FOREWORD	v
PREFACE	ix
1 INTRODUCTORY SURVEY	1
Introduction... .. .	1
Modes of Growth	3
Theories of Crystal Growth	3
Concept of Minimum Total Surface Free Energy	6
2 ATOMIC THEORY OF CRYSTAL GROWTH: GROWTH OF A	
PERFECT CRYSTAL	9
Close-packed Planes	9
Equilibrium Structure of a Crystal Surface	9
Concentration of Kinks in a step	12
Surface migration of adsorbed Molecules... .. .	13
Rate of advance of a straight step	14
Surface Nucleation	16
Summary	20
3 DISLOCATIONS AND THE GROWTH OF AN IMPERFECT CRYSTAL	22
Dislocations	22
Edge Dislocations	23
Screw Dislocations	25
Role of Screw Dislocations in Crystal Growth: Growth	
Spirals	28
4 MODERN OPTICAL TECHNIQUES	31
Difficulties of Observation	31
Experimental Techniques	32
The Silvering Technique	32
Dielectric Multilayer Films	35
Techniques of Observation... .. .	37
Description of Phase-contrast apparatus	43
Visibility	45
Photographic Processing	47
5 EXPERIMENTAL OBSERVATIONS	48
Growth Pyramids and Vicinal Faces	48
Growth by layers	49
Diffusion Experiments	50
Recent Observations of Growth Spirals	52

CONTENTS

	PAGE
6 DETAILED STUDY OF GROWTH PATTERNS: MICROSCOPIC	
OBSERVATIONS	59
Introduction and Classification of Spirals	59
Elementary Spirals	60
Spirals Originating from Dislocations of Multiple Strength	86
Interlaced Spirals	96
7 X-RAY STRUCTURE OF CRYSTALS AND THE RELATION TO	
THE GROWTH PATTERNS: SOME TYPICAL EXAMPLES ...	100
Formation of Silicon Carbide Crystals	100
Different types of Silicon Carbide Crystals and Polytypism	101
Explanation of Growth Patterns	108
Growth Patterns on Cadmium Iodide	112
Crystal Structure and Growth Patterns of Long-chain	
organic Molecules	113
8 MEASUREMENT OF STEP HEIGHT: INTERFEROMETRIC	
TECHNIQUES AND RESULTS	116
General	116
The Optimum Conditions for multiple-beam inter-	
ferometry	117
Use of Fizeau fringes	122
Use of Fringes of equal Chromatic Order	130
Internal Interference Fringes	132
Visibility of Step lines and Use of Multilayer Films ...	135
Thin Film Technique	137
Light Profile Microscopy	138
Results of Measurements of Step Heights	140
Elementary Growth Spirals with Unit Burgers Vector ...	140
Growth Spirals Originating from Dislocations of	
Multiple Strength	144
Interlaced Spirals	146
9 POLYTYPISM, ORIGIN AND MOVEMENT OF DISLOCATIONS,	
AND SOME RELATED TOPICS	147
Explanation of Polytypism in Terms of Dislocations ...	147
Origin of Dislocations	148
Movement of Dislocations	150
Oriented Overgrowths	158
Etch Phenomena	163
Holes in Crystals and Hollow Dislocations	166
Conclusion: Present Position of Experimental Obser-	
vations	170
REFERENCES	173
SUBJECT INDEX	179
