## **Table of Contents**

1.1	Preface
1.2	Evolution of the ITER Design
1.3	Guidelines and Objectives
1.4	Modeling of Design Alternatives
1.5	Convergence to an Outline Design
1.6	Conclusion
2 Desi	gn Overview
2.1	Design
2.2	Operation Scenarios and Phases
3 Plas	ma Performance
3.1	ITER Plasma Current and Size
3.2	Plasma Confinement Extrapolation
3.3	H-mode Pedestal and ELMs
3.4	Internal Confinement Barrier
3.5	Non-axisymmetric Perturbations, Islands, and $\beta$ limit
3.6	Divertor and Power Exhaust
3.7	Plasma performance
4 Fun	ctional Role of Systems
4.1 4.1.1 4.1.2 4.1.3 4.1.4 4.1.5 4.2 4.2.1 4.2.2 4.2.3 4.2.4 4.2.5 4.2.6 4.2.7 4.2.8 4.3 4.3	Magnets   Toroidal Field Coils   Poloidal Field Coils   Error Field Correction Coils   Superconducting Coil Protection   Superconducting Coil Cryogenic Cooling   Vessel and In-vessel Systems   Neutron Shielding   Blanket Modules   Blanket maintenance   Divertor   In-vessel Component Water Cooling   Cryogenic Pumps   Vacuum Vessel   Vacuum Vessel Pressure Suppression System
4.3.1 4.3.2	Seismic Loads Electromagnetic loads
4.4	Fuel Cycle
4.5	Tokamak Building
4.6	ITER Plant Operation and Control

5	R&I	D Overview	48
	5.1	Introduction	48
	5.2	CS Model Coil and TF Model Coil	49
	5.3	Vacuum Vessel Sector	51
	5.4	Blanket Module	51
	5.5	Divertor Cassette	51
	5.6	Blanket and Divertor Remote Handling Systems	52
	5.7	Other R&D	54
6	Safe	ty and Environmental Assessment	56
	6.1	Objectives and Approach	56
	6.2	Environmental Impact	56
	6.3	Waste and Decommissioning	57
	6.4	Worker Safety	57
	6.5	Safety Analysis	58
	6.6	No evacuation objective Error! Bookmark not de:	fined.
	6.7	Safety assessment conclusions	61
7	Qua	lity Assurance Program	62
8	Con	struction, Commissioning and Decommissioning Plans	63
	8.1	Introduction	63
	8.2	Overall and Summary Schedule	63
	8.3	Construction and Procurements	64
	8.3.1	Procurement Assumptions	64
	8.3.3	Procurement of Long Lead-Time Items	65
	8.4	Tokamak Assembly	66
	8.5	Commissioning Plan	66
	8.5.1 8.5.2	Individual Sub-System Test Integrated Commissioning up to the First Plasma Discharge	66 67
	8.5.3	Commissioning after First Plasma	67
	8.6	Decommissioning Plan	67
9	Cost	Estimates	69
	9.1	Resources Required for ITER Construction	69
	9.1.2	Basic Data — Procurement Packages for Cost Estimation	69 69
	9.1.3	Evaluation of Cost Estimates	70
	9.2	Cash flow for the direct capital cost	- 71
	9.3	Construction Management and Engineering Support	14 74
	9.3.1	Assumptions	74
	9.3.2	Estimated Personnel Cost During Construction	74
	9.3.3 <b>0</b> <i>1</i>	Resources for ITER Operation	75
	9.4.1	Project Manpower Costs	76 76
