

CONTENTS

Development of High-Temperature Studies on Rare-Earth Oxides	1
N. A. Toropov	
I. CRYSTAL LATTICE ENERGETICS AND GENERAL PROPERTY CHARACTERISTICS OF OXIDE SYSTEMS	
Energetics of Monomeric and Polymeric (Ring and Chain) Metasilicate and Fluoberyllate Radicals	7
R. G. Grebenshchikov	
Method for Computing the Electrostatic Energy of the Complex and Defect Lattices of Ionic Compounds.	12
A. G. Boganov, I. I. Cheremisin, and V. S. Rudenko	
Several Laws in the Formation of Oxides of Transition Metals of Subgroups IVa and Va V. A. Tskhai, P. V. Gel'd, G. P. Shveikin, and V. A. Perelyaev	20
Some Results of Theoretical Calculations using Mathematical Statistics and Elements of Probability Theory as Applied to Phase Equilibria	25
I. A. Bondar', N. A. Toropov, and L. N. Koroleva	
Thermodynamic Analysis of Solid-Phase Reactions	30
B. F. Yudin	
Physical Interpretation of High-Temperature Creep in Oxides and Silicates	36
N. V. Solomin	
II. THERMO- AND ELECTROPHYSICAL PROPERTIES OF OXIDE SYSTEMS	
Thermal Conductivity of Refractory Oxide Solid Solutions	41
I. I. Vishnevskii and V. N. Skripak	
Dependence of the Coefficient of Thermal Expansion of Stabilized Zirconium Dioxide on the Ratio of Cubic and Monoclinic Phases	48
A. G. Karaulov, A. A. Grebenyuk, V. Ya. Belik, and I. N. Rudyak	
Physicochemical Properties of Refractory Oxide Compounds of the Rare-Earth Elements	53
K. I. Portnoi and N. I. Timofeeva	
Chromites of the Rare-Earth Elements and Some of Their Physicochemical Properties V. N. Pavlikov, A. V. Shevchenko, L. M. Lopato, and S. G. Tresvyatskii	57
Electrical Properties of the Rare-Earth Oxides and Several of Their Compounds . . .	63
A. V. Zyrin, V. A. Dubok, and S. G. Tresvyatskii	

Ionic and Electronic Conductivity of Samples from the $\text{ZrO}_2\text{—PrO}_{1.83}$ System	69
Z. S. Volchenkova	
A High-Temperature X-Ray Camera	74
P. F. Rumyantsev, I. I. Smil'geovich, and A. S. Shaposhnikov	
Apparatus for Studying the Thermal Diffusivity Coefficients of Refractory Materials .	79
Ya. A. Landa and E. Ya. Litovskii	
III. SYSTEMS CONTAINING REFRACTORY OXIDE COMPOUNDS	
A. Systems Containing Rare-Earth Oxides	
Irreversible Polymorphic Transformations in Rare-Earth Oxides.	85
V. S. Rudenko and A. G. Boganov	
Effect of Rare-Earth Oxide Impurities on the Polymorphism of Zirconium Dioxide . .	90
V. B. Glushkova and L. V. Sazonova	
Crystal Structure of Gadolinium Pyrosilicate	97
Yu. I. Smolin and Yu. F. Shepelev	
The Chemistry of Cerium in Oxide Systems: Investigation of the Effect of Temperature and Gaseous Environment on Solid-Phase Reactions	99
A. I. Leonov, A. B. Andreeva, V. E. Shvaiko-Shvaikovskii, and E. K. Keler	
Interaction of Scandium Oxide with Oxides of Elements of the Titanium Subgroup. . . .	104
L. N. Komissarova, B. I. Pokrovskii, and F. M. Spiridonov	
Solid-Phase Reactions between the Pentoxides of Niobium and Tantalum and Oxides of the Rare-Earth Elements	108
E. P. Savchenko, N. A. Godina, and É. K. Keler	
B. Refractory Oxide Systems Not Containing Rare-Earth Elements	
Phase Equilibria in Several Sections of the $\text{CaO—BaO—GeO}_2\text{—SiO}_2$ System	117
R. G. Grebenshchikov, A. K. Shirvinskaya, V. I. Shitova, and N. A. Toropov	
Phase Transitions and Changes in Several Engineering Properties of Highly Refractory Materials from the $\text{MgO—Al}_2\text{O}_3\text{—Cr}_2\text{O}_3$ System under Action of CaO and Fe_2O_3	125
Ya. V. Klyucharov	
Crystallization of Melts in the $\text{BeO—Al}_2\text{O}_3\text{—SiO}_2$ System	135
I. A. Dmitriev and E. G. Semin	
Synthesis and Properties of Cordierite Refractory Materials from Agalmatolite	138
N. A. Sirazhiddinov	
Structural Study of Calcium Oxide Crystals.	143
V. D. Barbanyagre and I. G. Luginina	
IV. SILICATE SYSTEMS WITH VOLATILE COMPONENTS	
Hydrothermal Synthesis of Fibrous Amphiboles	151
T. A. Makarova and N. I. Nesterchuk	

Production of Fibrous Amphiboles by Recrystallization of Serpentine under Hydrothermal Conditions	153
É. N. Korytkova and A. D. Fedoseev	
Behavior of Synthetic Fibrous Fluoramphiboles on Heating	156
O. G. Chigareva and L. F. Grigor'eva	
Synthesis and Study of Chromitic Hydrogarnets	158
É. G. Klimenko and V. A. Tikhonov	
Interaction of Titanium and Germanium Tetrachlorides with Hydrated Silica.	162
A. M. Shevyakov, G. N. Kuznetsova, and V. B. Aleskovskii	
Processes Occurring on the Interaction of Polyorganosiloxanes and Lamellar Silicates while Heating from 400 to 1600°C	169
A. I. Boikova, N. A. Toropov, and E. S. Sher	
V. SINTERING AND DEFORMATION IN OXIDE SYSTEMS	
Kinetics and Deformation Mechanism of Highly Refractory Oxides and Their Compounds during Component Formation	179
I. G. Orlova	
Kinetics and Mechanism of Sintering and Recrystallization in Refractory Oxides and Their Compounds	188
É. V. Degtyareva	
Activation of Sintering Processes in Magnesium Oxide and in Some MgO -Base Commercial Products	196
V. A. Bron, M. I. Diesperova, L. P. Sudakova, and I. A. Stepanova	
VI. STUDY OF CEMENT CLINKER	
Ordered and Disordered Structures in Tricalcium Silicate and Its Solid Solutions . . .	205
A. I. Boikova, N. A. Toropov, V. T. Vavilonova, G. N. Samsonkina, and Yu. G. Sokolov	
Crystallization of Clinker Melts in the 1900–1200°C Temperature Range	211
Yu. M. Butt, V. V. Timashev, and N. S. Panina	
Effect of Barium and Strontium on the Structural Formation of Clinkers Produced from the Sludge of the Chimkentskii Cement Factory	219
M. R. Ramankulov, M. Sh. Sharafiev, and V. A. Popov	
VII. WORK IN THE FIELD OF REFRACTORIES	
Interaction of Refractory Metals with Alumina and Silica.	223
T. P. Markholiya, B. F. Yudin, and N. I. Voronin	
Interaction of Metal and Refractory Materials during the Continuous Casting of Steel .	228
A. K. Karklit and E. S. Borisovskii	
Physicochemical Processes of Refractory Disintegration in the Metallurgy of Copper	234
V. A. Ragozinnikov, I. L. Shchetnikova, and K. V. Vorob'eva
