating and Current Drive Physics and Technology at RTP	651
(CDP/09) ICRF Heating and Profile Control Techniques in TFTR	655
(CDP/11) Comparing High Power Ion Cyclotron Resonance Frequency Heating with Neutral Injection in ASDEX Upgrade: Differences, Similarities and Synergies	659
(CDP/12) High Frequency Fast Wave Results from the CDX-U Spherical Torus	663
(CDP/13) Mode-Converted Electron Bernstein Waves for Heating and Current Drive in NSTX	667
(CDP/14) Modelling of Advanced Tokamak Physics Scenarios in ALCATOR C-Mod	671
(CDP/15) Quasi-steady State High Confinement at High Density by LH Waves in the HT-6M Tokamak	675
(CDP/16) Structure and Parameters Dependences of Alfvén Wave Current Drive Generated in the Low-Field Side of Simulated Spherical Tokamaks	679
Session EXP1 – Particle Transport, Internal Transport Barriers, Helical Systems (Tuesday, 20 October)	687
(EXP1/01) Impurity Transport Studies on the FTU Tokamak	687
(EXP1/02) H α Line Shape in Front of the Limiter in HT-6M Tokamak / Current Relaxation and its Roles in Improved Confinement	691
(EXP1/03) Pellet injection experiments on Tokamaks in ASIPP, China	697

(EXP1/04) High Time-Resolved Measurements of Radiation Emitted by Impurities Injected on the MT-1M Tokamak	701
(EXP1/05) High Performance with Modified Shear in JET D-D and D-T Plasmas	705
(EXP1/06) Towards Steady-State Tokamak Operation with Double Transport Barriers	709
(EXP1/07) Trace Tritium Transport in JET	713
(EXP1/08) DT Fusion Power Production in ELM-Free H-Modes in JET	717
(EXP1/09) Internal Transport Barrier and β Limit in Ohmically Heated Plasma in TUMAN-3M	721
(EXP1/10) Recent Results of ECRH Experiments on L-2M Stellarator	725
(EXP1/11) Confinement, Fluctuations, and Electric Fields in the H-1 HELIAC .	729
(EXP1/12) Advanced Tokamak Operation on ASDEX Upgrade	733
(EXP1/13) Poloidal Rotation and Radial Electric Fields in TFTR	737
(EXP1/14) Unifying Role of Radial Electric Field Shear in the Confinement Trends of Transitionless Regimes in TFTR	741
(EXP1/15) Observation of Neoclassical Transport in Reverse Shear Plasmas on the Tokamak Fusion Test Reactor	745
(EXP1/17) Particle Confinement and Transport in JT-60U	749
(EXP1/19) Global MHD Modes Excited by Energetic Ions in Helitron/Torsatron Plasmas	753
(EXP1/20) On the Interplay between Turbulence and Poloidal Flows in Plasmas	757
Session EXP2 – Confinement & Transport (Wednesday, 21 October)	761
(EXP2/01) Energy Transport Analysis of High Temperature and High Density FTU Plasma Discharges	761
(EXP2/02) Experimental Tests of Confinement Scale Invariance on JET, DIII-D, ASDEX Upgrade and CMOD	765
(EXP2/03) Dimensionally Similar Studies of Confinement and H-mode Transition in ASDEX Upgrade and JET	769
(EXP2/04) Improved Confinement, High- β Regimes and Edge Behaviour on the COMPASS-D Tokamak with High Power ECRH and LHCD	773
(EXP2/06) H-mode and Confinement Studies in ASDEX Upgrade	777
(EXP2/07) Density Limit Investigations near and Significantly above the Greenwald Limit on the Tokamaks TEXTOR-94 and RTP	781
(EXP2/08) Experimental Tests of Transport Models Using Modulated ECH . . .	785
(EXP2/09) Comprehensive Energy Transport Scalings Derived from DIII-D Similarity Experiments	789
(EXP2/10) Investigation of Density Limit Processes in DIII-D	793
(EXP2/11) Comparison of L-H Transition Measurements with Physics Models .	797
(EXP2/12) Highly Radiative Plasmas for Local Transport Studies and Power and Particle Handling in Reactor Regimes	801

(EXP2/13) Investigation of Dimensionless Scaling Laws and Non Local Transport in TORE SUPRA	805
(EXP2/14) Potential Turbulence in Tokamak Plasmas	809
(EXP2/15) Comparative Studies of a Spherical Tokamak and a Conventional Tokamak: Magnetic Turbulence-Induced Transport	813
(EXP2/17) Confinement Studies during LHCD and LHW Ion Heating on HL-1M	817

Volume 3

Session EXP3 – MHD Stability & Alternate Confinement Systems (Friday, 23 October) 821

(EXP3/01) MHD Studies in FTU Plasmas with Low and Negative Magnetic Shear	821
(EXP3/03) Observation of Neo-Classical Tearing Modes in JET	825
(EXP3/04) Some Features of the Disruption Instability in Reversed Shear TFTR Plasmas	829
(EXP3/05) Studies of the Disruption Prevention by ECRH at Plasma Current Rise Stage in Limiter Discharges / Possibility of an Internal Transport Barrier Producing under Dominating Electron Transport in the T-10 Tokamak . . .	833
(EXP3/06) Forecast of TEXT Plasma Disruptions Using Soft X-Rays as Input Signal in a Neural Network	843
(EXP3/07) The Production and Confinement of Runaway Electrons with Impurity “Killer” Pellets in DIII-D	847
(EXP3/09) Suppression of Magnetic Islands Through Synchronous and Asynchronous Application of Resonant Magnetic Fields	851
(EXP3/10) Observation and Control of Resistive Wall Modes	855
(EXP3/11) Characteristics of Halo Current in JT-60U	859
(EXP3/13) Studies on Magnetic Dynamics in RFX	863
(EXP3/14) Plasma-Wall Interactions in RFX	867
(EXP3/15) Particle and Energy Transport in the RFX Experiment	871
(EXP3/17) Experiments on High- β Plasma Confinement in Gas Dynamic Trap .	875
(EXP3/18) Theoretical and Experimental Study for Possibility of Nuclear Burn Wave Initiation in Z-Pinch due to M=0 Instability Development	879
(EXP3/19) Locked Modes and Plasma-Wall Interaction in a Reversed-Field Pinch with a Resistive Shell and Carbon First Wall	883
(EXP3/20) Collisional Transport in Nonneutral Plasmas	887

Session EXP4 – Divertors & Alternate Confinement Systems (Saturday, 24 October) 891

(EXP4/02) Flux Dependence and Isotope Effect of the Chemical Erosion of Carbon under Tokamak Conditions	891
(EXP4/03) Impurity Control Studies Using SOL Flow in DIII-D	895
(EXP4/04) Heat Flux Exhaust in TORE SUPRA in Ergodic Divertor and Limiter Configurations	899
